CHAPTER 1

Agrometeorology in Extreme Events and Natural Disasters – An Overview

1.1	Introduction	1
1.2	Natural Disasters – Definitions and Types.....	3
1.3	The Role of Meteorological Data and Information.....	5
1.4	Socio-economic Impact of Extreme Events	8
1.5	Positive Impact on Agriculture of Extreme Events.....	10
1.6	Negative Impact on Agriculture of Extreme Events	11
1.7	Impact of Natural Disasters on Rangeland and Forestry.....	14
1.8	Impact of Natural Disasters on Fisheries and Aquaculture.....	15
1.9	Impact of Natural Disasters on Environment.....	16
1.10	Extreme Events and Risk Management in Agriculture.....	17
1.11	Early Warning Systems for Extreme Events.....	20
1.12	Remote Sensing Techniques for Disaster Risk Management	24
1.13	Prevention of and Preparedness for Extreme Events	25
1.14	Rehabilitation	27
1.15	Conclusions	27
	<i>References</i>	28

CHAPTER 2

Drought and Desertification

2.1	Introduction	34
2.2	Concept of Drought.....	35

2.3	Drought and Aridity	36
2.4	Classification of Drought	37
	2.4.1 Meteorological Drought.....	38
	2.4.2 Agricultural Drought.....	38
	2.4.3 Hydrological Drought	39
	2.4.4 Socio-economic Drought	40
2.5	Space -Time Characteristics of Drought.....	40
	2.5.1 Spatial Extent	41
	2.5.2 Beginning and End of Drought	41
2.6	Causes of Drought.....	42
2.7	Monitoring and Early Warning of Drought.....	43
2.8	Drought Indices.....	47
	2.8.1 Meteorological Drought Indices	48
	2.8.2 Agricultural Drought Indices	50
	2.8.3 Hydrological Drought Indices.....	52
2.9	Drought Prediction.....	53
2.10	Impacts of Drought	54
	2.10.1 Drought and Agriculture	55
	2.10.2 Response of Plants to Drought Conditions	57
2.11	Socio-Economic Aspects of Drought.....	58
2.12	Beneficial Aspects of Drought.....	59
2.13	Drought Risk Reduction Strategies.....	60
2.14	Adaptations and Adjustments to Drought.....	62
2.15	Drought Management	64
2.16	Drought Planning and Climate Change.....	69
2.17	Drought Mitigation	70
2.18	Drought Index Insurance.....	71
2.19	Drought and Human Health	71
2.20	Desertification.....	72
	2.20.1 Definition of Desertification	75
2.21	Distribution of Desertification	75
2.22	Desertification Trend	76

2.23	Desertification Processes	78
2.23.1	Agrometeorological Aspects in the Desertification Process.....	78
2.24	Causes of Desertification	79
2.24.1	Natural Factors Leading to Desertification	80
2.24.2	Anthropogenic Factors.....	82
2.25	Impact of Desertification on Climate.....	88
2.25.1	Land Degradation Due to Changes in Land Use and Land Cover.....	88
2.25.2	Impact of Land Use/Land Cover Changes on Climate	89
2.25.3	Biomass Burning and Atmospheric Emissions	90
2.26	Desertification and Feedback Mechanism	91
2.27	Physical and Socio-economic Impacts of Desertification.....	92
2.28	Desertification and Development.....	93
2.29	Monitoring and Assessment of Desertification.....	94
2.29.1	Remote Sensing Application.....	95
2.29.2	Meteorological and Hydrological Analysis.....	96
2.29.3	Universal Soil Loss Equation.....	96
2.30	Strategies to Combat Desertification	97
2.31	Conclusions.....	100
	References.....	101

CHAPTER 3

Irrigation Scheduling to Combat Moisture Deficit in Plants

3.1	Introduction.....	111
3.2	Factors Affecting the Irrigation Interval	112
3.3	Evaporation Losses for Irrigation.....	113
3.4	Crop Water Requirements.....	113
3.5	Irrigation Scheduling of Crops.....	114
3.5.1	Irrigation Scheduling under Adequate Water Supply.....	115

