Scope of the Book: Part I and Part II (vii)

Acknowledgement (xi)

Part I

Methodology with Global Examples (Continental, Marine and Airborne – Satellite Surveys)

Chapter 1 Introduction

1.1 Geological Studies and Gravity and Magnetic Methods.....	4
1.1.1 Geodynamics and Plate Tectonics	4
1.1.2 Resource Exploration – Hydrocarbons, Minerals and Groundwater Exploration	7
1.1.3 Environmental Studies – Seismotectonics and Near Surface Geophysics.....	8
1.1.4 Different Modes of Surveys – Ground, Marine, Airborne and Satellite Surveys	9

Chapter 2 Gravity Method

2.1 Introduction.....	11
2.2 Basic Principles.....	11
2.2.1 Forces of Gravity	11
2.2.2 Gravitational Potential and Laplace Equation	12
2.2.3 Gravitational Acceleration (g)	13
2.2.4 Density of Rocks.....	14
2.2.5 Variation of Density with Depth.....	16
2.2.6 Thermal Structure of Lithosphere.....	18
2.2.7 Density – Velocity Relationship	18
2.2.8 Variation of Earth’s Gravity Field with Depth	19
2.2.9 Earth’s Shape and Geoid.....	19
2.3 Instruments and Data Acquisition.....	21
2.3.1 Instruments – Gravimeters and Gradiometers	21
2.3.2 Field Operations and Survey Procedures – Geodynamic Studies and Resource Exploration.....	28
2.3.3 Pre-Processing of Field Data	31
2.3.4 High Resolution Surveys	34
2.4 Corrections and Reduction of Gravity Data.....	35
2.4.1 Earth Tide Correction	35
2.4.2 Latitude Correction.....	36
2.4.3 Topography / Terrain Correction.....	36

2.4.4	Elevation Correction.....	39
2.4.5	Geoid (Indirect Effect) Correction.....	40
2.4.6	Free Air and Bouguer Anomaly Profiles and Maps (Images)	41
2.5	Post-Processing Analysis and Isostasy	43
2.5.1	Regional and Residual Fields	43
2.5.2	Isostasy	44
2.5.3	Isostatic Compensation and Vertical Crustal Movement.....	46
2.5.4	Isostatic Regional and Isostatic Residual Anomaly-Deccan Trap, India.....	49
2.6	Special Gravity Surveys – Marine, Airborne and Satellite Surveys	50
2.6.1	Eötvös Correction	51
2.6.2	Shipborne Marine Gravity Surveys	51
2.6.3	Airborne Gravity Surveys.....	52
2.6.4	Airborne Gravity Gradiometry	54
2.6.5	Advantages and Limitations of Airborne Surveys.....	55
2.6.6	Satellite Gravity and Altimeter Surveys	56
2.6.7	Satellite Geodesy and Gradiometry	58
2.6.8	Global Models of Earth's Geoid and Gravitational Field.....	60
2.6.9	Advantages and Limitations of Satellite Surveys	62
2.6.10	Comparative Study of Different Gravity Surveys	62
2.7	Interpretation.....	63
2.7.1	Qualitative Gravity Signatures of Extensional and Compressional Tectonics – Their Applications and Wilson Cycle	63
2.7.2	Quantitative Interpretation and Modelling: Simple Ideal Models	69
2.7.3	Gravity Field due to Arbitrary Shaped Two Dimensional Models.....	73
2.7.4	Gravity Field due to Three Dimensional Models	73
2.7.5	Ambiguity in Gravity Interpretation	74
2.7.6	Geoid Modeling and Terrain Effect.....	75
2.8	Applications: Gravity Anomaly and Related Maps of India.....	76
2.8.1	Important Maps for Interpretation of Gravity Anomalies.....	76
2.8.2	Gravity Studies in India – Geodynamics and Exploration.....	80
2.8.3	Satellite Gravity and Altimetry Maps – Sea Level Changes in Indian Ocean	82
2.9	Field Examples and Gravity Signatures – Extensional Tectonics.....	84
2.9.1	Passive and Active Rift Basins – Godavari and Mahanadi Basin, India and Continental Margin off West Coast of India.....	84
2.9.2	Active Rift Basins – East African Rift System.....	88
2.9.3	Global Examples – Rhine Graben, Europe; Rio Grande Rift, USA, and Baikal Rift, Russia	90
2.10	Compressional (Convergence) Tectonics: Recent Convergent Margins and Subduction Zones.....	94
2.10.1	Continental-Continental Convergence – Himalaya and Tibet and Alps Mountains.....	94

