

Figure no.:W2.F4

Capacity of preheater kiln TPD

Resultant capacity of calciner kiln in TPD for different % fuel fired in calciner

example : Capacity preheater kiln 3000 TPD (line A)
 % fuel in calciner 60 (line 0-0)
 capacity calciner 7500 TPD (line B)

Scale : A : 1 cm = 250 TPD - capacity preheater kiln
 B : 1 cm = 750 TPD - capacity of calciner kiln

Nomogram for working out increased capacity of a preheater kiln for different percentages of fuel fired in calciner