3.5.2	Irrigation Scheduling under Limited Water Supply..	115
3.5.3	Optimal Irrigation Schedules	116
3.5.4	Irrigation Scheduling in Real Time.....	116
3.6	Traditional Irrigation Methods.....	117
3.7	Net Irrigation Requirements.....	117
3.8	Leaching Requirements.....	119
3.9	Irrigation Efficiencies	120
3.10	Gross Irrigation Requirements	122
3.11	Irrigation Systems	122
3.12	Components of Irrigation Schedule	122
3.12.1	Water Application Depth	123
3.12.2	Water Application Duration.....	123
3.12.3	Water Application Timing and Irrigation Interval	123
3.13	Irrigation Scheduling Techniques	123
3.13.1	Plant Observation.....	123
3.13.2	Soil Moisture Meters.....	124
3.13.3	Cumulative Pan Evaporation.....	124
3.13.4	Soil Water Budget.....	125
3.14	The Soil Water Balance Method.....	125
3.14.1	Simple Scheduling Method.....	126
3.14.2	Rapid Scheduling Method.....	126
3.14.3	Graphical Scheduling Method.....	126
3.14.4	Real Time Scheduling.....	128
3.14.5	Practical Disadvantages of the Water Balance Method.....	128
3.15	Irrigation Scheduling for Rice.....	128
3.16	Climate Information for Optimum Irrigation under Drought Conditions.....	129
3.17	Agrometeorological Support to Irrigation Practice: Example of Peach Irrigation in Vipava Valley (Slovenia).....	131
3.18	Conclusions.....	133
	References.....	134

CHAPTER 4

Heavy Rains, Floods, Hail and Snow and their Impact on Agriculture

4.1	Introduction.....	136
4.2	Floods and their Cause.....	137
4.3	Forecasting/Warning of Flood for Safety Measures	137
	4.3.1 Flash Floods Forecasting.....	139
4.4	Flood Control and Management.....	139
	4.4.1 Integrated Flood Management	140
4.5	Protection against Floods	142
4.6	Flood Fighting.....	142
4.7	Flood Risk Management Strategy	143
4.8	Livelihood Security in the Flood Plains.....	144
4.9	Heavy Rains and Flooding and their Impacts on Agriculture	145
4.10	Water-logging and its Effect on Plants	146
4.11	Symptoms of Flooding Damage.....	148
4.12	Causes of Flooding Damage	149
4.13	Mitigation of Flood Damage on Agricultural Sector	149
4.14	Landslides	152
	4.14.1 Control of Landslides.....	152
4.15	Avalanches	153
4.16	The Erosion Process and its Agricultural Implications	153
	4.16.1 Fluvial Erosion.....	154
4.17	Coastal Erosion and Protection	155
	4.17.1 Sea Waves	155
	4.17.2 Tide-storm Surges	157
	4.17.3 Near-shore Currents	157
4.18	Hail.....	157
	4.18.1 Temporal and Spatial Distribution of Hail.....	158
	4.18.2 Hail and Crop Damage.....	159
	4.18.3 Hail Forecasting Methods	160
	4.18.4 Hail Prevention	160

4.19	Snow, Ice and Frozen Ground.....	161
4.19.1	Hydrological Aspects of Snow and Ice.....	161
4.19.2	Thermal Aspects of Snow	162
4.19.3	Regular Snowfall and its Implications for Agriculture	163
4.19.4	Intermittent Snowfall and its Implications for Agriculture.....	164
4.19.5	Wind Breaks and Snow Deposition	165
4.20	Conclusions.....	165
	References.....	166

CHAPTER 5

Tropical Cyclones, Storm Surges, Thunderstorms, Tornadoes and Squalls: Implications for Agriculture

5.1	Introduction.....	171
5.2	Geographical Distribution of Tropical Cyclones	172
5.3	Energy of Tropical Cyclones	173
5.4	Atmospheric Parameters and Tropical Cyclone Formation	175
5.5	Structure of the Tropical Cyclone.....	175
5.6	Heavy Rain associated with Tropical Cyclones.....	176
5.7	Storm Surges.....	178
5.7.1	Protection from the Storm Surge.....	180
5.8	Monitoring and Forecasting of Tropical Cyclones	180
5.9	Destruction caused by Tropical Storms	183
5.9.1	Salt Deposition in Coastal Areas.....	186
5.10	Agrometeorological Loss associated with Cyclones.....	187
5.11	Socio-Economic Vulnerability.....	188
5.12	Beneficial Impact of Cyclonic Storms	189
5.13	Cyclone Warning Systems	189
5.14	Cyclone Disaster Management and Mitigation Measures.....	191
5.14.1	Prevention and Preparedness Planning	192
5.14.2	Cyclone Preparedness in the Agricultural System	192
5.14.3	Cyclone Preparedness for Non-agricultural Sector ...	193
5.14.4	Evacuation.....	194