2.10.2	Oceanic-Continental Convergence: Nazca and South American Plates and Andes Mountains	97
2.10.3	Oceanic-Oceanic Plateau/Ridge Convergence: Kermadec Ridge and Trench (Mariana Type Subduction).....	98
2.11	Ancient Collision Zones: Proterozoic and Paleozoic Convergence.....	99
2.11.1	Grenville Province, Canada	100
2.11.2	Appalachian, USA and Caledonian, Europe Orogenies: Wilson Cycle	100
2.12	Comparative Study of Different Gravity and Magnetic Surveys and Expected Anomalies for Different Targets and Temporal Variations in Gravity Field.....	102

Chapter 3 Magnetic Methods

3.1	Introduction and Basic Principles	105
3.1.1	Vectorial Representation.....	106
3.1.2	Geomagnetic Pole and Magnetic Dip Pole	107
3.1.3	Variation of Geomagnetic Elements.....	108
3.1.4	Secular and Transient Variations of Geomagnetic Elements.....	110
3.1.5	Origin of Geomagnetic Field	110
3.1.6	Magnetic Force and Pseudogravity.....	111
3.1.7	Magnetic Field Strength.....	112
3.1.8	Magnetic Moment.....	112
3.1.9	Intensity of Magnetization	112
3.1.10	Magnetic Susceptibility	112
3.1.11	Magnetic Induction (B).....	113
3.1.12	Magnetic Units.....	114
3.1.13	Magnetic Materials	114
3.2	Rock Magnetism and Paleomagnetism.....	115
3.2.1	Remnant Magnetizations	116
3.2.2	Thermo Remnant Magnetization (TRM) and Curie Point Temperature.....	116
3.2.3	Detrital Remnant Magnetization (DRM)	117
3.2.4	Chemical Remnant Magnetization (ChRM)	117
3.2.5	Paleomagnetic Studies and Stability Tests	117
3.2.6	Apparent Polar Wander Path (APWP), Continental Drift, Reversal of Earth's Magnetic Field, Magnetostratigraphy, and Catastrophic Events.....	122
3.3	Instruments and Data Acquisition.....	129
3.3.1	Nuclear Precision Magnetometers	129
3.3.2	Optical Pumping Magnetometers	130
3.3.3	Data Acquisition: Ground Surveys	130
3.4	Corrections and Presentation of Magnetic Data.....	131
3.4.1	Diurnal Correction	131
3.4.2	Datum and Base Level Corrections	132

3.4.3	International Geomagnetic Reference Field (IGRF) Correction.....	132
3.4.4	Data Presentation	133
3.5	Data Processing.....	134
3.5.1	Regional – Residual Fields	134
3.6	Special Magnetic Surveys.....	135
3.6.1	Marine Magnetic Surveys.....	135
3.6.2	Airborne Multi-Parametric Surveys – High Resolution Surveys and Advantages	136
3.6.3	Satellite-Borne Magnetic Surveys (MAGSAT) – India and Himalaya	143
3.7	Interpretation of Magnetic Anomalies	146
3.7.1	Changes in Total Intensity Magnetic Anomaly	146
3.7.2	Qualitative Interpretation	149
3.7.3	Quantitative Interpretation – Characteristic Points and Curve Matching	151
3.7.4	Computation of Magnetic Field Due to Simple Models	154
3.7.5	Automatic Methods of Depth Estimation	158
3.8	Field Examples: Geodynamic Studies and Mineral Exploration	160
3.8.1	Extensional Regimes – Red Sea Rift, Continental Margins of India, Norway and USA, and Proterozoic Rift Basin, USA	160
3.8.2	Convergence Tectonics – Grenville and Appalachian Orogenies, Canada and USA.....	170
3.8.3	Satellite-Airborne Magnetic Map of India (EMAG2)	172
3.8.4	Long Range Airborne Magnetic Profiles – Manglore-Madras, India.....	174
3.8.5	Mineral Exploration: Airborne Magnetic and Spectrometer Surveys of Chitradurga Schist Belt, India.....	175

