

CONTENTS

<i>Preface</i>	(v)
----------------------	-----

Chapter 1A

Solubility

1A.1	Introduction	1
1A.1.1	Definition of Terms.....	1
1A.1.2	Methods of Expressing Solubility.....	1
1A.2	Solute-Solvent Interactions	2
1A.2.1	Polar Solvents	2
1A.2.2	Non Polar Solvents	3
1A.2.3	Semi Polar Solvents	3
1A.3	Ideal and Real Solutions	3
1A.4	Solubility of Gases In Liquids	6
1A.4.1	Factors Affecting Solubility of Gases in Liquids.....	6
1A.5	Solubility of Liquids in Liquids	7
1A.5.1	Factors Affecting Solubility of Liquids in Liquids.....	8
1A.6	Solubility of Solids in Liquids.....	11
1A.6.1	Solubility of Solids in Liquids Determination	11
1A.6.2	Factors Affecting Solubility of Solids in Liquids	13
1A.7	Solubility of Strong Electrolytes	16
1A.8	Solubility of Slightly Soluble Electrolytes	17
1A.9	Solubility of Weak Electrolytes.....	18

Chapter 1B

Distribution Phenomena

1B.1	Introduction	20
1B.2	Partition Coefficient	20
1B.2.1	Effect of Partition of Ionic Dissociation and Molecular Association	21
1B.2.2	Extraction.....	24
1B.3	Solubility and Partition Coefficients	25
1B.3.1	Preservative Action of Weak Acids in Oil-Water Systems.....	25
1B.4	Drug Action and Partition Coefficients	27

Chapter 1C

Fick's Laws of Diffusion

1C.1	Introduction	28
1C.1.1	Drug Absorption and Elimination.....	28
1C.1.2	Drug Release.....	29
1C.1.3	Osmosis.....	29
1C.1.4	Ultra Filtration and Dialysis.....	29
1C.2	Steady-State Diffusion.....	29
1C.2.1	Thermodynamic Basis	29
1C.3	Fick's Laws of Diffusion.....	31
1C.3.1	Fick's First Law	31
1C.3.2	Fick's Second Law.....	31

Chapter 2

Complexation

2.1	Definition.....	34
2.1.1	Classification of Complexes	34
2.2	Metal Ion Complexes	35
2.2.1	Inorganic Complexes	35
2.2.2	Chelates.....	36
2.2.3	Olefin and Aromatic Type	37
2.3	Organic Molecular Complexes.....	37
2.3.1	Donor-Acceptor Type	37
2.3.2	Charge Transfer Complexes.....	38
2.3.3	Drug and Caffeine Complexes.....	38
2.3.4	Polymer Complexes	39
2.3.5	Picric Acid Complexes	39
2.3.6	Quinhydrone Complexes.....	40
2.4	Inclusion Complexes	40
2.4.1	Channel Lattice Type.....	40
2.4.2	Layer Types	41
2.4.3	Clathrates	41
2.4.4	Monomolecular Inclusion Complexes	42

2.5	Method of Analysis	43
2.6	Applications of Complexation.....	45
2.6.1	Partition Coefficients	46

Chapter 3

Chemical Kinetics

3.1	Chemical Kinetics	48
3.1.1	Rates and Orders of Reactions.....	48
3.1.2	Molecularity.....	49
3.1.3	Specific Rate Constants	50
3.1.4	Units of Basic Rate Constant	50
3.2	Zero Order Reactions	51
3.2.1	Half Life.....	51
3.2.2	Shelf Life	52
3.2.3	Suspensions, Apparent Zero-Order Kinetics.....	52
3.3	First Order Reaction	53
3.3.1	Half Life.....	54
3.4	Second Order Reactions	54
3.5	Determination of Order	56
3.5.1	Substitution Method.....	56
3.5.2	Graphic Method	56
3.5.3	Half-Life Method	56
3.6	Complex Reactions.....	57
3.6.1	Reversible Reactions.....	57
3.6.2	Parallel or Side Reactions	58
3.6.3	Series or Consecutive Reactions	60
3.7	The Steady State Approximation.....	61
3.7.1	Michaelis – Menten Equation	61
3.8	Influence of Temperature and other Factors on Reaction Rates.....	63
3.8.1	Temperature	63
3.8.2	Classic Collision Theory of Reaction Rates.....	63
3.8.3	Transition State Theory.....	65
3.8.4	Effect of the Solvent	65
3.8.5	Influence of Dielectric Constant	65
3.8.6	Catalysis.....	65

3.9	Pseudo First Order Reaction.....	66
3.10	Decomposition and Stabilization of Medicinal Agents.....	67
3.10.1	Influence of Light in Photodegradation	69
3.11	Accelerated Stability Studies.....	70

Chapter 4

Interfacial Phenomena

4.1	Adsorption at Solid Interfaces	74
4.1.1	Adsorption.....	74
4.1.2	Solid-Gas Interface	74
4.1.3	Applications of Isotherms	80
4.1.4	The Solid-Liquid Interface.....	80
4.1.5	Electric Properties of Interfaces	81
4.1.6	The Electric Double Layer.....	81
4.1.7	Nernst and Zeta Potentials	82
4.1.8	Wetting Agent.....	83
4.1.9	Contact Angle	83
4.1.10	Applications of Surfactants.....	85
4.1.11	Rat-gat Perfusion Technique.....	86