5.15	Mitigation Measures	195
5.16	Community-based Vulnerability Reduction Programmes	197
	5.16.1 Community based Capacity Building and Livelihood Concern.....	197
5.17	Snowstorms and Blizzards	199
	5.17.1 Types of Blizzards and Winter Storms	200
	5.17.2 Impact of Blizzards and Winter Storms on Environment and Agriculture.....	200
5.18	Thunderstorms	201
	5.18.1 Conditions Favourable for Thunderstorms	203
	5.18.2 Beneficial Effects of Thunderstorms	203
	5.18.3 Thunderstorm Hazards.....	204
5.19	Squall Lines.....	205
5.20	Tornadoes and Water Spouts	206
	5.20.1 Meteorological Forecasts and Warnings for Tornadoes.....	207
	5.20.2 Precautions for Safety	208
5.21	Conclusions.....	208
References.....		209

CHAPTER 6

Agrometeorology Related to Extreme Temperatures, Heat Waves and Frost

6.1	Introduction.....	214
6.2	Effect of Extremely High Temperature on Plants.....	215
	6.2.1 Heat Waves and Crop Production	218
6.3	Mitigation Practices to Cope with High Temperatures.....	219
6.4	Effect of Low Temperature and Cold Spell on Plants	219
	6.4.1 Chilling Damage	219
	6.4.2 Plant Freezing Damage	221
6.5	Frost	222
	6.5.1 Causes of Frost.....	222
	6.5.2 Effect of Frost on Plants.....	223
	6.5.3 Intensity of Frost Damage to Plants in Relation to Soil Temperature and Snow Cover	227

6.5.4	Protection against Frost Damage	228
6.5.5	Forecast and Warning of Frost.....	230
6.6	Climate and Animal Husbandry.....	231
6.6.1	Effect on Livestock of Extreme Temperatures	232
6.6.2	Effect on Livestock of Low Temperatures.....	233
6.6.3	Effect on Livestock of High Temperatures	233
6.7	Provision of Proper Environmental Conditions for Livestock....	234
6.8	Effect of Climatic Factors Particularly Temperature on Fisheries and Aquaculture.....	237
6.8.1	Effect of Water Temperature on Fish Populations....	238
6.8.2	Effect of High and Low Temperatures on the Distribution and Abundance of Fishes.....	239
6.8.3	Effect of Elevated Sea Surface Temperatures on Fisheries	241
6.8.4	Effect of Flood Conditions on the Fish Community .	241
6.9	Vulnerability of Fisher Community to Disasters and Climate Change.....	242
6.10	Conclusions	244
References.....		245

CHAPTER 7

Wind Storms and Sand/Dust Storms and their Effect on Environment and Plants

7.1	Introduction.....	250
7.2	The Physiological Effect of Strong Winds on Plants.....	251
7.3	Wind Storms and Squalls and their Impact on Plants	252
7.4	Sand and Dust Storms	253
7.5	Environmental Aspects of Sand Storm/Dust Storm and Desert Winds.....	254
7.6	Erosion by Wind	257
7.7	Strong Winds and Land Degradation.....	261
7.8	Impact of Sand and Dust Storms on Agriculture and Livestock.	262
7.9	Effect of Strong Wind on Forestry and Woodlands.....	264
7.10	Measures to Protect Crops from Wind Storms and Sand Storms	264

