<i>Preface</i>	v
Experiment 1	
To understand the working of an Analytical Balance.....	1
Experiment 2	
To calibrate the volumetric glassware commonly used in analytical laboratory	7
Experiment 3	
To Prepare 250 ml of approximately 0.1 N Hydrochloric acid (HCl) and standardize it	12
Experiment 4	
To prepare 250 ml of approximately 0.1 N Sulphuric acid (H ₂ SO ₄) and standardize it	17
Experiment 5	
To prepare 250 ml of approximately 0.1 N sodium hydroxide (NaOH) and to standardize it	21
Experiment 6	
To determine the percentage purity of given sample of Sodium bicarbonate (NaHCO ₃)	26
Experiment 7	
To Determine the percentage composition of given mixture of Sodium carbonate (Na ₂ CO ₃) and Sodium hydroxide (NaOH)	32
Experiment 8	
To determine the percentage purity of given sample of liquid Ammonia (NH ₃)	38

Experiment 9

To determine the percentage purity of
given sample of Boric acid (H_3BO_3)45

Experiment 10

To prepare 250 ml of approximately
0.1 N $HClO_4$ (Perchloric acid) and to standardize it51

Experiment 11

To prepare 250 ml of approximately
0.1 N $AgNO_3$ and to standardize it55

Experiment 12

To determine the percentage purity of
given sample of Sodium chloride.....59

Experiment 13

To prepare 250 ml of approximately
0.1 N Ammonium thiocyanate
(NH_4SCN) and standardize it64

Experiment 14

To find out the percentage purity of given sample of
 $NaCl$ by Volhard's method68

Experiment 15

To prepare approximately 0.05 M
Disodium EDTA and to standardize it74

Experiment 16

To find the percentage purity of given
sample of Magnesium sulphate ($MgSO_4$)78

Experiment 17

To find out the percentage purity of
given sample of Calcium gluconate83

Experiment 18

To prepare approximately 0.1 N Potassium permanganate (KMnO_4) and standardize it.....88

Experiment 19

To find out the percentage purity of given sample of $\text{FeSO}_4 \cdot 7\text{H}_2\text{O}$92

Experiment 20

To prepare 250 ml of approximately 0.1 M Sodium thiosulphate ($\text{Na}_2\text{S}_2\text{O}_3$) and standardize it.....98

Experiment 21

To Determine the percentage purity of given sample of Copper sulphate ($\text{CuSO}_4 \cdot 5\text{H}_2\text{O}$)102

Experiment 22

To prepare 250 ml of approximately 0.1 N Sodium nitrite (NaNO_2) and standardize it

Experiment 23

To draw the Neutralization curve of

1. 1 N hydrochloric acid (HCl) and 1 N sodium hydroxide (NaOH)
2. 0.1 N hydrochloric acid (HCl) and 0.1 N sodium hydroxide (NaOH)
3. 0.01 N hydrochloric acid (HCl) and 0.01 N sodium hydroxide (NaOH)107
