<i>Foreword</i>	(v)
<i>Preface</i>	(vii)
<i>Introduction</i>	(xxiii)

CHAPTER 1

Dairy Scenario

1.1 History of Dairy Industry	1
1.2 Dairy Industry in U.S.A.	3
1.3 Dairy Industry in U.K.	5
1.4 Dairy Industry in Australia	5
1.5 Dairy Industry in India	5
1.6 Mile Stones in Dairy Development	6
1.7 Educational Institutions	8
1.8 Dairy Development	9
1.9 Evolution of Anand Model/Pattern	12
1.10 Role of NDDDB in Dairy Development.....	15
1.11 Operation Flood (OF) 1970 - White Revolution OF - I	15
1.12 Present Dairy Scenario	17
1.13 National Dairy Plan - (NDP)	29
1.14 Present Status of Dairy Industry	32

CHAPTER 2

Milk Processing Plant Layout and Management

2.1 Location/Selection of Site	44
2.2 Classification of Dairy Plants	45
2.3 Topography	46
2.4 Nature of Ground	46
2.5 Planning and Principles of Dairy Layout	47
2.6 Soft Water	49
2.7 Hard Water	49

CHAPTER 3**Milk and its Constituents**

3.1	Definitions of Milk	52
3.2	Composition of Milk	54
3.3	Constituents of Milk	60
3.4	Water	62
3.5	Lactose	62
3.6	Lactic Fermentation	63
3.7	Milk Fat	65
3.8	Milk Fat Constants/Properties	74
3.9	Substances Associated with Milk Fat	83
3.10	Milk Proteins	91
3.11	Mineral Matter of Milk	99
3.12	Vitamins of Milk	102
3.13	Gases Present in Milk	108
3.14	Enzymes in Milk	109
3.15	Colostrum Milk	110
3.16	Nutritive Value of Milk	113
3.17	Effect of Processing	122
3.18	Soft Curd Milk	123
3.19	Humanisation of Buffalo Milk	124
3.20	Vitamin-D Fortified Milk	124
3.21	Low Sodium Milk	124
3.22	Lactose Hydrolysed Milk	124
3.23	Cow Milk Vs. Buffalo Milk	125

CHAPTER 4**Factors Affecting the Composition of Milk**

4.1	Variations in the Composition of Milk	129
4.1.1	Species	129
4.1.2	The individuality of the Cow	130
4.1.3	Breed	130
4.1.4	Size of the Herd within Breed	132

4.1.5	Intervals between Milking	132
4.1.6	Variation from Day to Day	133
4.1.7	Efficiency of Milking	134
4.1.8	Different Quarters of the Udder	134
4.1.9	First and Last Milk Drawn	135
4.1.10	Stage of Lactation and Milk Yield	135
4.1.11	Season	138
4.1.12	Age of the Animal/Number of Lactations	141
4.1.13	Effect of Gestation	143
4.1.14	Level of Nutrition - Influence of Feeding	143
4.1.15	Excitement	145
4.1.16	Heat or Oestrus	145
4.1.17	Condition of Flesh at Calving	145
4.1.18	Relation between Daily and Yearly Production	146
4.1.19	Official Vs. Ordinary Milk Production Records	147
4.1.20	Hormonal Influence	148
4.1.21	Effect of Disease	149
4.1.22	Influence of Drugs	150
4.1.23	Miscellaneous Causes	150
4.2	Inter Relationship between the Milk Constituents	151

CHAPTER 5

Physico-chemical Properties

5.1	Physical State of Milk	153
5.1.1	Colour of Milk	154
5.1.2	Flavour and Taste	154
5.1.3	pH of Milk	155
5.1.4	Specific Gravity and Density	155
5.1.5	Acidity of Milk	157
5.1.6	Viscosity	158
5.1.7	Specific Heat	160
5.1.8	Surface Tension	161
5.1.9	Bound Water	161
5.1.10	Freezing Point	162
5.1.11	Boiling Point	163
5.1.12	Refractive Index (RI)	163
5.2	Butero-Refractometer Reading (B.R)	164