7.11	Sand and Dust Storm Warning System for Agricultural Use.....	266
7.12	Conclusions.....	268
References.....		268

CHAPTER 8

Forest- and Bush-Fire and their Impact on the Environment

8.1	Introduction.....	274
8.2	Basic Principles of Combustion.....	275
8.3	Role of Weather in Forest Fires	276
	8.3.1 Onset of Fire Danger Period	277
	8.3.2 Humidity/Dryness of Vegetation as Fuels	278
	8.3.3 Lightning as Fire Setting Agency	279
8.4	Post-ignition Influence of Weather on Fire Behaviour	280
	8.4.1 Influence of Weather on Low-intensity Fires	280
	8.4.2 Influence of Weather on High-intensity Fires.....	281
	8.4.3 Influence of Wind and Slopes on Fire.....	282
8.5	Man-made Fire	282
8.6	Fire Danger Rating Systems.....	282
8.7	Fire-weather Forecasting Services	285
	8.7.1 Objectives and Development of Early Warning System-Fire (EWS-Fire)	286
8.8	Fire Behaviour Prediction	287
8.9	Remote Sensing Application of Fire Monitoring and Fire Danger Assessment.....	288
8.10	Impact of Fire on Forest Biodiversity	289
	8.10.1 Ecosystem Effects of Fire	290
	8.10.2 Impacts of Human-induced or Severe Natural Forest Fire on Plant Diversity	290
	8.10.3 Natural Fire Regimes and Fire-adapted Plant Species	291
	8.10.4 Positive Consequences of Wildfires on Plants.....	292
8.11	Environmental Impacts of Forest Fires	292
	8.11.1 Prescribed Fire/Burn and its Effects on Environment.....	293

8.12	Models used for Forecasting, Warning and Evaluation of Wild Land Fires	296
8.13	Conclusions.....	297
	References.....	298

CHAPTER 9

Pests and Diseases of Crops and Livestock

9.1	Introduction.....	303
9.2	Weather Aspects of Crop Pests and Diseases	304
9.3	Locusts	306
	9.3.1 Desert Locust (<i>Schistocerca gregaria</i>)	308
	9.3.2 Migratory Locust (<i>Locusta migratoria</i>)	309
	9.3.3 Red Locust (<i>Nomadacris septemfasciata</i>).....	309
	9.3.4 Brown Locust (<i>Locustana pardalina</i>).....	309
	9.3.5 Moroccan Locust (<i>Dochiostaurus maroccanus</i>).....	309
	9.3.6 Bombay Locust (<i>Nomadacris succincta</i>).....	310
	9.3.7 Australian Plague Locust (<i>Chortoicetes icrminifera</i>)	310
	9.3.8 South American Locust (<i>Schistocerca cancellata</i>) ...	310
	9.3.9 Sahelian Tree Locust (<i>Anacridium melanorhodon</i>)..	310
	9.3.10 Senegalese Grasshopper (<i>Oedaleus senegalensis</i>)....	311
9.4	Effects of Weather on Locusts	311
9.5	Insect Pests and Climatic Factors.....	312
	9.5.1 European Corn Borer	313
	9.5.2 Pink Bollworm	313
	9.5.3 Lobesia botrana (<i>Vine pests</i>)	314
9.6	Insect Pests with Long Range Migration	315
	9.6.1 African Armyworm (<i>Spodoptera exempta</i>)	315
	9.6.2 Oriental Armyworm (<i>Mythimna reparata</i>)	316
9.7	Plant Diseases: Biotic and Abiotic.....	316
9.8	Virus Diseases of Plants.....	317
	9.8.1 Tobacco Mosaic Virus	317
	9.8.2 Ratoon Stunting Disease of Sugarcane	317
9.9	Fungi	318
	9.9.1 Powdery Mildew of Cereals.....	318
	9.9.2 Loose Smut of Wheat.....	318

9.10	Plant Diseases caused by Bacteria	319
9.10.1	Citrus Canker	319
9.10.2	Angular Leaf Spot or Black Arm of Cotton.....	319
9.11	Rodent.....	320
9.12	Crop Disease Forecast and Crop Protection Measures	321
9.12.1	Production of Warnings and Information for Crop Protection Measures	323
9.12.2	Methods of Dissemination of Warnings and Information.....	324
9.13	Mathematical Models for Control of Pests and Diseases and Integrated Pest Management	325
9.14	Animal Diseases.....	326
9.14.1	Foot- and Mouth- Disease Virus	326
9.14.2	Lumpy Skin Disease (LSD)	327
9.15	Livestock Protection Measure and Forecasting Animal Diseases.....	327
9.16	Conclusions.....	328
	References.....	329

CHAPTER 10

Environmental and Agricultural Implications of Earthquakes, Tsunamis and Volcanic Eruptions

