CHAPTER 1

Perspectives on the Interactions between Climate Change Parameters and their Agricultural Significance: An Overview

1.1	Introduction.....	1
1.2	The Climate System and the Interactions between its Components	2
1.2.1	The Atmosphere	3
1.2.2	The Oceans	4
1.2.3	The Cryosphere	5
1.2.4	The Land Surface.....	5
1.2.5	The Biomass	6
1.3	Continental Drift, Ocean Circulation and Climate Change	6
1.4	Complexity of Climate Variables and their Relationships.....	7
1.5	The Physical Basis of Climate	9
1.5.1	Modeling Climate Change	10
1.6	Feedback of Climate Change.....	11
1.7	Global Warming.....	12
1.8	The Impact of Climate Change on Ecosystem	13
1.8.1	Ocean Carbon Process	15
1.9	Agricultural Greenhouse Gases.....	16
1.10	Volcanic Aerosols	17
1.11	Direct and Indirect Effects of Climate Change on Agriculture.....	18

(xiv) Contents

1.12	Effects of the Greenhouse Gases on Plant Physiological Process	20
1.12.1	The CO ₂ Fertilization Effect	20
1.12.2	The CO ₂ Anti-transpirant Effect.....	21
1.12.3	Ultraviolet Radiation and Ecosystem.....	21
1.12.4	Effect of Tropospheric Ozone on Plants.....	22
1.12.5	Combined Effects of CO ₂ , UV-B and/or O ₃ on Plants	22
1.13	Effects of Higher Temperature	23
1.14	Climate Change Impact on Agriculture and Food Security.....	24
1.15	Climate Change Impact on Soil and Water Resources	26
1.16	Climate Change Impact on Fisheries and Aquaculture ..	27
1.17	Interaction between Agricultural and Non-agricultural Ecosystems.....	27
1.18	Vulnerability and Adaptation to Climate Change.....	28
1.19	Conclusions	29
	References	30

CHAPTER 2

Impact of Climate Change on the Global Hydrological Cycle: Implications for Water Resources and Agriculture

2.1	Introduction.....	33
2.2	Techniques for Evaluation of the Impacts of Global Warming on Hydrological Cycle.....	34
2.2.1	General Circulation Models.....	35
2.2.2	Hydrological Models	36
2.3	The Oceans and the Hydrological Cycle	37
2.4	Emissions and Sinks of Gases Affected by Hydrological Processes	38

2.5	Impacts on the Hydrological Cycle.....	39
2.6	Effects of Climate Change on the Components of Water Balance.....	43
2.6.1	Precipitation.....	44
2.6.2	Evaporation.....	46
2.6.3	Actual Evapotranspiration.....	48
2.6.4	Soil Moisture.....	49
2.6.5	Groundwater Recharge and Resources.....	50
2.7	Effects of Climate Change on River Flows.....	52
2.8	Effects of Changing Climate on Lakes.....	55
2.9	Influence of Changing Climate on Flood Frequency.....	59
2.10	Changes in Hydrological Drought Frequency.....	60
2.11	Changes in Snow and Land Ice.....	61
2.11.1	Snow Cover, Permafrost and Lake and River Ice.....	62
2.11.2	Large Polar Ice Sheets.....	64
2.12	Changes in Glaciers and Small Ice Caps.....	65
2.13	Changes in Quality and Quantity of Water.....	68
2.14	Hydrological Cycle and Soil Climate.....	70
2.15	Hydrological Cycle and Agricultural Regime Shifts.....	71
2.16	Climate Change Impact on Agriculture through Hydrological Changes and Prospects for Adaptation.....	73
2.17	Forest and the Global Hydrological Cycle.....	74
2.18	Sea-level Rise due to Global Warming.....	75
2.19	Conclusions.....	76
	<i>References</i>	77

CHAPTER 3

Soil Carbon Cycle and Impact of Climate Change on Soil Conditions: Implications for Plant Growth and Food Production

