Preface(v)

Chapter 1

Introduction1

Chapter 2

Municipal Solid Waste

2.1 Introduction to Municipal Solid Waste3

2.2 Organization and Management of Municipal Solid Waste.....4

2.3 Quantity of Municipal Solid Waste.....28

2.4 Characteristics of Municipal Solid Waste29

 2.4.1 Physical Characteristics of Municipal Solid Waste30

 2.4.2 Chemical Characteristics of Municipal Solid Waste.....34

2.5 Evolution of Municipal Solid Waste Management35

2.6 Municipal Solid Waste Management36

2.7 Technologies for Municipal Solid Waste Management38

 2.7.1 Land Fill38

 2.7.1.1 Design of Landfill41

 2.7.1.2 Landfill Layout.....42

 2.7.1.3 Landfill Selection.....43

 2.7.1.4 Operating Methodology.....43

 2.7.1.5 Estimation of Leachate Quality and Quantity.....44

 2.7.1.6 Design and Construction of Landfill Liners47

 2.7.2 Composting55

 2.7.2.1 Microbiological Composting55

 2.7.2.2 Vermicomposting Technology.....67

 2.7.3 Incineration74

 2.7.3.1 Mass Burn.....74

 2.7.3.2 Modular Combustion Unit75

 2.7.3.3 Refused Derived Fuel75

2.7.3.4	Pyrolysis/Gasification	76
2.7.3.5	Slurry Carb Process	77
2.7.3.6	Plasma Pyrolysis/Plasma Arc Process	78
2.8	Tools and Equipments.....	84
2.9	Reclamation, Reuse and Recovery of Energy from MSW	86
2.10	Socio-Economic Considerations of Resource Recovery	95
2.11	Legal Provision.....	109

Chapter 3

Plastic Waste

3.1	Introduction to Plastic Waste	110
3.2	Characterization of Plastics	111
3.3	Technologies for Plastic Waste Management	111
3.3.1	Material Recovery	111
3.3.1.1	Mechanical Recycling	111
3.3.1.2	Feedstock Recycling	112
3.3.2	Energy Recovery	112
3.3.2.1	Co processing in Cement Kiln.....	112
3.3.2.2	Heat and Power Generation	113
3.3.3	Using Plastics Waste in Road Construction	113
3.3.4	Recycling / Recovery of Multilayer/ Laminated Plastic Packaging Waste	113
3.3.5	Polyethylene Terephthalate PET	113
3.3.5.1	Chemical Recycling Process for PET	114
3.3.5.2	Closed Loop Recycling for PET	114
3.3.5.3	Glycolytic Depolymerization of PET Waste in a Microwave Reactor	114
3.3.5.4	PET to Polyurethanes	115
3.4	Legal Provision.....	115

Chapter 4

Bio-Medical Waste

4.1	Introduction to Bio-Medical Waste.....	116
-----	--	-----

4.2	Evolution of Bio-Medical Waste Management	117
4.3	Organization and Management of Bio-Medical Waste	119
4.4	Characteristics of Bio-Medical Waste.....	120
4.5	Categorization of Bio-Medical Waste	120
4.6	Quantification of Bio-Medical Waste	123
4.7	Segregation, Handling and Storage of Bio-Medical Waste	125
4.8	Treatment, Destruction and Disposal of Bio-Medical Waste	129
4.9	Technologies for Bio-Medical Waste Management.....	131
4.9.1	Incinerator.....	131
4.9.2	Deep Burial Pit.....	131
4.9.3	Autoclave.....	132
4.9.4	Sharp Pit.....	132
4.9.5	Shredder.....	133
4.9.6	Secured Landfill.....	133
4.9.7	Liquid Waste Disinfection	133
4.10	Tools and Equipments Required for Bio-Medical Waste Management	134
4.11	Case Study.....	137
4.12	Legal Provision.....	137