Chapter 4 Common Data Processing Methods and Parameter Estimation – Digital Signal Processing

4.1	Regional and Residual Separation	179
4.1.1	Polynomial Approximation.....	180
4.1.2	Applications – A Gravity Profile across Himalayas	180
4.1.3	Finite Element Approach – Gravity Map of Epicentral Zone of Latur Earthquake of 1993	181
4.2	Spectral Analysis	183
4.2.1	Fourier Series Representation and Linear System.....	183
4.2.2	Discrete Fourier Transform – Fast Fourier Transform and Geophysical Data	187
4.2.3	Fourier Transform of Gravity and Magnetic Fields and Filters.....	189
4.2.4	Analytical Operations in Frequency Domain and Applications	196
4.3	Fourier Transform of Gravity and Magnetic Fields: Layered Model and Basement Relief	202
4.3.1	Applications of Depth Estimates	206
4.3.2	3-Dimensional Basement Relief Model using Harmonic Inversion	209

4.4	Admittance Analysis and Coherence	210
4.4.1	Isostasy in Frequency Domain and Effective Elastic Thickness (EET)	211
4.4.2	Applications – EET, Sedimentary Basins and Backstripping	216
4.5	Linear Inversion and Parameter Estimation	223
4.5.1	Least Squares Inversion	224
4.5.2	Generalized Inversion: Singular Value Decomposition and Resolution Matrix	225
4.5.3	Inversion of Gravity Field Due to Simple Bodies (Fault Model)	226
4.5.4	Applications – Godavari Basin, India and Flexural Model	228
4.6	Field Examples: Harmonic Inversion and Geodynamic Studies.....	232
4.6.1	Bouguer Anomaly Map of India – Low and High Pass Filtered Maps and Moho Relief.....	232
4.6.2	Magnetic Crust Based on MAGSAT data	238
4.6.3	Crustal Structure: Faeroe-Shetland Channel, Iceland.....	240
4.6.4	Effective Elastic Thickness – Himalaya and Tibet	242
4.7	Field examples: Basement Model and Geological Mapping	243
4.7.1	3-D Basement Relief: Airborne Magnetic Map of North Germany	243
4.7.2	Geological Mapping: Apparent Density Map of Peninsular Shield, India	247
4.7.3	Gravity and Magnetic Investigations in German Continental Deep Borehole (KTB) - Variscan Orogeny	248

Part II

Integrated Exploration of Indian Plate and Resources

(Geodynamics, Seismotectonics, Hydrocarbons, Minerals,
Groundwater, Environment and Engineering Sites)

Chapter 5 Continental Drift and Plate Tectonics : Reconstructions, Gondwanaland Break-Up, Plumes and Drifting of Indian Plate

5.1	Continental Drift	255
5.1.1	Drift History and Apparent Polar Wander Path (APWP) of India and Adjoining Continents.....	256
5.1.2	Reconstructions – Paleozoic-Mesozoic, Rodinia and Precambrian Reconstructions	258
5.1.3	Drift History of Eurasia and Gondwanaland	259
5.2	Plate Tectonics	260
5.2.1	Sea Floor Spreading Magnetic Anomalies	260
5.2.2	Heat Flow and Depth of Ocean Floor with Age	264
5.2.3	Mid Oceanic Ridges and Subduction Zones.....	265
5.2.4	Delineation of Plates on Earth's Surface	267
5.2.5	Mapping of Subduction Zones: Wadati-Benioff Seismic Zone.....	269

