<i>Preface to Third Edition</i>	(vii)
<i>List of Symbols and Abbreviations</i>	(xi)

PART - I STATICS

Chapter 1

Introductory Concepts

1-1 Scope of Mechanics	1
1-2 Preview of Statics	1
1.3 Fundamental Concepts and Axioms	2
1-4 Scalar and Vector Quantities	5
1-5 Introduction to Free-body Diagrams.....	6
1-6 Guide to Solving Problems	7
1-7 Dimensional Checks	8
1-8 Conversion of Units	9
1-9 Numerical Computations Slide Rules and Calculators	10
1-10 Useful Techniques and Information.....	12

Chapter 2

Resultants of Force System

2-1 Introduction.....	16
2-2 Parallelogram Law	16
2-3 Forces and Components	18
2-4 Resultant of Coplanar Concurrent Forces	25
2-5 Components of Forces in Space	30
2-6 Vector Notation	37
2-7 Vector Algebra, Dot Product	40
2-8 Vector Algebra, Cross Product	46
2-9 Moment of Force Principle of Moments.....	54

<i>Contents</i>	(xvi)
-----------------------	-------

2-10 Coplanar Applications	57
2-11 Spatial Applications	63
2-12 Couples	73
2-13 Resultant of any Force System	74

Chapter 3

Equilibrium of Force Systems

3-1 Introduction	91
3-2 Free-body Diagrams	92
3-3 Equations of Equilibrium	93
3-4 Equilibrium of Planar Systems	94
3-5 Further Discussion of Planar Equilibrium	104
3-6 Equilibrium of Spatial Systems	118

Chapter 4

Analysis of Structures

4-1 Introduction	137
4-2 Construction of Trusses	138
4-3 Method of Joints	143
4-4 Methods of Sections	154
4-5 Redundant Members; Counter Diagonals	167
4-6 Method of Members Frames	169
4-7 Space Trusses	184

Chapter 5

Friction

5-1 Introduction.....	195
5-2 Theory of Friction.....	195
5-3 Angle of Friction.....	198
5-4 Laws of Friction.....	200
5-5 Further Applications of Friction	210
5-6 Square-threaded Screws	223
5-7 Belt Friction	226
5-8 Disk Friction	233
5-9 Rolling Resistance	238

Chapter 6

Centroids and Centers of Gravity

6-1 Introduction	241
6-2 Centre of Gravity of Flat Plate	242
6-3 Centroids of Areas and Lines	243
6-4 Importance of Centroids and Moments of Area	244
6-5 Centroids Determined by Integration	245
6-6 Centroids of Composite Figures	252
6-7 Theorem of Pappus	264
6-8 Center of Gravity of Bodies Centroids of Volumes.....	270
<i>Summary</i>	276

Chapter 7

Moments of Inertia

7-1 Definition of Moment of Inertia	278
7-2 Polar Moment of Inertia	280
7-3 Radius of Gyration	281
7-4 Transfer Formula for Moment of Inertia	281
7-5 Moments of Inertia by Integration	283
7-6 Moments of Inertia for Composite Areas	289
7-7 Product of Inertia	297
7-8 Product of Inertia is Zero with Respect to Axes of Symmetry ..	298
7-9 Transfer Formula for Product of Inertia.....	299
7-10 Moment of Inertia with Respect to Inclined Axes	306
7-11 Mohr's Circle for Moments of Inertia	309
7-12 Maximum and Minimum Moments of Inertia Principal Axes ..	312
7-13 Moments of Inertia of Masses	316
7-14 Radius of Gyration	317
7-15 Transfer Formula for Mass Moments of Inertia	317
7-16 Mass Moments of Inertia by Integration	319
7-17 Moments of Inertia of Composite Bodies	327
<i>Summary</i>	337