3.1	Introduction.....	88
-----	-------------------	----

3.2	Soil Organic Carbon and its Beneficial Role	90
3.3	Changes in Agricultural Soil Carbon Stock	93
3.4	Factors Strengthening Soil Organic Carbon Levels	95
3.5	Interaction of Soil Carbon Cycle with Water and Nutrient Cycles and Soil Biota	98
3.6	Building and Sequestration of SOC.....	99
3.6.1	Plant Type and Composition for Sequestration of SOC.....	99
3.6.2	Role of Mycorrhizal Fungi in Building SOC.....	101
3.6.3	Improvement of SOC by Increasing the Surface Clay Content of Sandy Soils.....	101
3.6.4	Biochar	102
3.7	Building Soil Carbon in Cropping System.....	103
3.7.1	Pasture Cropping	104
3.8	Application of Fertilizer.....	105
3.9	Soil Microorganisms and Climate Change.....	106
3.10	Microbial Contributions to Greenhouse Gas Emissions.....	106
3.11	Agronomic-Ecological Interactions with Increasing Levels of Greenhouse Gases.....	108
3.12	Effects of Higher CO ₂ on Soil Fertility and Productivity	110
3.13	Effects of Rainfall and Temperature Changes on Soils in Different Climates	114
3.13.1	Effects on Humid Regions	114
3.13.2	Effects on Sub-humid and Semi-arid Regions...	115
3.13.3	Effects on Drylands.....	116
3.13.4	Effects on Temperate Climates.....	117
3.13.5	Effects on Boreal Regions	118
3.14	Effect of Climate Change on Snow and Soil Temperature in High Latitude.....	119
3.15	Climate Change Impacts on Soil Dynamics and Processes: Implications for Agriculture	121

3.15.1	Impact on Soil Water Content	124
3.15.2	Impact on Soil Temperature	125
3.15.3	Impact on Soil Workability	126
3.15.4	Impact on Soil Structure	126
3.15.5	Impact on Soil Degradation	127
3.15.6	Impact on Soil Organic Matter	130
3.15.7	Impact on Soil Nutrient Status	131
3.15.8	Impact on Soil Ecology	132
3.15.9	Impact on Mineral Transformations and Clay Surface Processes	133
3.16	Soil Respiration and Global Carbon Cycle.....	135
3.17	Resilience against Soil Degradation	135
3.18	Soil Reaction (pH).....	137
3.19	Adaptation to Climate Change	140
3.20	Soil Carbon and Sustainability of Agricultural System.....	142
3.21	Carbon Trading.....	142
3.22	Effects of Sea Level Rise on Soils in Coastal Wetlands and Associated Agricultural Implications.....	143
3.23	Conclusions	145
	<i>References</i>	146

CHAPTER 4

Global Climate Change Impact on Agricultural and Livestock Production and Adaptation Strategies for Mitigation

4.1	Introduction.....	159
4.2	Effect of Environmental Factors in Association with CO ₂ on Plant Growth Processes	160
4.3	CO ₂ Effects on Plant Growth Process	161
4.3.1	Response at the Level of Stomata.....	162
4.3.2	Effects at the Level of the Leaf.....	164

(xviii) *Contents*

4.3.3	Effects at the Plant and Canopy Level.....	165
4.3.4	Effects on Plant Individual Scale.....	166
4.3.5	Effects on Ecosystem Level of Increasing CO ₂ ..	168
4.3.6	Plant Water-use Efficiency	169
4.4	Photosynthesis and High Temperature.....	170
4.5	Effects of Interaction between Elevated CO ₂ and Atmospheric Pollutants on Agriculture	171
4.6	Effects on Soil Fertility and Agricultural Practices	171
4.7	Human Response to Climate Change	172
4.8	Response of the Plants to Global Warming – CO ₂ Fertilization Effect.....	173
4.9	Impact of Climatic Change on Agricultural Production	175
4.9.1	Regional Crop Responses.....	177
4.10	Crop Growth Simulation Model for Climate Change Impact Assessment	179
4.10.1	Climate Change Impact on Crop Development and Yield.....	180
4.11	Agricultural Biodiversity and Climate Change.....	184
4.11.1	Impact of Climate Change on the Biodiversity of Crops and Livestock	185
4.12	Mountain Agriculture and Climate Change.....	186
4.13	Vulnerability to Climate Change and its Assessment ...	188
4.14	Extent of Adaptability of Agricultural System to Climate Change	189
4.15	Adaptation of Agriculture to Climate Change	190
4.15.1	Cropland Management.....	191
4.15.2	Soil and Water Management	193
4.15.3	Soil and Land Management.....	193
4.15.4	Management of Livestock or Grazing Land	194
4.15.5	Restoring Degraded Lands	194
4.16	Some Possible Adaptation Strategies.....	194

4.17	Technological Potential to Adapt	196
4.18	Livestock Sector under Changing Climate.....	198
4.19	Adaptations and Adjustments for Livestock under Changing Climate	201
4.20	Concluding Remarks.....	202
	<i>References</i>	203