5.3	Oxidation-Reduction Potential	165
5.4	Electrical Conductivity	165
5.5	Buffering of Milk	166

CHAPTER 6**Microbiology of Milk**

6.1	Importance of Study of Microbiology	169
6.2	Classification of Microorganisms of Milk	169
6.3	Types of Microorganisms in Milk	169
6.3.1	Bacteria	169
6.3.2	Yeast	170
6.3.3	Moulds	170
6.3.4	Viruses	171
6.3.5	Bacteriophages	171
6.3.6	Hetero Fermentative Organisms	171
6.4	Growth of Micro Organisms	175
6.4.1	Stages of Growth	175
6.5	Milk and Public Health	178
6.5.1	Source of Contamination	181
6.5.2	Producing Animal	181
6.5.3	Milking Area	182
6.5.4	Handling of Milk-Utensils and Equipment	182
6.5.5	Personnel Sources of Contamination	182
6.5.6	Water as a Source of Contamination	183
6.6	Types of Microorganisms in Milk	183
6.6.1	Bacteriophages	183
6.6.2	Spoilage of Milk	183
6.6.3	Gas Production	184
6.6.4	Proteolysis	184
6.6.5	Ropiness	184
6.6.6	Microbiological Flavour	185
6.7	Alkali Production	186
6.8	Microbial Examination of Milk	187
6.8.1	DMC Method	188

6.9	Destruction of Microorganisms	193
6.10	Bactofugation	193

CHAPTER 7

Dairy Operations (Practices)

7.1	Pricing of Milk	195
7.2	Collection of Milk	201
7.2.1	Milk Collection Chilling Centres/Depots	201
7.3	Transportation	205
7.3.1	Methods of Transport	205
7.3.2	Types of Containers Used	207
7.4	Milk Processing	207
7.5	Receiving of Milk	209
7.6	Milk Reception Operations	210
7.7	Pre Heating	216
7.8	Cooling and Storage of Raw Milk-Cooling (In the Dairy Plant)	219
7.9	Standardisation	223
7.10	Homogenisation	227
7.10.1	Homogenizer	228
7.10.2	Factors Influencing Homogenisation	229
7.11	Pasteurisation	231
7.11.1	Pasteurisation Process and Equipment	235
7.11.2	Methods of Pasteurization	237
7.12	Bottling/Bottle Filling	247
7.12.1	Vacuum Fillers	248
7.12.2	Caps and Capping	249
7.12.3	Inspection of Filled Bottles	250
7.12.4	Decrating or Recrating of the Bottles	250
7.12.5	Crate Stacker	250
7.13	Packaging	250
7.13.1	Glass Bottle Vs Paper/Film Package	252
7.14	Storage	253

7.15	Distribution	254
7.15.1	Organisation of Routes	255
7.16	Judging and Grading of Milk	257
7.16.1	High Grade Market Milk - its Requirements	258
7.16.2	Manufacture of Different Grades of Milk	259
7.16.3	Flavour Defects-Causes and Prevention	260

CHAPTER 8

Dried Milk or Milk Powder

8.1	Whole Milk Powder-PFA or Legal Standard	263
8.2	Skim Milk Powder (SMP)	263
8.3	Drying of Milk Freezing	266
8.4	Cooling of Milk causes several changes, the most Important ones being	267
8.5	Freezing	267
8.6	Drying of Milk-Heat Application	268
8.6.1	Vacuum Roller Drying	268
8.6.2	Band Film Drying	269
8.6.3	Foam Drying	269
8.6.4	Freeze Drying	269
8.6.5	Spray Drying	270
8.7	Configuration of the Drier	275
8.7.1	Heating of the Air	275
8.7.2	Automization and Air Inlet	275
8.8	Instantization	277
8.9	Keeping Quality	278
8.9.1	Changes During Storage	278
8.9.2	Lactose Protein Changes	279
8.10	Dehydration-Concentrated Milk	279
8.11	Sweetened Condensed Milk	281
8.12	Un-sweetened Condensed Skim Milk	281
8.13	Composition	281
8.13.1	Physico-chemical Properties	282
8.13.2	Colour and Flavour	283
8.13.3	Viscosity	283