5.2.6	Thermal Structure of Subducting Slab and Back Arc Basins: Delamination and Foundering of Lower Crust	270
5.2.7	Thermal and Density Structure of Continental and Oceanic Lithospheres.....	271
5.2.8	Plate Margins – Divergent (Submersibles), Convergent, Transform Faults and Triple Junctions	273
5.3	Mantle Plumes and Break up of Gondwanaland.....	281
5.3.1	Mantle Plumes	281
5.3.2	Breakup of Gondwanaland	284
5.3.3	Continental Margins and Oceanic Crust – Density and Velocity Structures	286
5.3.4	Cenozoic Reconstructions of Gondwanaland	288
5.3.5	Cenozoic Movement of Indian Continent.....	290
5.4	Indian Ocean	291
5.4.1	Western Indian Ocean and the Arabian Sea	293
5.4.2	Continental Shelf Offshore West Coast of India, Laccadive Ridge and Seaward Dipping Reflectors	295
5.4.3	North Arabian Sea: Airborne Total Intensity Map	297
5.4.4	Eastern Indian Ocean and Bay of Bengal	299
5.4.5	Bay of Bengal, Eighty Five East Ridge and Offshore Andaman Islands – Marine Magnetic and Seismic Profiles	300
5.4.6	Ninety East Ridge – Crustal Section and Effective Elastic Thickness	303
5.5	Arabian Sea and Bay of Bengal: Satellite Derived Gravity Maps	305
5.5.1	Bouguer Anomaly of India and Free Air Anomaly Map of Adjoining Oceans	306
5.5.2	Satellite Derived Bouguer Anomaly Map of India and Adjoining Oceans	309
5.5.3	Modelling of Gravity Anomalies along 17° N – Arabian Sea, Indian Continent and Bay of Bengal.....	310
5.6	Conjugate Structures of India and Antarctica: Eastern Margin of India and East Antarctica	315
5.6.1	Gravity and Magnetic Anomalies – Godavari, Mahanadi and Cauvery Basins and Continental Shelves Offshore.....	316
5.6.2	Gravity and Magnetic Anomalies - Lambert Rift and Amery Ice - Shelf, East Antarctica	323

Chapter 6 Collision of Indian and Eurasian Plates and Seismotectonics: Himalayan and Tibetan Terrains

6.1	Introduction.....	327
6.1.1	Collision of Indian and Asian Plates.....	327
6.1.2	Important Tectonic Elements of Himalaya, Tibet, and Adjoining Terrains	330
6.1.3	Satellite Free Air Anomaly Map.....	333
6.1.4	Satellite Geoid Anomaly Map	334
6.1.5	Bouguer Anomaly Map	335