CHAPTER 5

Greenhouse Gas Emissions and Mitigation Measures in Agro-Ecosystems

5.1	Introduction.....	211
5.2	Response of Agriculture to Food Demand and Emission of Greenhouse Gases	212
5.3	Physical and Biogeochemical Feedbacks.....	213
5.4	Agricultural Sources and Sinks of Greenhouse Gases.....	214
	5.4.1 Sources and Sinks of Carbon Dioxide	217
	5.4.2 Sources and Sinks of Methane.....	218
	5.4.3 Sources and Sinks of Nitrous Oxide	219
5.5	Mitigation of Agricultural Emissions of Greenhouse Gases.....	220
5.6	Reduction of Carbon Dioxide Emission	224
	5.6.1 Changes in Terrestrial Carbon Stocks by Land Clearing for Agriculture	225
	5.6.2 Reversion of Agricultural Land in Temperate Regions.....	234
	5.6.3 Management of Agriculture in the Tropics	237
	5.6.4 Carbon Sequestration in Biomass Products.....	239
	5.6.5 Reduction in Fossil Fuel Consumption by Agriculture	239
	5.6.6 Biofuels as an Alternative for Mitigation of Greenhouse Gas Emission.....	242

5.7	Reduction of Methane Emission.....	244
5.7.1	Reduction of Emissions from Ruminant Animals.....	245
5.7.2	Reduction of Emissions from Animal Waste.....	246
5.7.3	Reduction of Emissions from Flooded Rice.....	247
5.7.4	Reduction of Emissions from Biomass Burning	247
5.7.5	Decrease in Methane Oxidation in Soils	248
5.8	Reduction of Nitrous Oxide Emissions	249
5.8.1	Mitigation of Nitrous Oxide from Soils.....	249
5.8.2	Release due to Biomass Burning	251
5.8.3	Conversion of Tropical Forest	251
5.9	Conclusions	251
	<i>References</i>	252

CHAPTER 6

Land Degradation, Range Degradation and Desertification under Changing Climate

6.1	Introduction.....	262
6.2	Land Degradation.....	264
6.3	Causes and Processes of Land Degradation	265
6.4	Climate Change and Land Degradation.....	267
6.5	Land Degradation and Food Security under Changing Climate	271
6.6	Soil Erosion: Causes and Processes	272
6.6.1	Erosion by Water	273
6.6.2	Erosion by Wind.....	274
6.6.3	Mass Movement and Subterranean Erosion.....	277
6.6.4	Other Forms of Soil Degradation	277
6.7	Impact of Climate Change on Soil Erosion and Adaptive Strategies for Mitigation.....	279

6.8	Desertification	280
6.9	Nature and Causes of Desertification	281
6.10	Climate Change and Desertification	282
6.11	Drought, Land Degradation and Desertification: Implications for Ecosystems and Vegetation.....	284
6.11.1	Impact on Soils and Vegetation.....	285
6.12	Desertification and Livelihood Security of Rural Communities	286
6.13	Adaptation Strategies for Mitigating the Impacts of Climate Change on Land Degradation and Desertification	287
6.13.1	Soil and Water Conservation.....	290
6.13.2	Conservation Agriculture	291
6.13.3	Agroforestry	292
6.13.4	Afforestation	294
6.13.5	Best Management Practices.....	294
6.13.6	Conservation and Biodiversity	295
6.14	Importance of Land-Use Change for GHGs Fluxes	295
6.15	Biofuel and Land Degradation	297
6.16	Rangeland Degradation.....	298
6.17	Causes of Rangeland Degradation.....	299
6.18	Agricultural Resources in Rangelands	299
6.19	Human Adaptation for Rangeland Agriculture to Combat Degradation.....	300
6.20	Mitigation Strategies in Rangeland Agriculture to Combat Range Degradation.....	301
6.21	Conclusions	304
	<i>References</i>	305

