Preface(vii)

Acknowledgements(ix)

Chapter 1

Materials

1.1 Engineering Materials	1
1.2 Classification of Engineering Materials	2
1.2.1 Metals.....	2
1.2.2 Semiconductors.....	2
1.2.3 Ceramics	2
1.2.4 Polymers	2
1.2.5 Glasses	3
1.3 Material Properties	4
1.3.1 Density	4
1.3.2 Specific gravity	4
1.3.3 Porosity	4
1.3.4 Strength.....	5
1.3.5 Elasticity	5
1.3.6 Plasticity.....	5
1.3.7 Hardness.....	5
1.3.8 Ductility	5
1.3.9 Brittleness	5
1.3.10 Creep	5
1.3.11 Stiffness.....	5
1.3.12 Fatigue.....	5
1.3.13 Impact strength.....	6
1.3.14 Toughness	6
1.3.15 Hardness.....	6
1.3.16 Resilience.....	6
1.3.17 Thermal conductivity	6
1.3.18 Corrosion resistance.....	6

1.4	Cast Iron	6
1.4.1	Properties of cast iron	7
1.4.2	Applications	7
1.4.3	Types of cast iron.....	8
1.5	Carbon Steel	14
1.5.1	Properties of plain carbon steels	14
1.5.2	Classification of steels	15
1.5.3	Low carbon/mild steel.....	15
1.5.4	Medium carbon steel.....	15
1.5.5	High carbon steels.....	16
1.5.6	Alloy Steels.....	16
1.6	Steel and Iron Carbon Diagram.....	19
1.6.1	Martensite	21
1.6.2	Ferrite.....	21
1.6.3	Austenite	21
1.6.4	Cementite	22
1.6.5	Pearlite	22
1.6.6	Ledeburite	22
1.7	Stress vs Strain	22
1.7.1	Stress	22
1.7.2	Types of stresses	23
1.7.3	Strain.....	24
1.7.4	Stress-strain diagram.....	24
1.7.5	Definition related to stress strain curve.....	25
1.8	Testing of Materials.....	27
1.8.1	Tensile testing	28
1.8.2	Shear testing.....	30
1.8.3	Parameters measured using UTM.....	31
1.9	Hardness Testing	35
1.10	Toughness Testing.....	38

1.11 Creep	40
1.11.1 Stages of creep	40
1.12 Fatigue and Fatigue Test	41
Solved Numerical Examples	42
Review Questions	44

Chapter 2

Measurement

2.1 Mechanical Measurements	46
2.1.1 Measurement	46
2.1.2 Metrology	46
2.1.3 General measurement scheme	47
2.1.4 Measurement categories	47
2.2 Temperature Measurement	48
2.2.1 Temperature scale	49
2.2.2 Temperature measurement technique	49
2.3 Pressure Measurement	58
2.3.1 Pressure gauge and absolute pressure	58
2.3.2 Pressure measurement technique	59
2.4 Velocity Measurements	69
2.4.1 Tachometer	69
2.4.2 Stroboscope	70
2.4.3 Venturi Meter	71
2.4.4 Orifice Meter	73
2.4.5 Pitot Tube	75
2.4.6 Rotameter	76
2.5 Strain Measurement	78
2.5.1 Strain gauge	78
2.5.2 Working principles	81

2.6	Force Measurement	82
2.6.1	Analytical balance.....	82
2.6.2	Platform scale.....	83
2.6.3	Mechanical balance.....	84
2.6.4	Elastic displacement method.....	85
2.7	Torque Measurement.....	88
2.7.1	Power measurement	88
2.8	Uncertainty Analysis	89
2.8.1	Uncertainty calculations.....	90
2.8.2	Error calculations using standard deviation	91
2.8.3	Calculation of confidence limits	92
2.9	Concept of Error of a Measurement	93
2.9.1	Types of error.....	93
2.9.2	Miscellaneous type of gross errors.....	96
2.9.3	Reducing measurement error	97
2.9.4	Error versus uncertainty	98
2.9.5	Where do errors and uncertainties come from?	98
2.9.6	Distribution - the 'shape' of the errors.....	99
2.9.7	Calibration.....	101
2.9.8	Static performance parameters.....	101
2.10	Measuring Instruments	103
2.10.1	Types of measuring instruments	104
2.10.2	Vernier caliper or scale	105
2.10.3	Micrometer.....	107
2.10.4	Dial indicator or dial gauges	111
2.10.5	Gauges.....	113
2.10.6	Sine bar	115
2.10.7	Angle gauge blocks.....	117
2.10.8	Combination set	117
2.11	Lathe.....	119
2.11.1	Main components of lathe.....	119
2.11.2	Classification of lathe	120
2.11.3	Lathe operation	120