6.1.6	Spectral Analysis and Depth Estimates	336
6.1.7	Filtered Geoid and Bouguer Anomaly Maps – Regional and Residual Maps	340
6.1.8	Modelling Regional and Residual Bouguer Anomaly of Tibet along 90°E.....	343
6.1.9	Bouguer anomaly of Himalaya and Foredeep: Filtered Regional Maps and Lithospheric Flexure	345
6.1.10	Seismicity of Himalaya and Tibet and Deep Focus Earthquakes	347
6.2	Central and Eastern Himalaya, Burmes Arc and Tibet – Crustal and Lithospheric Structures	352
6.2.1	Geomorphology, Geology, and Tectonics	352
6.2.2	Seismic Studies: Crustal Structures – INDEPTH Profiles and Other Seismic Studies	358
6.2.3	Seismic Studies: Lithospheric Structures.....	365
6.2.4	Magnetotelluric Studies	370
6.2.5	Gravity and Magnetic Studies: Structures and EET – Ganga Basin-Sikkim and Yadong- Golmud, Tibet Geotranssects, and Burmese Arc.....	372
6.2.6	Orography-Climate Induced Uplift and Channel Flow	390
6.3	Western Fold Belt (Pakistan) and Syntaxis, and NW Himalaya – Crustal and Lithospheric Structures	394
6.3.1	Geology and Tectonics	394
6.3.2	Seismic Studies	396
6.3.3	Magnetotelluric (MT) Studies	401
6.3.4	Gravity Studies and Himprobe: Crustal and Lithospheric Structures and Seismicity – Kashmir Earthquake and Deep Focus Earthquake, Hindu Kush	403
6.3.5	Neotectonics and Orography – Gravity Anomalies, Crustal and Basement Structures, Seismicity, Uplifts and River Courses	421
6.4	Geodetic Measurements and Deformation Models.....	433
6.4.1	Eastward Extrusion of Tibetan Crust and Sichuan Earthquake of 2008.....	435
6.5	Summary	436
6.5.1	Forces and Kinematic Model.....	436
6.5.2	Crustal and Lithospheric Structures – Geodynamics and Seismotectonics	438

Chapter 7 Geodynamics of the Indian Continent and Seismotectonics: Isostasy, Archean-Proterozoic Cratons, Collision Zones, Rift Basins, Plumes and Lithosphere, and it's Flexure

7.1	Archean-Proterozoic Tectonics.....	443
7.1.1	Triple Junction	445
7.2	Geophysical Signatures.....	446
7.3	Bouguer Anomaly Map of India vis-à-vis Geology and Tectonics	449
7.3.1	Geology and Tectonics	449
7.3.2	Complete Bouguer Anomaly Map of India	451
7.3.3	Isostasy and Effective Elastic Thickness	453

7.4	Broad Tectonic Zones of Indian Shield	458
7.4.1	Cenozoic Tectonics in the Northern Part	458
7.4.2	Ganga Basin and Basement Model for Hydrocarbon Exploration	458
7.4.3	Archean-Proterozoic Cratons and Collision Zones of Indian Shield	461
7.5	Aravalli-Delhi Mobile Belt (ADMB) and Western Rajasthan	462
7.5.1	Geology and Tectonics	462
7.5.2	Geophysical Studies – Nagaur-Jhalawar Geotransect	464
7.5.3	Integrated Crustal Structures and Evolutionary Model	468
7.6	Satpura Mobile Belt (SMB)	471
7.6.1	Central Part of the SMB: Geophysical Studies – Crustal Structures, Seismicity and Evolutionary model	471
7.6.2	Rifting and Platform Deposits: Vindhyan and Bijawar-Mahakoshal Group of Rocks and their Economic Potential – A Plate Tectonics Model	484
7.6.3	Extension of the SMB towards East and West	493
7.6.4	Shillong Plateau and Bengal Basin, India and Bangladesh and Shillong Earthquake	501
7.7	Godavari Proterozoic Belt (GPB) and Gondwana Basins – Crustal Structures Proterozoic Triple Junction and Seismicity	509
7.7.1	Godavari, South Rewa-Mahanadi Basins – Geology, and Bouguer Anomaly	509
7.7.2	Regional Gravity and Magnetotelluric Profiles across the GPB and Dharwar Craton	512
7.7.3	Airborne and Ground Magnetic Maps of Godavari Basin	514
7.7.4	Airborne Magnetic Profile from Hyderabad to Puri across the GPB	516
7.7.5	Proterozoic Collision Tectonics across the GPB, Proterozoic Basins and Triple Junction	518
7.8	Peninsular Shield: Eastern and Western Dharwar Cratons and Deccan Volcanic Province	518
7.8.1	Geology and Tectonics	518
7.8.2	Gravity and Magnetic Fields over a Typical Granite Pluton (Hyderabad) and Earthquakes	521
7.8.3	Deccan Volcanic Province: Bouguer, Airborne Magnetic and Conductivity Anomalies and Seismotectonics – Koyna and Latur Earthquakes	523
7.8.4	Crustal Structures – Eastern and Western Dharwar Cratons and Madagascar	528
7.8.5	Crustal and Lithospheric Structures under the WDC and Offshore	530
7.8.6	Evolutionary Model – Neoproterozoic Plate Tectonics and Triple Junction	533
7.9	Southern Granulite Terrain (SGT)	534
7.9.1	Geology, Tectonics and Geophysical Investigations – Kuppam-Palani Geotransect	534
7.9.2	Bouguer Anomaly, Integrated Crustal Structures and Seismicity	537
7.9.3	Airborne Magnetic Map and Shear Zones	543
7.9.4	Evolutionary Model – Neo-Archean Plate Tectonics and Triple Junction	545

