Preface(v)

Chapter 1: Introductory Concepts

1.1	Introduction	1
1.2	Classification of Engineering Mechanics	1
1.3	Basic Terminology	1
1.4	Laws of Mechanics	
1.4.1	Newton's First laws of motion	2
1.4.2	Newton's Second law of motion	2
1.4.3	Newton's Third law of motion	3
1.4.4	Newton's law of Gravitation	3
1.4.5	Law of Transmissibility of Force	3
1.4.6	Parallelogram law of forces	3
1.4.7	Varignon's Theorem	4
1.4.8	Polygon Law of Force	4
1.4.9	Lami's Theorem	4

CHAPTER 2 : System of Force

2.0	Introduction	6
2.1	Resolution of Forces	7
2.3	Composition of Forces by Method of Resolution	8
	Objective Type Questions	69
	Answers	72

CHAPTER 3 : Equilibrium of Force System

3.1	Conditions of Equilibrium	73
3.2	Types of Forces on a Body	74
3.3	Action and Reaction	75
	Objective Type Questions	102
	Answers	103

CHAPTER 4 : Analysis of Structures

4.1	Introduction	104
4.2	Types of Frames	104
4.3	Assumption in Analysis	105
4.4	Forces in Structures	105
4.5	Analytical Methods for the forces	105
4.5.1	Methods of Joints	105
4.5.2	Important Conditions	106
4.6	Methods of Section	109
4.7	Analysis of Frames	137
	Objective Type Questions	145
	Answers	149

CHAPTER 5 : Friction

5.1	Introduction	150
5.2	Dry and Wet Friction	150
5.3	Limiting Friction	150
5.4	Laws of Dry Friction	151
5.5	Resultant Reaction and Angle of Friction	151
5.6	Cone of Friction	152
5.7	Screw Jack	183
5.8	Differential Screw Jack	185
	Objective Type Questions	191
	Answers	192

CHAPTER 6 : Centroids

6.1	Introduction	193
6.2	Centroid	194
6.3	Determination of Centroid of Simple Geometry for a Basic Principles	196
6.4	Centroid of Length	216
	Objective Type Questions	234
	Answers	237

CHAPTER 7 : Moment of Inertia

7.1	Introduction	238
7.2	Polar Moment of Inertia	240
7.3	Transfer Formulas for Area Moment of Inertia (AMI)	241
7.3.1	Perpendicular Axis Theorem	241
7.3.2	Parallel Axis Theorem	241
7.4	Moment of Inertia of Simple Geometrical Planar Areas from Basic Principles	242
7.4.1	Determination of Area Moment of Inertia of a Rectangular Plane	243
7.4.2	Determine AMI of the Rectangle about its Centroidal XX-axis (I_{xx}).	243
7.4.3	Derive AMI of a Rectangle with Respect to its base i.e., I_{AB} and I_{CC} respectively	244
7.4.4	Hollow Rectangle	245
7.4.5	A Small Rectangle is Cut from a Rectangle of $B \times D$ as shown in Fig.7.9	246
7.4.6	Determine of Area Moment of Inertia of a Triangle	246
7.4.7	AMI of Triangle about Centroidal Axis	248
7.4.8	Area Moment of Inertia of a Circle about Diametral Axis	248
7.4.9	Area Moment of Inertia of a Hollow Circle	250
7.4.10	Moment of Inertia of a Semi Circle (Fig. 7.14)	251
7.4.11	Area Moment of Inertia of a Quadrant of a Circle	252
	Objective Type Questions	313
	Answers	316

CHAPTER 8 : Virtual Work

8.1	Introduction	317
8.2	Work done by a Force	317
8.3	Work done by a Couple	318
8.4	Virtual Displacement and Virtual Work	319
8.5	Principle of Virtual Work	320
8.6	Connected System	330

CHAPTER 9 : Kinematics of Particle

9.0	Introduction to Dynamics	333
9.1	Important Definitions	333
9.2	Motion under Constant Acceleration	335
9.3	Acceleration Due to Gravity	336
9.4	Motion Curves	336
9.5	Rotation of Rigid Bodies	361

CHAPTER 10 : General Principles of Dynamics

10.1	Introduction	366
10.2	Newton's II law of Motion – D' Alembert's Principle	366
10.3	Newton's III Law of Motion and Law of Gravitational	367
10.4	Basic Terms	368
10.4.1	Motion	368
10.4.2	Distance and Displacement	368
10.4.3	Speed and Velocity	368
10.4.4	Acceleration and Retardation	369

CHAPTER 11 : Kinetics of Particles

11.1	Types of Motion	370
11.2	Analysis of Translation Motion of a Particle	371

Objective Questions **397**

Exercise Problems **398**

Answers **398**

CHAPTER 12 : Kinematics of Rigid Bodies

12.0	Introduction	400
12.1	Types of Rigid body Motion	400
12.1.1	Translatory Motion	400
12.1.2	Rotary Motion	400
12.1.3	Plane Motion	401
12.1.4	Rotation about a Fixed Point	402

CHAPTER 13 : Mechanical Vibration

13.1	Introduction of Basic Terms	416
13.2	Simple Harmonic Motion	416
13.3	Simple Harmonic Motion- Vibrations of Spring	419
	13.3.1 Springs in Parallel	421
	13.3.2 Spring in Series	422
13.4	Simple Pendulum	430
13.5	Compound Pendulum	434
13.6	Torsional Pendulum	441
	Objective Type Questions	454
	Answers	456

CHAPTER 14 : Work – Energy Method

14.1	Introduction	457
14.2	Work done by a Varying Force	457
14.3	Work done by a Spring	458
14.4	Power	459
14.5	Work Energy Equation	459
	Objective Type Questions	495
	Answers	495

CHAPTER 15 : Impulse and Momentum

15.1	Introduction	496
15.2	Linear Impulse and Momentum	496
15.3	Conservation of Momentum	498
15.4	Impact of Elastic Bodies	501
	Objective Type Questions	519
	Answers	520