10.1	Introduction.....	333
10.2	Earthquakes.....	334
10.3	Causes of Earthquakes	335
10.4	Effect of Earthquakes on Surface Water	335
10.4.1	Oscillations in Wells	336
10.4.2	Earthquake Fountains.....	336
10.4.3	Seiches	336
10.5	Tsunamis and their Genesis	336
10.6	The Tsunami Disaster of December 26, 2004.....	339
10.6.1	Impact of the 2004 Tsunami : Pollution and Health Hazard	340
10.6.2	Impact of Tsunamis on Soil and Water.....	341
10.6.3	Tsunami Management and Mitigation Plan	342

10.6.4	Tsunami Warning System.....	344
10.6.5	Tsunami Management in India.....	345
10.7	Secondary Effects of Earthquakes	345
10.7.1	Landslides and Mudslides.....	345
10.8	Nature of Earthquake Damage	346
10.9	Socio-Economic Aspects of Earthquake Hazards.....	347
10.10	Role of Public during an Earthquake	348
10.11	Role of Public after an Earthquake	348
10.12	Volcanic Eruptions.....	349
10.12.1	Lava Flows and Ash Clouds	349
10.12.2	Volcanic Energy.....	350
10.12.3	The Water-magma Bomb.....	351
10.13	Effects of Volcanic Eruptions	351
10.13.1	Dust in the Atmosphere.....	351
10.13.2	Volcanic Mudslides.....	352
10.13.3	Death and Destruction.....	352
10.14	Environmental and Agricultural Significance of Volcanic Ash Soils.....	353
10.15	Impact of Volcanic Ash on Agriculture, Forestry and Livestock and Mitigation Scope.....	354
10.16	Volcanic Products as Fertilizers and other Uses	357
10.17	Harnessing the Earth's Energy	358
10.18	Prediction of Volcanic Eruptions	358
10.19	Safety Measures against Volcanic Eruptions.....	359
10.20	Conclusions.....	359
	References.....	360

CHAPTER 11

Community Capacity Building and Livelihood Strategies in Disaster Management and Mitigation of Adverse Impacts on Agricultural Sector

11.1	Introduction.....	363
11.2	Hazard and Disaster with Associated Risk Factors.....	365
11.3	Disasters and Vulnerability	366

11.4	Risk Assessment and Vulnerability Analysis	368
11.5	Community Participation in Disaster Management	369
11.6	Community Awareness in Disaster Prevention and Preparedness.....	370
11.7	Community-based Disaster Management Approach.....	372
11.8	Participatory Approach	374
11.9	Community-based Risk Assessment in Disaster Risk Reduction.....	374
11.10	Climate and Weather Forecasts: Community Specific Warning System.....	375
11.11	Community based Disaster Mitigation.....	377
11.12	Mitigation of Adverse Impact of Disasters in Agricultural Sector	378
	11.12.1 Diversification of Crops According to Different Planting Seasons	379
	11.12.2 Propagation of Disaster Resistant Crops.....	379
	11.12.3 Seed Banks and Nurseries	380
	11.12.4 Post Harvest Facilities.....	380
	11.12.5 Land use Planning and Water Resources Management and Sustainable Agricultural Practices	381
	11.12.6 Educating the Farmers on Suitable Farming Practices.....	383
	11.12.7 Improved use of Climate and Weather Information and Forecasts in Agriculture...	384
	11.12.8 Insurance	385
11.13	Disaster and Gender Perspectives	386
11.14	Disasters and Livelihood Options	388
	11.14.1 Creation of Livelihood Options in Disaster Risk Reduction.....	389
	11.14.2 Diversification of Livelihood Sources	391
	11.14.3 Improving Mobility for Better Livelihoods during Disaster Situation.....	391
	11.14.4 Critical Facilities and Infrastructure for Better Livelihood	392

11.15	Climate Change and Disaster Management	392
11.16	Conclusions	392
References.....		394

CHAPTER 12

Role of Agricultural Chemicals on Soil, Water and Air Pollution and their Effects on Plants, Livestock and Aquatic Systems