CHAPTER 7

Impact of Climate Change on Fisheries and Aquaculture and Adaptation Strategies

7.1	Introduction.....	312
7.2	Present Fisheries Production, Trends, Threats and Variations in Stock Size.....	313
7.3	Marine Fisheries.....	316
7.4	Inland Fisheries and Inland Aquaculture	317
	7.4.1 Inland Fisheries	317
	7.4.2 Inland Aquaculture.....	317
7.5	Influence of Climate on Biological Production in the Sea	319
7.6	Fluctuation in Diversity and Abundance of Marine Fish.....	321
7.7	Fish Productivity and Upwelling	322
7.8	Impact of El Nino on Fish Productivity.....	323
7.9	Impact of Climate Change on Fisheries and Aquaculture	324
	7.9.1 Effects on Marine Ecosystems and Marine Fish.....	326
	7.9.2 Effects on Fish Recruitment	329
	7.9.3 Effects on different Aquatic Ecosystems.....	329
	7.9.4 Effects on Distribution and Productivity of Fish.....	330
	7.9.5 Shift/Extension in Latitudinal Distribution and Abundance.....	333
	7.9.6 Shift in Spawning	334
	7.9.7 Effects on Freshwater Ecosystem: Implications for Aquaculture	335
	7.9.8 Effects on Physiological Functions of Fresh Water Fish.....	338
	7.9.9 Climate Change and Fishes in Streams and River (Lotic System)	342

7.9.10	Climate Change and Fishes in Ponds, Lakes and Swamps (Lentic System)	343
7.10	Impact of Sea Level Rise on Coastal Fisheries	345
7.11	Impact of Extreme Events on Fisheries and Aquaculture	346
7.12	Livelihood Security of the Fishing Communities.....	347
7.13	Carbon Footprint of Fisheries	347
7.14	Fisheries Biodiversity and Climate Change	348
7.15	Vulnerability of Coral Reef.....	349
7.16	Future Fish Production	350
7.17	Identification of Fishing Zone by Remote Sensing Technique	351
7.18	Adaptation Options for Mitigation of Climate Change Effects on Fisheries and Aquaculture	352
7.18.1	Fisheries Sector	354
7.18.2	Aquaculture Sector.....	356
7.18.3	Other Adaptive Measures for Fisheries and Aquaculture	357
7.19	Conclusions	359
	<i>References</i>	361

CHAPTER 8

Climate Change Impact on Forests and Adaptation Strategies

8.1	Introduction.....	372
8.2	Geographical Shift of Vegetation under Changing Climate	373
8.3	Forest-Climate Interaction and Feedbacks.....	376
8.4	Sensitivity of Forest Ecosystem to Changes in Climate Variables	378
8.5	Impact of Climate Change on Forests.....	381
8.5.1	Increased CO ₂ Effects on Forests.....	383

8.5.2	Impact of Climate and Land-use Changes on Tropical Forests.....	384
8.5.3	Impact of Climate Change on Temperate Forests	387
8.5.4	Impact of Climate Change on Boreal Forest.....	388
8.5.5	Impact on Forest Goods and Services	389
8.5.6	Social and Economic Impacts	389
8.6	Pressure from Air Pollution and Air Quality	390
8.7	Deforestation and CO ₂ Emission.....	390
8.8	Afforestation/Reforestation and Carbon Sequestration.....	391
8.9	Extreme Climates and Forest Disturbances	394
8.9.1	Fire	395
8.9.2	Drought.....	397
8.9.3	Insect and Pathogen Outbreaks.....	398
8.9.4	Invasive Species	400
8.9.5	Tropical Cyclones	401
8.9.6	Windstorms	402
8.9.7	Ice Storms.....	403
8.9.8	Landslides.....	404
8.10	Forest Biodiversity and Climate Change.....	405
8.11	Forest Biodiversity and Land Degradation under Changing Climate	407
8.12	Impact on Food Security	408
8.13	Carbon Mitigation Options by Forest Management.....	409
8.13.1	Integrated Approach to Safeguard Forests	410
8.14	Adaptation Measures	411
8.14.1	Adaptation to Gradual Change	412
8.14.2	Adaptation and Coping Options.....	414
8.15	Conclusions	416
	<i>References</i>	417