8.14	Method of Manufacture-(Sweetened Condensed Milk)	283
8.14.1	Heating	284
8.14.2	Homogenisation	285
8.14.3	Sugar	285
8.14.4	Concentration	285
8.14.5	Cooling and Seeding	285
8.14.6	Packaging	285
8.15	Keeping Quality	286
8.16	Evaporated Milk or Un-sweetened Condensed Milk	287
8.16.1	Composition	288
8.17	Food Value	289
8.18	Method of Manufacture	289
8.19	Preheating/Fore Warming	290
8.19.1	Concentrating	291
8.19.2	Packaging	291
8.20	UHT Process of Sterilization	292
8.20.1	Recombination	292
8.20.2	Properties of the Product	292
8.20.3	Heat Stability	293
8.20.4	Defects in Evaporated Milk	294

CHAPTER 9**Dairy Products**

9.1	Cream	295
9.1.1	Separation Methods	297
9.1.2	Physico-chemical Properties of Cream	303
9.1.3	Factors Affecting the Fat Loss in Skim Milk during Separation	305
9.1.4	Yield of Cream	308
9.1.5	Quality of Cream	309
9.1.6	Defects in Cream	309
9.1.7	Uses of Cream	310
9.2	Ice Cream	310
9.2.1	Composition	314
9.2.2	Milk Solids Not Fat (MSNF)	316
9.2.3	Home Production	317

9.2.4	Large Scale or Factory Production of Ice-cream	319
9.2.5	Figuring the Mix/Composition of the Mix	321
9.2.6	Properties of the Mix	323
9.2.7	Preparation of the Mix	325
9.2.8	Pasteurizing the Mix	325
9.2.9	Freezing Process-Changes taking Place	328
9.2.10	Defects in Ice-cream	331
9.3	Butter	332
9.3.1	Composition	334
9.3.2	Cooling and Ageing of Cream	336
9.3.3	Ripening of Cream	337
9.3.4	Churning	337
9.3.5	Theories of Churning	338
9.3.6	Churning Operation/Procedure	339
9.3.7	Difficulties/Problems of Churning	341
9.3.8	Method of Working/Kneading	343
9.3.9	Defects or Faults in Butter	344
9.4	Cheese	345
9.4.1	Types/Classification of Cheese	348
9.4.2	Composition of Cheese	349
9.4.3	Food and Nutritive Value	350
9.4.4	Ripening or Adding Starter to the Milk	353
9.4.5	Cottage Cheese	360
9.4.6	Processed Cheese	361
9.4.7	Packaging	362
9.4.8	Storage	362
9.4.9	Defects/Abnormalities in Cheese	362
9.5	Butter Oil	362
9.5.1	Direct Evaporation Method	363
9.5.2	Directly from Cream by De-emulsification	364
9.5.3	Packaging	365
9.6	Ghee	365
9.6.1	Physico-chemical Constants of Ghee	369
9.6.2	Manufacturing Methods	370
9.6.3	Keeping Quality	372
9.6.4	Grading	372
9.6.5	Defects	373