Chapter 5

Colloids and Macromolecular Systems

5.1	Introduction	87
5.1.1	Definition	87
5.2	Classification of Colloids	88
5.2.1	Lyophilic Colloids	89
5.2.2	Lyophobic Colloids.....	89
5.3	Dispersion Methods.....	89
5.4	Purification of Colloids	90
5.4.1	Dialysis	90
5.4.2	Electro Dialysis.....	90
5.4.3	Ultrafiltration	90
5.4.3	Association Colloids	91

5.5	Properties of Colloids	93
5.5.1	Optical Properties.....	93
5.5.2	Kinetic Properties of Colloids.....	96
5.5.3	Electrical Properties	102
5.6	Solubilisation.....	105
5.6.1	Factors Affecting Solubilization	106

Chapter 6

Micromeritics

6.1	Introduction	108
6.1.1	Significance of Particle size in various Dosage Forms	108
6.1.2	Significance of Particle Surface Area	108
6.1.3	Particle and Size Distribution	109
6.1.4	Particle-Size Distribution.....	110
6.1.5	Number and Weight Distribution.....	110
6.2	Methods for Determining Particle Size	112
6.2.1	Optical Microscopy.....	112
6.2.2	Sieving	113
6.2.3	Sedimentation Method	113
6.2.4	Particle Volume Measurement.....	115
6.3	Particle Shape and Surface Area	116
6.3.1	Particle Shape.....	116
6.3.2	Methods for Determining Surface Area.....	117
6.4	Derived Properties of Powders.....	118
6.4.1	Porosity	118
6.4.2	Packing Arrangements	119
6.4.3	Bulkiness.....	120
6.4.4	Angle of Repose.....	120

Chapter 7

Rheology

7.1	Introduction	121
7.1.1	Importance	121
7.1.2	Classification.....	122

7.2	Newtonian System/Fluids.....	122
7.2.1	Newton's Law of Flow	122
7.2.2	Temperature Dependence and Theory of Viscosity.....	125
7.3	Non-Newtonian Systems	126
7.3.1	Plastic Flow.....	126
7.3.2	Pseudo Plastic Flow	127
7.3.3	Dilatant Flow – Shear Thickening Systems.....	128
7.4	Thixotropy.....	129
7.4.1	Measurement of Thixotropy.....	130
7.4.2	Bulges and Spurs.....	132
7.4.3	Negative Thixotropy/Anti Thixotropy	132
7.5	Determination of Rheological Properties	135
7.5.1	Choice of Viscometer.....	135
7.5.2	Types of Rheological Instruments	135
7.5.3	Principle Methods for Measuring Viscosity	136
7.5.4	Capillary Viscometer/Ostwald's Viscometer.....	136
7.5.5	Falling Sphere Viscometer.....	139
7.5.6	Rotational Viscometers.....	140
7.5.7	Cop and Bob Viscometer	140
7.5.8	Cone and Plate Viscometer.....	143
7.5.9	Visco Elastic Materials	146
7.5.10	Pharmaceutical Areas in which Rheology is significant.....	146
7.6	Rheology of Suspensions	147
7.6.1	Deflocculated Particles in Newtonian Vehicles.....	148
7.6.2	Deflocculated Particles in Non-Newtonian Particles.....	148
7.6.3	Flocculated Particles in Newtonian Vehicles.....	148
7.6.4	Flocculated Particles in Non-Newtonian Vehicles	148
7.7	Rheology of Emulsions	148

Chapter 8

Dispersed Systems

8.1	Suspensions	152
8.2	Interfacial Properties of Suspended Particles	152

8.3	Theory of Sedimentation	154
8.3.1	Effect of Brownian Movement	155
8.3.2	Sedimentation Parameters	155
8.3.3	Sedimentation behaviour of Flocculated and Deflocculated Suspensions	157
8.4	Formulation of Suspension	159
8.4.1	Wetting Agents	159
8.4.2	Deflocculants and Dispersing Agents	160
8.4.3	Flocculating Agents	160
8.4.4	Thickness, Protective Colloids and Suspending Agents	160
8.5	Emulsions	161
8.5.1	Definition of Emulsions	161
8.6	Types of Emulsions	161
8.6.1	O/W Emulsions	162
8.6.2	W/O Emulsions	162
8.6.3	Multiple Emulsions	163
8.6.4	Micro Emulsions	163
8.7	Identification of Emulsions	163
8.8	Formulation of Emulsions	164
8.8.1	Raw Materials	165
8.8.2	Emulsifying Agents	165
8.8.3	Buffers	171
8.8.4	Density Modifiers	171
8.8.4	Humectants	172
8.8.5	Antioxidants	172
8.8.6	Preservatives	172
8.8.7	Flavours, Colours and Sweetening Agents	173
8.9	Physical Insolubility of Emulsions	173
8.9.1	Creaming	174
8.9.2	Flocculation	174
8.9.3	Coalescence	175
8.9.4	Breaking	175
8.9.5	Phase Inversion	176

8.10	Stress Conditions for Evaluating Stability of Emulsions	176
8.10.1	Aging and Temperature	176
8.10.2	Centrifugation	177
8.10.3	Agitation	177
8.10.4	Phase Separation	178
8.10.5	Electrophoretic Parameters/Properties	178
8.11	Evaluation and Testing for Emulsions.....	178
8.11.1	Methods of Assessing Stability	178
8.12	Theories of Emulsification	179
8.12.1	Droplet Stabilisation	180
8.13	Chemical Instability of Emulsions	183
8.14	Release of Drugs from Emulsion Formulations	184