Chapter 5

Hazardous Waste

5.1	Introduction to Hazardous Waste	138
5.2	Management of Hazardous Waste.....	139
5.3	Characterization of Hazardous Waste.....	139
5.3.1	Ignitability.....	140
5.3.2	Corrosivity.....	140
5.3.3	Reactivity	141
5.3.4	Toxicity	141
5.3.5	List of Parameters to be Tested for Hazardous Wastes	143
5.3.6	Analysis of Hazardous Waste.....	144
5.3.6.1	Comprehensive Analysis	144
5.3.6.2	Finger Print Analysis	145

5.3.7	Equipment/Instruments for Hazardous Waste Analysis and Characterization	146
5.4	Storage, Transport and Disposal of Hazardous Waste	147
5.4.1	Storage of Hazardous Waste.....	147
5.4.2	Transport of Hazardous Waste.....	148
5.4.3	Technologies of Hazardous Waste Management.....	151
5.4.3.1	Biological Treatment	151
5.4.3.2	Physical Treatment	152
5.4.3.3	Chemical Treatment	166
5.4.3.4	Disposal of Hazardous Waste – TSDF	175
5.5	Monitoring Protocol for Treatment Storage and Disposal Facility-TSDF.....	182
5.5.1	Ambient Air Quality Monitoring	182
5.5.2	Ground Water Quality Monitoring	183
5.5.3	Surface Water Quality Monitoring.....	183
5.5.4	Soil Quality Monitoring.....	184
5.6	Legal Provision.....	184

Chapter 6

Electronic Waste

6.1	Introduction to Electronic Waste.....	185
6.2	Average Life of Electronic Goods/Average Life Cycle/Obsolescence Rate	187
6.3	Classification of E- Waste	188
6.4	Categories of E-Waste	188
6.5	Composition and Characteristics of E-Waste.....	190
6.5.1	Hazardous Substances their Occurrences and Impact on Environment and Human Health.....	192
6.5.2	Substances and Elements in E-Waste	196
6.5.3	Applications of Substances and Elements in E-Waste	197
6.6	Quantity of E-Waste	199
6.7	Organization and Management of E-Waste	201
6.8	Evolution of E-Waste Management.....	202

6.9 Technologies for E-Waste Management	204
6.10 Case Study	208
6.11 Legal Provision	213

Chapter 7

Soil Remediation Technologies

7.1 Introduction.....	214
7.2 Sampling Technology.....	214
7.2.1 Surface Soil Sampling	215
7.2.2 Shallow Surface Sampling.....	215
7.3 Techniques of Decontamination of Soil.....	217
7.3.1 Removal Options for Soil Remediation.....	217
7.3.2 In situ Soil Remediation Processes	217
7.3.3 Site Remediation Technologies	217
7.3.3.1 Passive Contaminant Control System	219
7.3.3.2 Surface Water Control Technologies	219
7.3.3.3 Ground Water Control	220
7.3.3.4 Active Remediation Systems	226
7.3.3.5 Soil Vapour Extraction	228
7.3.3.6 Permeable Reactive Treatment Walls.....	229
7.3.3.7 Degradation Treatment Wall	230

Chapter 8

Waste Minimization

8.1 Introduction to Waste Minimization	231
8.2 Municipal Solid Waste Minimization	232
8.3 Industrial Waste Minimization.....	233

Chapter 9

Environment Impact Assessment

9.1 Introduction to Environmental Impact Assessment	242
9.2 Environment Impact Assessment Steps.....	245
9.2.1 Screening	246
9.2.2 Scoping.....	246

9.2.3	Baseline Studies	246
9.2.4	Impact Identification Prediction and Evaluation	248
9.2.5	Assessment Methodologies.....	251
9.2.5.1	Adhoc.....	254
9.2.5.2	Checklists.....	255
9.2.5.3	Matrices	257
9.2.5.4	Networks	258
9.2.5.5	Overlays.....	258
9.2.5.6	Environmental Index Using Factor Analysis	259
9.2.5.7	Cost/benefit analysis.....	259
9.2.5.8	Simulation Modeling Workshops.....	260
9.2.6	Environmental Management Plan (EMP)	260
9.2.6.1	Greenbelt Development	261
9.2.6.2	Financial Plan for Implementing EMP	261
9.2.7	Public Consultation	261
9.3	Legal Provision	268
References.....		269
