<i>Preface</i> .....	(v)
<i>Acknowledgements</i> .....	(vii)

### CHAPTER 1

#### **Why Do Lights Go Out ? 1**

1.1 Introduction.....	1
1.2 Present Status of Electricity Supply Industry (ESI).....	2
1.3 Certain Facts that Govern Electricity Supply.....	6
1.4 Causes for Lights Going Out.....	8
1.5 Reliability of Electricity Supply .....	11
1.6 Scope of this Book.....	12

### CHAPTER 2

#### **Basics of Electrical Circuits 13**

2.1 Introduction.....	13
2.2 Circuit Elements and Sources .....	14
2.3 Energy Storage Elements .....	16
2.4 AC Circuits .....	19
2.5 Mathematical Representation of the Rotating Vector...	22
2.6 Power in AC Circuits .....	24
2.7 Three Phase AC Circuits.....	27
2.8 Advantages of Three Phase Supply .....	30
2.9 Application of Circuit Analysis for a Transmission Line.....	31

**CHAPTER 3****Generators, Motors and Transformers 33**

3.1	Introduction.....	33
3.2	Principles of Electric Machines .....	34
3.3	Rotating Electric Machines .....	37
3.4	Transformer .....	48
3.5	Development of Electrical Technology .....	51

**CHAPTER 4****Transmission and  
Distribution of Power 54**

4.1	Introduction.....	54
4.2	AC Transmission .....	55
4.3	Performance of AC Transmission Lines .....	58
4.4	Voltage and Reactive Power Control.....	62
4.5	Overvoltages in Transmission Lines and Line Design .	64
4.6	High Voltage AC Cable Transmission.....	67
4.7	HVDC Transmission .....	68
4.8	Electro-Magnetic Fields (EMF) Associated with Transmission Lines .....	70
4.9	Distribution of Power.....	72

**CHAPTER 5****Power System Operation and  
Basic Controls 73**

5.1	Introduction.....	73
5.2	Control of Generation .....	76
5.3	Effects of Load Characteristics.....	79

---

5.4	Demand Side Management (DSM) and Load Shedding for Frequency Regulation .....	82
5.5	Control of Reactive Power and Voltage .....	83
5.6	Operational Planning .....	85
5.7	Energy Control Centre .....	85

## **CHAPTER 6**

### **System Protection and Collapse 87**

6.1	Introduction.....	87
6.2	High Voltage Circuit Breakers .....	88
6.3	Effects of Lightning Strikes .....	90
6.4	Protection against Transient Overvoltages .....	91
6.5	Protective Relaying.....	92
6.6	System Collapse and Blackouts .....	96
6.7	An Interesting Analogy .....	97

## **CHAPTER 7**

### **Technological Solutions and Smart Grid 100**

7.1	Introduction.....	100
7.2	Protection against System Collapse .....	101
7.3	Flexible AC Transmission System (FACTS).....	103
7.4	Principle of Switching Control.....	105
7.5	Wide Area Measurement System (WAMS) .....	106
7.6	GRID 2030-A National Vision.....	107
7.7	What is a Smart Grid? .....	109
7.8	Microgrids.....	112
7.9	Role of ICT in the Development of Smart Grids .....	113

**CHAPTER 8****Renewable Power and  
Energy Storage 116**

8.1	Introduction.....	116
8.2	Solar Energy .....	117
8.3	Wind Power.....	119
8.4	Hydro Electric Power.....	121
8.5	Wave Energy .....	121
8.6	Ocean Thermal Energy Conversion (OTEC).....	122
8.7	Tidal Power.....	122
8.8	Geothermal Power.....	123
8.9	Energy Storage Systems.....	123

**CHAPTER 9****Restructuring and Competition 134**

9.1	Introduction.....	134
9.2	Reasons for Restructuring and Deregulation of ESI (US Experience).....	135
9.3	Outcomes of Restructuring in U.S.A.....	136
9.4	Indian Experience .....	137
9.5	Availability Based Tariff (ABT) .....	138
9.6	A Comparison of Monopolistic and Competitive Markets.....	139
9.7	Decline in Reliability of Bulk Power Systems.....	141
9.8	Recent Developments.....	142
9.9	Conclusions and a Road Map for the Future .....	144

**APPENDIX A****Fundamental and Secondary Units 147**

- A.1 Fundamental Units ..... 147
- A.2 Secondary Units ..... 148

**APPENDIX B****Electric Shocks and Safety 151**

- B.1 Introduction ..... 151
- B.2 Human Response to Stimulation by  
Power Frequency Currents ..... 152
- B.3 Reaction to Spark Discharges ..... 154
- B.4 Reduction of Shock Hazards ..... 154

**APPENDIX C****Nuclear Energy 156**

- C.1 Elements of Atomic Physics ..... 156
- C.2 Nuclear Reactor ..... 156
- C.3 Recent Developments ..... 161

**APPENDIX D****A Thought Experiment:  
Edison Vs Graham Bell 162****APPENDIX E****Glossary 164****References 169****Index 173**