9.7	Khoa	374
9.7.1	Standards of Khoa	375
9.7.2	Physico-chemical changes during Khoa Making	377
9.7.3	Methods of Preparation	378
9.7.4	Factors Affecting the Quality and Yield of Khoa	380
9.7.5	Packaging and Shelf Life of Khoa	381
9.8	Paneer	382
9.8.1	Principle	382
9.8.2	Conditions of Manufacture	383
9.8.3	Manufacture of Paneer	385
9.8.4	Varieties of Paneer	386
9.8.5	In Package Paneer Process	386
9.8.6	Preservation of Paneer	388
9.9	Chhena	389
9.9.1	Chemical Composition	390
9.9.2	Traditional Chhena Making Process	391
9.9.3	Mechanisation Process for Chhena Making	393
9.9.4	Innovation Process in Chhena Making	394
9.9.5	Dry Chhena Powder	396
9.9.6	Active Packaging for Chhena	396
9.9.7	Chhena Based Sweet Products	396
9.10	Dahi/Curd	400
9.10.1	Production Methods	403
9.10.2	Quality Control of Dahi	404
9.11	Srikhand	406

CHAPTER 10

Dairy by-products

10.1	Skim Milk - its Utilization	412
10.2	Casein-Industrial	413
10.2.1	Manufacture of Casein-Industrial	414
10.2.2	Grain-Curd Casein	417
10.2.3	Rennet Casein-Manufacture	418
10.2.4	Manufacture of Casein from Butter Milk	418
10.2.5	Casein - Defects, Causes and Prevention	419
10.3	Butter Milk-Condensed Butter Milk	422

10.4	Whey	422
10.4.1	Utilization of Whey	423
10.4.2	Small Scale Utilization of Whey	425
10.4.3	Large Scale Utilization of Whey	425
10.4.4	Concentration of Whey	425
10.4.5	Uses of Condensed Whey	426
10.4.6	Storage of Whey Powder	427
10.4.7	Whey Protein Concentrate	428
10.4.8	Manufacture of Whey Protein Concentrate (WPC)	428
10.5	Lactose	429
10.5.1	Grades of Lactose	429
10.5.2	Method of Manufacture	430
10.5.3	Yeild	433
10.5.4	Uses	433
10.6	Lassi	434
10.7	Ghee Residue	435

CHAPTER 11

Milk - Different Varieties/Forms

11.1	Sterilized Milk	438
11.1.1	Definition	438
11.1.2	Manufacturing Details	440
11.1.3	UHT Method of Sterilization	442
11.2	Homogenized Milk	442
11.3	Soft Curd Milk	443
11.4	Flavoured Milks	444
11.4.1	Fruit Flavoured Milks/Drinks	446
11.4.2	Sterilized Flavoured Milks/Drinks	447
11.4.3	Vitaminized/Irradiated Milk	448
11.4.4	Frozen Concentrated Milk	448
11.5	Fermented Milk	449
11.5.1	The Merits of the Fermented Milk are	449
11.6	Natural Butter Milk	449
11.6.1	Cultured Butter Milk	449

11.6.2	Manufacturing Procedure/Preparation	451
11.6.3	Creaming	451
11.7	Acidophilus Milk	451
11.7.1	Procedure	453
11.8	Bulgarian Butter Milk	453
11.9	Kumiss	453
11.10	Kefir	453
11.11	Yoghurt	453
11.11.1	Procedure	455
11.12	Flavoured Yoghurt Preparation	455
11.13	Standardised Milk	455
11.14	Reconstituted/Rehydrated Milk	456
11.14.1	Procedure	457
11.15	Recombined Milk	457
11.15.1	Procedure	458
11.16	Toned Milk	458
11.16.1	Procedure	460
11.16.2	Double Toned Milk	460
11.16.3	Humanized Milk	460
11.17	Miscellaneous Milks	460
11.17.1	Filled Milk	460
11.17.2	Imitation Milk	460
11.17.3	Vegetable Toned Milk	460
11.17.4	Soya Milk	460
11.18	Synthetic Milk	460
11.18.1	Production of Synthetic Milk	461
11.18.2	Carrot Milk	462
11.18.3	Organic Milk	462
11.18.4	Artificial Milk	462
11.18.5	Modified Milk	463
11.18.6	Organic Dairying	463