7.10	Eastern Ghat Mobile Belt (EGMB) and Adjoining Cuddapah, and Coastal Godavari Basins	548
7.10.1	Southern Part of the EGMB and Multi-Parameter Geophysical Investigations: Crustal Structures, Seismicity, and Evolutionary Model – Proterozoic Plate and Plume Tectonics	548
7.10.2	Extension of the EGMB towards South including Sri Lanka- Crustal Structures.....	562
7.10.3	Extension of the EGMB towards North-Crustal Structures across Hinge Zone and Bengal Basin, India and Bangladesh.....	563
7.10.4	Bouguer Anomaly across East Antarctica, Crustal Structures and Rifting, and Convergence	565
7.10.5	Heliborne Magnetic Survey in Antarctica	568
7.11	Lithosphere and Asthenosphere under the Indian Continent	569
7.11.1	Spectrum of Bouguer Anomaly Map of India	570
7.11.2	Low Pass Filtered Regional Map and Lithospheric and Crustal Bulges and Seismicity	572
7.11.3	Spectral Analysis of Geoid Low of the Indian Ocean	575
7.11.4	CHAMP Satellite and Airborne Magnetic Data Over Indian Peninsular Shield and Spectral Analysis – Moho as Magnetic Discontinuity.....	577
7.12	Conclusions: Archean-Proterozoic Convergence Model of Indian Cratons, Rifted Platforms, Plumes, and Basins	581
7.12.1	North Indian Shield: Paleo and Mesoproterozoic Convergence and Rifting.....	581
7.12.2	South Indian Shield: Neoproterozoic Convergence and Triple Junction	583
7.12.3	Integrated Convergence Model of Indian Cratons and Rifting.....	585
7.12.4	Lithosphere and Asthenosphere under the Indian Plate and its Rapid Drift.....	587

Chapter 8 Seismotectonics and Geodynamics: Bhuj, New Madrid and Sumatra Earthquakes and Tsunami with Co-Seismic Changes

8.1	Introduction – Grabens and Horsts	589
8.1.1	Characteristics of Earthquakes.....	591
8.1.2	Earthquake Focal Mechanism.....	593
8.1.3	Type of Earthquakes	593
8.1.4	Seismic Zonation Map of India and SAARC Countries	595
8.2	Bhuj Earthquake of January 26, 2001	596
8.2.1	Regional Plate Tectonic Settings and Seismicity in Kachchh (Kutch).....	596
8.2.2	Tectonics of Kachchh (Kutch) Basin – Faults and Radar Topographic Mission (SRTM) Images.....	599
8.2.3	Seismological and Field Investigations of the Bhuj Earthquake	600
8.2.4	Seismic Reflection Imaging.....	600
8.2.5	Bouguer Anomaly Map of Kachchh (Kutch).....	601
8.2.6	Total Intensity Magnetic Map of Epicentral Area	602