Chapter 8

Special Topics

8-1	Introduction	339
8-2	Shear and Moment Equations and Diagrams	341
8-3	Relations between Load, Shear and Bending Moment	354
8-4	Definition and Meaning of Work	373
8-5	Introductory Concepts of Virtual Work Method	375
8-6	Principle and Application of Virtual Work	376
8-7	Introduction	394
8-8	Application of Parallelogram Law	394
8-9	Resultant of Coplanar Force Systems	395
8-10	String Polygon	396
8-11	Equilibrium of Force Systems by Graphic Methods.....	401
8-12	Graphic Analysis of Trusses Maxwell Diagrams.....	405

PART - II DYNAMICS

Chapter 9

Kinematics of a Particle

9-1	Introduction.....	415
9-2	Motion of a Particle	417
9-3	Rectilinear Motion	422
9-4	Motion Curves	431
9-5	Introduction to Vector Calculus	443
9-6	Rectangular Components of Curvilinear Motion.....	444
9-7	Normal and Tangential Components of Acceleration.....	454
9-8	Radial and Transverse Components Cylindrical Coordinates ...	463
	<i>Summary</i>	474

Chapter 10

General Principles of Dynamics

10-1	Introduction.....	477
10-2	Newton's Laws of Motion for a Particle.....	478
10-3	Fundamental Equation of Kinetics for a Particle	480
10-4	Gravitational and Absolute System of Units.....	481
10-5	D'Alembert's Principle – Motion of the Mass Center	482
10-6	Moment Effect of External Forces.....	486
	<i>Summary</i>	489

Chapter 11

Kinetics of Particles

11-1	Introduction.....	490
11-2	Translation – Analysis as a Particle	491
11-3	Further Discussion of Particle Kinetics	504
11-4	Translation – Analysis as a Rigid Body	518
	<i>Summary</i>	530

Chapter 12

Kinematics of Rigid Bodies

12-1	Introduction. Types of Rigid-Body Motion	531
12-2	Angular Motion – Fixed-Axis Rotation	532
12-3	Definition and Analysis of Plane Motion	542
12-4	Application of Kinematic Equations	547
12-5	Instant Center and Instantaneous Axis of Rotation	565
12-6	The Omega Theorem	581

Chapter 13

Kinetics of Rigid Bodies

13-1	Introduction.....	585
13-2	Equations of Plane Motion.....	585
13-3	Fixed-Axis Rotation.....	590
13-4	Rolling Bodies	607
13-5	General Plane Motion	621
	<i>Summary</i>	637

Chapter 14

Work-Energy Method

14-1 Introduction.....	639
14-2 Work-Energy Equation for Translation	640
14-3 Interpretation and Computation of Work	641
14-4 Work-Energy Applied To Particle Motion	646
14-5 Power Efficiency	656
14-6 Work-Energy Applied to Connected Systems	659
14-7 Work-Energy Method Applied to Fixed-Axis Rotation.....	668
14-8 Work-Energy Applied to Plane Motion	685
<i>Summary</i>	701

Chapter 15

Impulse and Momentum

15-1 Introduction.....	704
15-2 Linear Impulse-Momentum	704
15-3 Dynamic Action of Jet Streams	711
15-4 Conservation of Linear Momentum	719
15-5 Elastic Impact	726
15-6 Impulse Momentum in Plane Motion	734
15-7 Satellite Motion	750
15-8 Introduction to Gyroscopic Action	759
<i>Summary</i>	764

Chapter 16

Mechanical Vibrations

16-1 Introduction, Definitions and Concepts	768
16-2 Simple Harmonic Motion. Free Vibrations.....	769
16-3 Simple Pendulum	774
16-4 Compound Pendulum	776
16-5 Torsion Pendulum	779

<i>Contents</i>	(xxi)
16-6 Graphical Representation of Simple Harmonic Motion.....	782
16-7 Free Vibrations Without Damping : General Case	784
16-8 Free Vibrations Analyzed by Work-Energy Method	793
16-9 Forced Vibrations	798
<i>Summary</i>	806
Index	809