CHAPTER 12**Quality Control of Milk and Milk Products**

12.1	Quality of Milk	464
------	-----------------------	-----

12.1.1	Raw Milk and its Quality Control	465
12.1.2	Processing/Production - its Quality Control	465
12.2	Finished Product - Quality Control	466
12.2.1	Quality Control Laboratory	466
12.2.2	Sampling - Quality Control	467
12.2.3	Quality Control of Foods and Legislative Criteria	468
12.2.4	International Food Safety Laws and Standard	469
12.3	Food and Agriculture Organisation (FAO)	469
12.3.1	The Codex Alimentarius Commission and the FAO/WHO Food Standards Programme	469
12.4	Hazard Analysis and Critical Control Point (HACCP)	470
12.4.1	Analyse Hazards	472
12.4.2	Identification of Critical Control Points	472
12.4.3	Advantages of HACCP	473
12.5	ISO 9000 Series and Other Standards	473
12.5.1	ISO 9001	474
12.5.2	ISO 9002	474
12.5.3	ISO 9003	474
12.5.4	ISO 9004	474
12.5.5	Differences between ISO 9001, 9002, and 9003	475
12.6	Indian Food Laws and Standards	475
12.6.1	Prevention of Food Adulteration (PFA) Act	475
12.6.2	Food Safety and Standards Authority of India (FSSAI)	476
12.6.3	Export Inspection Council	478
12.7	Bureau of Indian Standards (BIS)	478
12.8	Clean Milk Production	479

CHAPTER 13**Milk Residues**

13.1	Pesticide Residue in Milk and Milk Products	481
13.1.1	Foreign Substances	481

CHAPTER 14**Packaging**

14.1	Importance of Packaging	490
------	-------------------------------	-----

14.1.1	The Main Objectives of the Packaging are	492
14.2	Selection of Packaging Materials	493
14.2.1	Product Range	493
14.2.2	Consumer Needs	494
14.2.3	The shift in the Consumer Perception of Packaging is Noticeable from	494
14.2.4	There are several Attributes that Appeal to the Consumer such as	494
14.3	Packaging Materials	495
14.3.1	Packaging Materials-Range	497
14.3.2	Packaging Techniques	500
14.4	New Concepts of Packaging	502
14.4.1	MAP Technology	502
14.4.2	Advantages and Disadvantages of MAP	502
14.4.3	Gases for MAP	503
14.4.4	Methods of MAP	503
14.4.5	Packaging Material for MAP	504
14.4.6	Typical MAP Machines	504
14.5	Packaging Machines	505
14.6	Disposal of Packages	507

CHAPTER 15**Cleaning and Disinfection**

15.1	Cleaning and Disinfection Processes	511
15.1.1	Check on Cleaning Efficiency	511
15.2	Water for Dairy Industry	514
15.2.1	Coagulation	514
15.2.2	Chlorination	514
15.3	Hardness of Water	515
15.3.1	Temporary Hardness	516
15.3.2	Permanent Hardness	516
15.3.3	Estimation of Hardness	516
15.3.4	Treatment of Hard Water	517
15.4	Removing Temporary Hardness	517
15.4.1	Lime Soda Process	517
15.4.2	Treatment with Ion Exchange Resins	517

15.5	Milk Stone	518
15.6	Methods of Cleaning	519
15.7	Classification of Detergents	519
15.7.1	Sequestering/Chelating Agents	520
15.7.2	Surface Active/Wetting Agents	521
15.8	Properties of Detergent	522
15.8.1	Sanitizers	523
15.8.2	Heat	523
15.8.3	Hot Water	524
15.8.4	Hot Air	524
15.8.5	Irradiation	524
15.8.6	Chemical Sanitisation	524
15.8.7	Chlorine Compounds	524
15.8.8	Iodine Compounds	525
15.9	Quarternary Ammonium Compounds (QAC)	526
15.10	Procedure of Cleaning and Sanitizing	526
15.11	Methods	529
15.11.1	Hand Washing	529
15.11.2	Mechanical washing	530
15.11.3	Cleaning in Place (CIP)	531
	Practical Manual	535
	Index	647