2.12	Drilling Machines.....	121
2.12.1	Types of drilling machines.....	121
2.12.2	Components of drilling machine.....	122
2.12.3	Drilling operation.....	122
2.13	Milling Machine.....	122
2.13.1	Types of milling machine.....	124
2.13.2	Operation of milling machine.....	124
2.13.3	Advantages of milling machine.....	124
2.13.4	Limitations.....	125
2.14	Shaping Machine.....	125
2.14.1	Principle parts of shaper.....	125
2.14.2	Types of shaper.....	126
	Review Questions.....	127

Chapter 3

Fluids

3.1	Fluid.....	129
3.2	Fluid Mechanics.....	130
3.3	Fluid Properties.....	131
3.3.1	Pressure.....	131
3.3.2	Temperature.....	133
3.3.3	Density.....	133
3.3.4	Specific weight.....	133
3.3.5	Specific gravity.....	134
3.3.6	Specific volume.....	134
3.3.7	Viscosity.....	134
3.3.8	Surface tension.....	135
3.4	Classifications of Fluids.....	135
3.4.1	Newtonian fluids.....	136
3.4.2	Non-Newtonian fluid.....	136
3.4.3	Plastic fluids.....	137

3.4.4	Thixotropic fluids.....	137
3.4.5	Ideal fluid.....	138
3.4.6	Real fluid.....	138
3.4.7	Real versus ideal fluids	139
3.4.8	Newtonian versus non-Newtonian fluids	139
3.5	Pressure Variation with Depth.....	140
3.6	Static and Kinetic Energy in the Fluid	144
3.7	Bernoulli's Equation for Incompressible Fluids.....	145
3.7.1	Incompressible flow equation	148
3.8	Classification of Fluid Flow	148
3.8.1	Compressible vs incompressible flow.....	148
3.8.2	Viscous vs inviscid flow	149
3.8.3	Steady vs unsteady flow.....	149
3.8.4	Laminar vs turbulent flow.....	149
3.8.5	Transition flow	150
3.9	Fluid Couplings	150
3.9.1	Advantages of using fluid couplings.....	152
3.10	Pump.....	152
3.10.1	Classification of pumps.....	153
3.10.2	Centrifugal pump	153
3.10.3	Reciprocating pump	154
3.11	Air Compressor	155
3.11.1	Positive displacement type air compressor	155
3.11.2	Dynamic type air compressor	158
3.12	Turbine	160
3.12.1	Impulse turbines.....	161
3.12.2	Reaction turbines	162
3.13	Pneumatic Machine	164
3.13.1	Pneumatic logic.....	165
3.13.2	Applications of pneumatic machine.....	166
3.13.3	Advantages of pneumatic machine	167
3.13.4	Disadvantages of pneumatic machine.....	167

3.14	Hydraulic Power.....	167
3.14.1	Hydraulic press.....	168
3.14.2	Hydraulic crane.....	169
3.14.3	Hydraulic intensifier.....	170
3.15	Hydro Power.....	171
3.15.1	Hydro power potential.....	172
3.15.2	Problems of hydro power.....	173
3.15.3	Components of hydro power plant.....	174
3.15.4	Types of hydro power facilities.....	175
3.15.5	Conventional hydro power plants.....	176
3.15.6	Pumped storage plants.....	176
3.15.7	Base load power plant.....	179
3.15.8	Peak load power plant.....	179
	<i>Solved Numerical Examples</i>	180
	<i>Review Questions</i>	192

Chapter 4

Thermodynamics

4.1	Thermodynamics.....	194
4.1.1	Thermodynamics system.....	195
4.1.2	Thermodynamic properties.....	196
4.1.3	Properties of pure substances.....	196
4.2	Thermodynamic Processes.....	197
4.2.1	Work and heat in thermodynamics processes.....	198
4.3	Law of Thermodynamics.....	199
4.3.1	Zeroth law of thermodynamics.....	199
4.3.2	First Law of thermodynamics.....	199
4.3.3	Second law of thermodynamics.....	200
4.3.4	Third law of thermodynamics.....	203
4.4	Steam Properties.....	204
4.4.1	Constant pressure process.....	204
4.4.2	Constant volume process.....	205

