Contents

Why is this book dedicated to Vidya Balan? ..... (v)

A few words for our readers…… ... (ix)

About the Authors ..... (xi)

Chapter 1

Intellectual Property Rights and their usefulness for Engineers 1

Intellectual Property and its different forms. Importance of this course. Usefulness of IPRs for engineers-introduction to new career opportunities/consultancy opportunities

Chapter 2

Intellectual Property vs. Physical or conventional Property 8

The concept of property. Intellectual Property vs. Conventional Property- similarities and differences. Importance of Intellectual Property - Brief History. Different forms of intellectual property and key features – Patents, Copyright, Trademarks, Industrial Designs, Registration of Plant Varieties, Registration of Semiconductor Integrated Circuit Layout Design (SICLD); Registration of Geographical Indications and Trade Secrets. Important International Treaties for Protection of Intellectual Property

Chapter 3

Usefulness of Patents for Engineers 29

Patents- usefulness for engineers viz. preventing duplication of work; helping in identification of hot areas of research; preventing exploitation; promoting revenue generation; giving access to rare technical information; preventing infringements and helping to avoid litigation; stimulating creativity. Patents- Significance for engineering professionals/ technopreneurs/ business managers; Patents- to file or not to file?

Chapter 4

Practical aspects of filing a Patent in India and Abroad 48

Patents- Some Basic facts; **Practical aspects of filing a patent in India-** Determination of patentability of inventions – the TRISHUL test of novelty, inventive step and industrial application; Making a patent search map and performing a prior art search; literature and non-literature sources of information for prior art assessment**.** Forms, Fee and time lines- Frequently asked questions- Double patenting, provisional patenting, patent of addition, divisional patents and convention patent applications. Precautions. Patents-some myths and misconceptions; **Practical aspects of filing a patent outside India (International Patenting)** – Various routes for international patenting; direct filing abroad, filing vide regional office route and filing under the Patent Co-operation Treaty (PCT). New developments in Patent Law-Patent Law Treaty (PLT); Substantive Patent Law Treaty (SPLT) and TRIPS; Enforcement of Patent Rights at National and Global level. Case study- Bajaj vs TVS. Annexures-Patent filing forms.

Chapter 5

Copyright and its usefulness in Engineering 88

Subject matter of copyright- Artistic, Literary, musical and cinematographic works; Definition, History, International Copyright Treaties; Internet treaties; Amendments in Indian Copyright Law and their significance; Protection of Software and digital innovations; Rights afforded by copyright law; Rights of Distribution and Communication to the Public; Exceptions in copyright; Plagiarism vs Copyright Infringement-Dr.Mashelkar Committee Report and Kaavya Vishwanathan Case; Case Studies - The Manipal Academy Case (Supreme Court of India, 2009); R.G. Anand v. Delux Films (Supreme Court of India, 1978); Adobe and Microsoft (Delhi High Court, 2009)

Chapter 6

Practical aspects of Copyright Registration and Transfer 106

FAQs- Procedural and practical aspects related to registration of copyright – Forms, Fee, Timeline- Ownership issues, transfer and duration. Enforcement at National and Global level-Remedies available under the Copyright Act. **Annexures-** Forms for registration of copyright (published/unpublished work, including that relating to software); Model Agreements between author and publisher-Royalty, Assignment

Chapter 7

Industrial Design Registration and its usefulness in Engineering 139

Importance of industrial design registration for engineers- Illustrative story; Indian Law related to Registration of Industrial Designs; Essential Requirements for Registration of a Design in India- Limitations; American Law; International Agreements- The Hague System; Conflicts related to Registration of Design, Copyright or Trademark; Legal rights and advantages of Industrial Design Registration- The Tupperware Case.

