<i>Preface</i>	(v)
<i>Acknowledgement</i>	(vii)

Introduction.....1

Chapter – 1

Acids and Bases21

Experiment 1.1

To Prepare 1M HCl and Standardize it and Perform Assay of Sodium Hydrogen Carbonate.....	23
---	----

Experiment 1.2

To Prepare and Standardize 0.1 M NaOH and Perform the Assay of Boric Acid.....	26
---	----

Experiment 1.3

To Prepare and Standardize 0.1 M NaOH and Perform Assay of Ammonium Chloride	29
---	----

Experiment 1.4

To Prepare and Standardize 0.5 M H ₂ SO ₄ and Perform Assay of Sodium Carbonate.....	32
---	----

Experiment 1.5

To Determine Percentage Purity of Zinc Oxide.....	34
---	----

Experiment 1.6

To Determine Percentage Purity of Sodium Phosphate	37
--	----

Experiment 1.7

To Determine Percentage Purity of Sodium Benzoate.....	39
--	----

(x) *Contents*

Experiment 1.8

Determination of Percent Purity of Sodium Potassium Tartrate 41

Experiment 1.9

To Determine Aspirin Content in Tablet Formulation..... 43

Chapter – 2

Oxidation Reduction Titrations.....45

Experiment 2.1

To Prepare and Standardize 0.1N Potassium Permanganate Solution..... 47

Experiment 2.2

To Prepare and Standardize 0.1M Potassium Permanganate and Perform Assay of Hydrogen Peroxide 49

Experiment 2.3

To Determine Percentage Purity of Sodium Nitrite using Potassium Permanganate..... 52

Experiment 2.4

To Prepare and Standardize 0.05N Ceric Ammonium Sulphate..... 54

Experiment 2.5

To Perform Assay of Ferrous Sulphate using Ceric Ammonium Sulphate 56

Experiment 2.6

To Perform Assay of Ferrous Fumarate using Ceric Ammonium Sulphate 59

Experiment 2.7

To Prepare and Standardize 0.1N Iodine Solution..... 62

Experiment 2.8

To Prepare and Standardize 0.1N Sodium Thiosulphate and Perform Assay of Copper Sulphate..... 64