4.4.3	Constant temperature process	206
4.4.4	Constant enthalpy process.....	207
4.4.5	Constant entropy process	207
4.5	Boilers	209
4.5.1	Classifications of boilers.....	210
4.5.2	Selection of a boiler	211
4.5.3	Essentials of a good steam boiler	212
4.5.4	Uses of boilers.....	212
4.6	Boiler Mounting and Accessories	213
4.6.1	Boiler mounting	213
4.6.2	Boilers accessories	220
4.7	Lancashire Boiler	225
4.7.1	Specification of lancashire boiler.....	225
4.7.2	Construction	225
4.7.3	Principle parts and their functions	226
4.7.4	Working	227
4.7.5	Advantages.....	227
4.7.6	Disadvantages	227
4.7.7	Application.....	228
4.8	Cochran boiler	228
4.8.1	Specifications of cochran boiler.....	228
4.8.2	Constructional details.....	228
4.8.3	Principle parts and their functions	230
4.8.4	Working Principle.....	232
4.8.5	Merits of cochran boiler.....	232
4.8.6	Demerits of cochran boiler.....	232
4.8.7	Application of cochran boiler	233
4.9	Locomotive Boiler.....	233
4.9.1	Specifications of locomotive boiler	233
4.9.2	Constructional details.....	233
4.9.3	Advantages.....	235
4.9.4	Disadvantages	235
4.9.5	Application of locomotive boiler	236

4.10	Babcock and Wilcox Boiler	236
4.10.1	Specifications of locomotive boiler	236
4.10.2	Constructional details.....	236
4.10.3	Working principle	237
4.10.4	Merits	239
4.10.5	Demerits.....	240
4.10.6	Applications	240
4.11	Boiler Draught.....	240
4.11.1	Natural draught – chimney.....	240
4.11.2	Artificial draught.....	250
4.11.3	The steam jet draught entails the following advantages	253
4.11.4	Advantages of mechanical draught.....	253
4.11.5	The forced draught entails following advantages over induced draught.....	253
4.12	Boiler Trial and Performance Analysis	254
4.12.1	Equivalent evaporation/capacity	254
4.12.2	Boiler efficiency.....	254
4.12.3	Boiler trail	254
4.12.4	Objective of boiler trail	254
4.12.5	Heat balance sheet.....	255
4.13	Refrigeration.....	255
4.13.1	Unit of refrigeration	257
4.13.2	Refrigerant	257
4.13.3	Identifying refrigerants by numbers.....	257
4.13.4	New Eco-friendly refrigerant	258
4.13.5	Properties of an ideal refrigerant.....	259
4.13.6	Simple vapor compression refrigeration system	260

4.13.7 Vapor absorption refrigeration system.....	263
4.13.8 Applications of refrigeration.....	265
<i>Solved Numerical Examples</i>	266
<i>Review Questions</i>	271
<i>Important Formulae</i>	272
Chapter 5	
Reciprocating Machines	
5.1 Reciprocating Engines.....	275
5.2 Steam Engine.....	276
5.2.1 Construction of steam engine.....	277
5.2.2 Terminologies	279
5.2.3 Classification of steam engine	279
5.2.4 Working of steam engine	281
5.2.5 Theoretical or hypothetical indicator diagram	282
5.2.6 Mean effective pressure (m.e.p. or pm)	283
5.2.7 Actual indicator diagram.....	288
5.2.8 Diagram factor	288
5.2.9 Indicated power (I.P.).....	289
5.2.10 Brake power (B.P.)	291
5.2.11 Rope brake dynamometer	291
5.2.12 Efficiency of steam engine.....	292
5.2.13 Advantages of steam engine	293
5.2.14 Disadvantages	293
5.2.15 Application.....	293
5.3 Thermodynamic Cycles.....	294
5.3.1 Carnot cycle	294
5.3.2 Otto cycle.....	295
5.3.3 Diesel cycle.....	297

5.4 Internal Combustion Engine.....	299
5.4.1 Classification of internal combustion engine.....	300
5.4.2 Terminologies	303
5.4.3 Parts of internal combustion engine.....	305
5.4.4 Spark ignition engine (Petrol Engine).....	309
5.4.5 Compression ignition engine (Diesel Engine)	317
5.4.6 Comparison between 2-Stroke and 4-Stroke engines.....	325
<i>Solved Numerical Examples</i>	328
<i>Review Questions</i>	334
<i>Important Formulae</i>	336