Chapter 8

Practical aspects of Industrial Design Registration in India and Abroad 150

FAQs- Practical aspects of Industrial Design Registration in India-Forms, Fee, Timelines. Procedural aspects. Enforcement at National and Global level. ***Annexures-*** *Locarno classification; Specimen of a duly filled representation sheet; How to file application for registration of Industrial Design- a ten step guide.*

Chapter 9

Trade Secrets- Importance for Engineers 177

Trade Secrets- Importance for Engineers; FAQs related to trade secrets; Elements of Trade Secrets- what is a trade secret and what is not? Laws relating to protection of Trade Secrets; Spring Board Doctrine; Case Study- Diljeet Titus Case; Documentation related to trade secrets-confidentiality agreement (CDA); Non-disclosure Agreement or NDA; non-compete agreement or NCA and Trade Secret Bonds or TSBs; Practical aspects of maintaining trade secrets; Maintaining Lab Notebooks as Trade Secret Documents. **Annexures-** Format of NDA/CDA and a Trade Secret Bond

Chapter 10

Trademarks- Importance in Engineering 211

Trademarks- Importance in Engineering industry; FAQs; National Trademark Filing- Practical aspects-forms, fee, timelines, procedural aspects. International Trademark Filing- Madrid System-Madrid Agreement and Madrid Protocol; Maintenance and Transfer; Dilution of ownership-likelihood of confusion; Case Study-Haldiram Bhujiawala (Supreme Court of India, 2000); Trade mark claims and Litigation; Enforcement – International trademark law. Case studies- Whirlpool (Supreme Court of India, 1996); Benz (Delhi High Court, 1993); Cadila (Delhi High Court, 2007); Distinction between Trademark and Domain name. Case Study- Satyam Infoway (Supreme Court of India, 2004). **Annexures-** Classification of goods and services; Format of form for Registration of Trademark (Form TM-1), Renewal of Trademark (TM-12)

Chapter 11

International Agreements and Organizations related to Intellectual Property..... 261

Important IPR related treaties and international agreements and their implications for Engineers. Paris Convention-1883; Berne Convention-1886; Hague Agreement-1934; Madrid System-1891; GATT, TRIPS and Establishment of WTO. GATT vs WTO. Amendments in the Indian Patents Act after TRIPS; Salient features of the Patents (Amendment) Act, 2005 of India; Indian IPR legislations. Understanding the difference between statutes and rules. WIPO–History, Objectives and Structure.

Chapter 12

Legislations and Policy 290

Supermacy of societal interests as the cornerstone for legislations, policy and legal judgements. Societal impact of IPRs. Handling IPR Related Conflicts. IPR Conflict Resolution - Role of Values and Ethics. IPR Conflict Resolution - Role of Alternative Dispute Resolution or ADR mechanisms; Arbitration in Intellectual Property Disputes; Indian Position Vs WTO and Strategies, Commitments to WTO. Patent Ordinance and the Bill – Protection and Utilization of Public Funded Intellectual Property Bill, 2008; Laws on Public Funded IP in other countries- USA, Australia, UK, Brazil, Japan; National IP Policies (NIPP) and role of WIPO; NIPP and India; NIPP of Malaysia; Key elements of an Institutional IPR policy. **Annexure-** Model IPR Policy Document

Chapter 13

Digital Innovations and Developments as Knowledge Assets 388

Significance of IP in Content for the Internet and Tech Sector-Symbols and trademarks as Business Assets in the Information Age; Internet and the Worldwide Web; Applications of computer technology - advantages/disadvantages of computers; Cyber

Technology- e-commerce and e-governance; Electronic records and digital signatures; The Employment Relationship in the Internet and Tech Sector - role of CDAs and contracts; Trolls, landmines and other metaphors; Cyber etiquette.

Chapter 14

IP Laws, Cyberlaws and Digital Content Protection 425

IP laws and Cyberlaws- Linkages; IPR issues vs Regulatory issues; E-commerce and Cyber Laws; Cyber Crime and Legislation- Need, Objective and Scope; UNCITRAL model law –Objectives- its relevance to India; Objects of the IT Act, 2000; Information Technology and Information Security.

Chapter 15

Practical Assignments 451

- *Preparation of a prior art search map for non-patent literature resources/patent literature resources; Searching of patent databases- Global, US, European, WIPO and Indian*
- *Downloading and filing of granted patents and published patent applications; Maintaining a patent file*
- *Filing a copyright application for a software you have developed*
- *Filing an industrial design application for an innovative design of machine*
- *Generating a 'patent infringement clearance report' for a client*

Model IPR Syllabus for Engineers 461