CHAPTER 9

Climate Change, Food and Agriculture System, and Global Food Security

9.1 Introduction..... 427

9.2 Trends of Agriculture, Population Growth and Food Consumption 428

9.3 Effects of Elevated CO₂ on Plant Physiology 431

 9.3.1 Differential Responses among Types of Plant Species to Elevated CO₂ 433

9.4 Effects of Elevated CO₂ on Global Food Security..... 434

 9.4.1 Uncertainties in the Effects of Enriched CO₂ on Food Production 435

9.5 Impact of Extreme Weather Events on Food Security..... 437

9.6 Climate Change and Food Systems: the GECAFS Approach 439

9.7 Climate Change Impact on Agro-Ecological Conditions and Vulnerability of Food Security..... 440

9.8 Climate Change Impact on Agriculture and Food Security 442

 9.8.1 Impact on Food-Insecure Households in Developing Countries 444

 9.8.2 Impact on Forest Ecosystem and Land-use in Relation to Food Security 446

 9.8.3 Impact on Fisheries and Food Security 447

 9.8.4 Effect of Climate Change on Livestock and Food Security..... 452

9.9 Impact on Water Resources and Food Security..... 452

9.10 Adversity of Crop Pest and Diseases and Food Security..... 454

9.11 Environment Induced Socio-economic Vulnerability and Food Security..... 455

9.12 Agricultural Biodiversity and Food Security..... 456

9.13	Biofuel Production and Food Security.....	459
9.14	Climate Change Models for Use in Impact Studies	461
9.14.1	Uncertainty and Threshold Effects in Climate Change Impact Studies	462
9.14.2	Development of Crop Models	463
9.15	Impact of Climate Change on Risk of Hunger	467
9.15.1	Global Hunger Index (GHI).....	468
9.16	Integrated Adaptation and Mitigation Strategies	469
9.17	Capacity Building	471
9.18	Conclusions and Future Needs.....	472
	<i>References</i>	473

CHAPTER 10

Climate Change, Climate Variability and Climate Extremes: Agrometeorological Impact of Extreme Weather Events

10.1	Introduction.....	484
10.2	Understanding of Climate Change, Climate Variability and Climate Extremes.....	485
10.2.1	External Causes	486
10.2.2	Internal Causes	486
10.3	Changes in Weather and Climate Extremes	492
10.3.1	Temperature.....	495
10.3.2	Precipitation.....	496
10.3.3	Wind.....	497
10.4	Phenomena Related to Changes in Weather and Climate Extremes	497
10.4.1	Monsoons	497
10.4.2	Tropical Cyclones.....	499
10.5	Impact on the Natural Physical Environment	501

10.5.1	Droughts.....	501
10.5.2	Floods.....	502
10.5.3	Sea Waves.....	505
10.5.4	Glacial Geomorphology	506
10.5.5	Changes in Permafrost Temperature in Arctic and Sub-arctic Regions.....	508
10.5.6	Sand and Dust Storms	510
10.6	Socio-economic Impact of Changes in Weather and Climate Extremes	511
10.7	Agrometeorological Impact of Extreme Weather Events and Mitigation Strategies.....	513
10.7.1	Tropical Cyclones, Storm Surges and Strong Winds.....	515
10.7.2	Drought.....	516
10.7.3	Flooding and Heavy Rainfall.....	519
10.7.4	Extreme Temperature including Heat Waves...	521
10.7.5	Extreme Cold Weather including Frost Injury	522
10.7.6	Sand Storm/Dust Storm.....	523
10.7.7	Forest Fires	524
10.8	Implications and Future Needs	525
	<i>References</i>	526

CHAPTER 11

Livelihood Strategies of Farmers and Fishers under Changing Climate

11.1	Introduction.....	537
11.2	Food Security Concerning Small-scale Farmers and Fishers	539
11.2.1	Smallholder and Subsistence Farmers including Forest Dwellers	539
11.2.2	Vulnerabilities of Fishers.....	540

(xxviii) *Contents*

11.3	Seasonal Forecasting	544
11.4	Water Harvesting.....	547
11.5	Farmers Adapting to Climate Change.....	549
11.5.1	Adaptation Options to Climate Variability and Extremes.....	553
11.5.2	Adaptation Measures by Farmers in Mitigating Greenhouse Gas	554
11.5.3	Livestock Adaptation.....	555
11.5.4	Examples of Farmers Adapting to Climate Risk	557
11.5.5	Plantation based Cropping Systems	559
11.6	Extreme Weather Events and Livelihood Concern	560
11.7	Building Resilience and Improved Livelihoods	562
11.8	Vulnerability of Subsistence Farmers, Pastoralists and Fisherfolk.....	564
11.9	Impact of Climate Change on the Livelihood of Fishers	566
11.10	Livelihood Diversification for Small-scale Farmers and Fishers.....	571
11.10.1	Aqua-forestry	573
11.10.2	Apiculture with Trees	573
11.10.3	An Example to Improve the Livelihoods of the Pastoral Community: an ICARDA Project	573
11.10.4	Improvement of Rural Livelihoods	574
11.11	Conclusions and Ways Forward.....	577
	<i>References</i>	578

	<i>Subject Index</i>	589
--	----------------------------	-----