Experiment 2.9

Determination of Ascorbic Acid using Potassium Iodate 67

Experiment 2.10

To Prepare and Standardize 0.1N Potassium Dichromate 70

Chapter – 3

Precipitation Titration.....72

Experiment 3.1

To Prepare and Standardize Silver Nitrate..... 76

Experiment 3.2

To Prepare and Standardize Ammonium Thiocyanate by
Volhard's Method 78

Experiment 3.3

To Determine Sodium Chloride by Mohr's Method..... 80

Experiment 3.4

To Determine Chloride Ions by Fajan's Method 82

Chapter – 4

Gravimetric Analysis84

Experiment 4.1

To Study Sintered Glass Crucible..... 86

Experiment 4.2

To Determine Water of Hydration in Crystalline
Barium Chloride..... 87

Experiment 4.3

To Determine Water of Crystallization in Copper Sulphate 89

Experiment 4.4

To Determine Percentage of Chloride in Potassium Chloride 90

Chapter – 5

Non-aqueous Titration.....92

Experiment 5.1

To Prepare and Standardize 0.1M Perchloric Acid..... 96

Experiment 5.2

To Perform Assay of Metronidazole Benzoate Tablets I.P..... 98

Experiment 5.3

Determination of Percentage Purity of Diclofenac Sodium..... 101

Experiment 5.4

Determination of Percentage Purity of Methyldopa 104

Experiment 5.5

Determination of Percentage Purity of Ephedrine Hydrochloride ... 107

Experiment 5.6

Determination of Percentage Purity of Chlorpromazine 110

Experiment 5.7

To Prepare and Standardize 0.1M Sodium Methoxide Solution..... 113

Experiment 5.8

To Determine Percentage of Phenobarbitone..... 115

Experiment 5.9

To Determine the Percentage Purity of Ethosuximide..... 117

Chapter – 6

Complexometric Titrations.....119

Experiment 6.1

To Prepare and Standardize 0.05M Disodium EDTA..... 121

Experiment 6.2

To Perform Assay of Magnesium Sulphate I.P..... 123

Experiment 6.3

To Perform Assay of Calcium Chloride..... 126

Experiment 6.4

Determine Percentage Purity of Zinc Sulphate 129

Experiment 6.5

To Determine Percentage Purity of Calcium Gluconate 132

Experiment 6.6

To Determine Percentage Purity of Potassium
Aluminium Sulphate 135

Experiment 6.7

To Determine Percentage Purity of Sodium Chloride 138

Experiment 6.8

To Determine Percentage Purity of Ammonium Chloride..... 140

Chapter – 7

Kjeldahl Titration 143

Experiment 7.1

To Determine Nitrogen Content in a given Sample 145

Chapter – 8

Karl-Fischer Titration 148

Experiment 8.1

To Determine Moisture Content of Amoxicillin Trihydrate..... 150

Experiment 8.2

To Determine Moisture Content of Prednisolone
Sodium Phosphate 151

Chapter – 9

Diazotization Titration153

Experiment 9.1

To Determine Sulphamethoxazole Content in
Co-Trimoxazole Tablets..... 155

Experiment 9.2

To Determine Dapsone Content in Tablet Formulation..... 158

Chapter – 10

Conductometric Titrations.....161

Experiment 10.1

To Perform Conductometric Titration of Hydrochloric
Acid with Sodium Hydroxide 162

Experiment 10.2

To Perform Conductometric Titration of Acetic acid with
Sodium Hydroxide 165

Chapter – 11

Flame Photometry.....168

Experiment 11.1

Determination of Sodium and Potassium Ion
Concentrations in Solution..... 172

Chapter – 12

Polarimetry176

Experiment 12.1

To Determine Sugar by Polarimetric Method 178

Experiment 12.2

To Determine Levodopa by Polarimetric Method 180

Chapter – 13

Ion Exchange Chromatography.....181

Experiment 13.1

To Determine Ion-Exchange Capacity of Resins..... 184

Chapter – 14

Electrophoresis.....187

Experiment 14.1

Demonstration of Separation of Proteins by
SDS Gel Electrophoresis..... 189

Experiment 14.2

Separation of DNA by Gel Electrophoresis 195

Chapter – 15

Thin-layer Chromatography198

Experiment 15.1

Identification of given Unknown Drug by using
Thin Layer Chromatography..... 206

Experiment 15.2

Identification of Amino Acids by using Thin
Layer Chromatography 209

Chapter – 16

Column Chromatography211

Experiment 16.1

To Separate Organic Compounds with the help of
Column Chromatographic Technique 218

(xvi) *Contents*

Experiment 16.2

To Separate Mixture of Dye with the help of Column
Chromatographic Technique 220

Chapter – 17

Colorimetry.....222

Experiment 17.1

To Determine Amount of Amino Acids using Colorimetry..... 225

Experiment 17.2

To Determine Amount of Blood Glucose
Level using Colorimetry 228

Chapter – 18

Spectroflurometry231

Experiment 18.1

Determination of Riboflavin by using Spectrofluorometry 232

Experiment 18.2

Determination of Thiamine by using Spectrofluorometry 234

Chapter – 19

UV/Visible Spectroscopy236

Experiment 19.1

To Verify Beer-Lambert's Law 242

Experiment 19.2

Determination of Salicylic Acid in Synthesized Aspirin by
UV-Spectrophotometric Method..... 245

Experiment 19.3

Determination of Paracetamol Content in Tablet by
UV-Spectrophotometric Method..... 248

Experiment 19.4

Determination of Amoxicillin Content in Capsule by
UV-Spectrophotometric Method..... 250

Experiment 19.5

Determination of Eflornithine Hydrochloride in Parenteral
Formulation by UV-Spectro-photometric Method..... 253

Experiment 19.6

Determination of Albendazole in Suspension Forms by
UV-Spectrophotometric Method..... 255

Experiment 19.7

Determination of Ranitidine in Tablet Dosage Form
Spectrophotometrically 258

Experiment 19.8

Simultaneous Estimation of Cefixime and Ofloxacin in
Tablet Dosage Form Spectrophotometrically 260

Chapter – 20

Infrared Spectrophotometry.....264

Experiment 20.1

To Interpret IR Spectra of Paracetamol..... 271

Experiment 20.2

To Interpret IR Spectra of Aspirin 273

Experiment 20.3

To Interpret IR Spectra of Dexamethasone..... 275

Experiment 20.4

To Interpret IR Spectra of Stigmasterol 277

(xviii) *Contents*

Experiment 20.5

To Interpret IR Spectra of Phenoxyethyl Penicillin Potassium..... 279

Chapter – 21

High Performance Liquid Chromatography281

Experiment 21.1

Assay of Paracetamol and Aspirin in Tablets 291