12.1	Introduction	397
12.2	Fertilizers	398
12.3	Pesticides.....	399
12.4	Insecticides.....	402
12.5	Fungicides	402
12.6	Herbicides	403
12.7	Rodenticides.....	404
12.8	Biological Control of Pests	404
12.9	Water Pollution from Agricultural Chemicals	405
	12.9.1 Eutrophication of Surface Water.....	408
	12.9.2 Aquaculture as a Source of Agricultural Pollution ...	410
	12.9.3 Mitigation of Agricultural Chemical Impacts on Water Resources	411
12.10	Water Pollution and Livestock Farming	412
12.11	Land Pollution and Livestock Framing.....	414
12.12	Water Pollution from Soil Erosion.....	416
12.13	Factors Affecting Air Pollution.....	418
12.14	Aerosols and Smog Affecting Plants	420
12.15	Gaseous Contaminants Affecting Vegetation	420
	12.15.1 Sulphur Compounds.....	421
	12.15.2 Halogen Compounds.....	422
	12.15.3 Nitrogen Compounds	422
	12.15.4 Other Gases and Materials	422
12.16	Effects of Air Pollution on Vegetation.....	423
12.17	Effects of Air Pollution on Livestock	424

12.18	Polluted Rain and Plant Growth.....	425
12.19	Acid Rain and Vegetation	426
	12.19.1 Effect of Acidification on Soil and Vegetation.....	428
	12.19.2 H ₂ SO ₄ Aerosols Damage to Vegetation	428
	12.19.3 Acid Deposition on the Plant Surface	429
	12.19.4 Acidification by Forestry	430
	12.19.5 Chemical Effects of Acid Precipitation on Leaf Tissues	430
	12.19.6 Acid Rain and its Effect on Trees	431
	12.19.7 Effects of Acid Rain on Aquatic Systems and Animals	432
12.20	Pollutants and Soil	433
	12.20.1 The Effects of Acid Precipitation on the Soil	434
12.21	Acidification of Earth's Terrestrial and Oceanic Biosphere	435
12.22	Conclusions	435
	<i>References</i>	437

CHAPTER 13

Climate Change, Extreme Events and Change in Cryosphere: Implications for Agriculture and Environment

13.1	Introduction.....	441
13.2	Climate Change and Natural Disasters	443
	13.2.1 High Intensity Rainfall and Floods	444
	13.2.2 Droughts.....	444
	13.2.3 Tropical Storms and Strong Winds.....	446
	13.2.4 Extreme Temperatures, Heat Waves and Cold Waves	447
	13.2.5 Pests and Diseases of Crops and Animals.....	447
	13.2.6 Wildfires and Bushfires	448
	13.2.7 Genetic Resources.....	448
13.3	Thawing Permafrost and Climate Change	449
13.4	Eurasia Warming, Snowmelt and Phytoplankton Blooms	450
13.5	Glaciers and Ice Sheets under Changing Climate	451

13.6	Impact on Environment under Changing Cryosphere.....	454
13.7	Regional Impact of Extreme Events and Climate Change.....	455
	13.7.1 Asia	455
	13.7.2 Southwest Pacific Region	455
	13.7.3 Africa	456
	13.7.4 Latin America	456
	13.7.5 Europe	457
	13.7.6 North America.....	458
13.8	Projections of the Disaster-related Effects of Climate Change...	458
13.9	Impacts of Climate Change on Food Security	461
13.10	Adaptation and Disaster Risk Reduction in Agriculture and Other Sectors.....	463
	13.10.1 Land and Water Management Strategies	464
	13.10.2 Pest Management	465
	13.10.3 Heat- and Drought-tolerant Crop Varieties.....	465
	13.10.4 Livestock Management	466
	13.10.5 Measures in Health Sector	467
	13.10.6 Awareness Raising and Education	467
	13.10.7 Environmental Management	467
	13.10.8 Early Warning Systems.....	468
13.11	Conclusions.....	468
	References.....	468

CHAPTER 14

Impact of Extreme Events and Natural Disasters and Risk Management in Agriculture: Implications for Food Security and Livelihood of the Community

14.1	Introduction.....	478
14.2	Vulnerability Assessments from Hazardous Events	480
14.3	Vulnerability of Food Production to Extreme Weather Events ..	481
14.4	The Impact of Natural Disasters in Agriculture Sector.....	484
14.5	Socio-Economic Impact of Disasters: Households Concern and Food Security	488
	14.5.1 Impact on Household Welfare	489

14.5.2	Economic Impact of Disasters: Direct and Indirect Costs.....	491