8.2.7	Isostasy and Isostatic Regional Gravity Anomaly	603
8.2.8	Residual Gravity Anomaly	605
8.2.9	Basement Faults, Structures and Crustal Thickness across Wagad Uplift	605
8.2.10	Basement Faults and Structures across Kachchh Mainland Uplift	607
8.2.11	Sismotectonics of Bhuj Earthquake and Geodynamics	609
8.3	Source Parameters of the Bhuj Earthquake from Post Seismic Elevation and Gravity Changes.....	611
8.3.1	Pre- and Post- Earthquake Measurements of Gravity and Elevation.....	612
8.3.2	Co-seismic Dislocation Model.....	615
8.3.3	Gravity Changes Due to Faulting and Subsurface Mass Redistribution.....	616
8.3.4	Co-seismic Mass Distribution and Hydrological Changes	616
8.3.5	Comparison of Bhuj Earthquake with New Madrid and Shillong Earthquakes	617
8.4	Sumatra Earthquake of December 26, 2004 and Related Tectonic Settings.....	619
8.4.1	Earthquake and Co-Seismic Deformation	619
8.4.2	Associated Tsunami.....	621
8.4.3	Regional Tectonic Settings	623
8.4.4	Seismic Imaging, Gravity Anomalies, and Seismic Activity.....	624
8.5	Co-Seismic Changes, Precursors, and Natural Disaster Management.....	626
8.5.1	Temporal Variation in Gravity Field in a Seismically Active Region, Koyna (India).....	627
8.5.2	Natural Disaster Management – Some Suggestions	633

Chapter 9 Resource Exploration and Geodynamics: Hydrocarbons, Groundwater, and Minerals

9.1	Introduction.....	635
9.1.1	Hydrocarbon Exploration, Suitable Prospects, Rifted Margins and Seaward Dipping Reflectors	635
9.1.2	Classification of Indian Basins	638
9.1.3	Groundwater Exploration in Hard Rock.....	639
9.2	Saurashtra, NW India – Hydrocarbon and Groundwater Exploration and Geodynamics.....	641
9.2.1	Regional Tectonics and Geology	641
9.2.2	Lineament Map	644
9.2.3	Multi-parameter Geophysical Studies.....	645
9.2.4	Hydrocarbon Exploration – Integrated Approach and Subtrapean Mesozoic Sediment Thickness Map	652
9.2.5	Groundwater Exploration : Airborne Magnetic, Gravity and Landsat Lineaments and Airborne Magnetic Map of Cental Botswana – Karoo Volcanics	655
9.2.6	Geodynamic Studies – Moho Configuration and Volcanic Plugs with Palaeomagnetic and Geochemical Studies	659

9.3	Kachchh – Mesozoic Sediments and Basement Model	669
9.3.1	Bouguer Anomaly and Basement Model	669
9.3.2	Mesozoic Sediment Thickness Map and Hydrocarbon Prospect	670
9.3.3	Airborne Magnetic Map and Groundwater Potential	670
9.4	Cambay Basin and its Extension in Western Rajasthan (Barmer and Jaisalmer Basins) – Tertiary and Mesozoic Rift Basins and Geodynamics	671
9.4.1	Bouguer Anomaly and Crustal and Basement Models	672
9.4.2	Crustal and Upper Mantle Models across Cambay Basin	676
9.5	Deccan Syncline (Narmada-Tapti Section) in Central India – Mesozoic Sediments and Basement Model	678
9.5.1	Residual Gravity Anomaly Map	679
9.5.2	Basement Model – Velda-Sandhwa Profile	680
9.5.3	Basement Model – Kothar-Sakri Profile	680
9.5.4	Subtrapean Mesozoic Sediment Thickness Map	681
9.5.5	Nagpur-Wardha Section	681
9.6	Offshore Exploration – Hydrocarbon Prospect	683
9.6.1	Offshore West Coast of India – Seismic Section and Bouguer Anomaly	683
9.6.2	Offshore and Onshore East Coast of India – Seismic Section and Bouguer Anomaly	686
9.6.3	Offshore Andaman Islands – Seismic Section and Bouguer Anomaly	688
9.7	Vindhyan Basin, Central India and Singhbhum District – Groundwater Potential and Hydrocarbon Prospect	689
9.7.1	Airborne Total Intensity Map of Vindhyan Basin – Magnetic Lineaments	690
9.7.2	Jabera Dome – Bouguer Anomaly and Hydrocarbon Prospect	692
9.7.3	Ground Magnetic and Resistivity Studies	693
9.7.4	Resistivity Soundings and Groundwater Potential	694
9.7.5	Singhbhum District, Jharkhand, India - Airborne Magnetic Trends and Groundwater Potential	695
9.8	Upper and Lower Assam Shelf – Hydrocarbon Prospect and Geodynamics	696
9.8.1	Gravity Anomalies of the Upper Assam Shelf	698
9.8.2	Basement Model and Spectral Analysis	699
9.8.3	Geological Section and Oil Occurrences	701
9.8.4	Lower Assam Shelf (Southern Part) – Hydrocarbon Prospect and Geodynamics	702
9.9	Groundwater budgeting using GRACE Satellite Gravity Data	704
9.10	Mineral Exploration and Geodynamics	705
9.10.1	Base Metal and Gold Mineralization	706
9.10.2	Ferrous Minerals – Iron ore, Chromite and Manganese Deposits	716
9.10.3	Non-Metallic Minerals	718
9.10.4	Volcanic Plugs and Magnetic Anomalies	718

9.10.5	High Resolution Heliborne Magnetic Surveys – Volcanic Plugs and Groundwater Potential	721
9.10.6	Uranium Mineralization – Integrated Airborne and Ground Geophysical Surveys.....	723

Chapter 10 Some Typical Environmental and Engineering Studies: Near Surface Geophysics

10.1	Introduction.....	731
10.2	Environmental Studies	731
10.2.1	Quality of Aquifers	731
10.2.2	Cavity Detection – Coal Mines.....	733
10.2.3	Mass Changes in Coal Mines – 4-D Gravimetry	734
10.3	Impact Craters – Lonar Lake in Deccan Trap Province.....	735
10.3.1	Geophysical and Geological Signatures of an Impact Crater – Lonar Lake.....	736
10.3.2	Gravity and Magnetic Anomalies over Lonar Lake, India – An Impact Crater	736
10.3.3	Gravity and Magnetic Anomalies	737
10.3.4	Modeling of Gravity and Magnetic Anomalies of Lonar Lake	738
10.4	Effect of Solar Eclipse on the Earths Gravity Field – Allias Effect.....	741
10.4.1	Experiment during a Solar Eclipse in India	741
10.4.2	Temporal Variations in Gravity Field During Solar Eclipse on 24 October, 1995.....	742
10.5	Effects of Lightning on the Earth’s Magnetic Field.....	743
10.5.1	Site at Kompalle Village, Hyderabad	744
10.5.2	Site near HMT Factory, Hyderabad.....	745
10.5.3	Grid Survey at Kompalle Village	746
10.5.4	Effects of Lightning on Magnetization of Rocks.....	747
10.6	Engineering Site Investigations	747
10.6.1	Geophysical Investigations for a Power Project	748
10.6.2	Nuclear Power Plant, Kakrapar, Surat, Gujarat	750
10.7	Archeological Site Investigations	752
10.7.1	Paleochannels and Settlements of Harappa period in Kalibangan, Rajasthan	752
10.7.2	Mahastupa, Nelakondapally, Khammam District, A.P., India.....	754
Appendix: I	Geological Time Scale	757
Appendix: II	Some Important Events of Recent Periods (Pleistocene and Holocene).....	758
Appendix: III	Heat Flow Map of India	759
Appendix IV	Seismic Zonation Map of SAARC Countries-Pakistan and Bangladesh	760
	Colour Photographs of All Chapters.....	761
	Bibliography	825
	Index.....	923
