

Contents

<i>Preface</i>	(v)
----------------------	-----

CHAPTER - 1

Laboratory Safety and Instrumentation

1.1 General Laboratory Rules and Precautions	1
1.2 Basic Requirements for Microbiology Laboratory Instruments	2
1.3 Introduction to Equipment and Ware used in Microbiology Laboratory	4

CHAPTER - 2

Cultivation of Bacteria

2.1 Preparation of Bacterial Media	17
2.2 Sterilization and Disinfection	20
2.3 Aseptic Transfer – Methods	26
2.4 Cultural, Characteristics of Bacteria	29

CHAPTER - 3**Isolation Techniques of Bacteria**

3.1	Isolation of Bacteria from Air	33
3.2	Isolation of Bacteria from Water	34
3.3	Isolation of Pure Cultures	36
3.4	Isolation of Milk from Bacteria	42
3.5	Methylene Blue Reductase Test	43
3.6	Measurement of Microorganisms	45

CHAPTER - 4**Bacterial Cytology**

4.1	Preparation of Bacterial Smears	52
4.2	Simple Staining	54

CHAPTER - 5**Biochemical Tests IMVIC Test**

5.1	Indole Production Test	66
5.2	Methyl Red Test and Voges Proskaver Test	68
5.3	Voges Proskauer's Test	70
5.4	Citrate – Utilization Test	72
5.5	Starch Hydrolysis Test	74
5.6	Gelatin Liquification Test	76
5.7	Fermentation of Carbohydrates	77
5.8	Hydrogen Sulphide Production Test	79
5.9	Phenol Coefficient Test	81

CHAPTER - 6**Microbial Activity**

- 6.1 Motility Testing of Bacteria by Hanging Drop Method 83
- 6.2 Oligodynamic Action of Heavy Metals 84
- 6.3 Antimicrobial Sensitivity Test (Agar Diffusion Method) 86

CHAPTER - 7**Fungi**

- 7.1 Morphology of Molds 89
- 7.2 Morphology of Yeast 92

Bacterial Stainings 95

Isolation of Bacteria 98

Biochemical Test 102

Fungal Cultivations 105

Anti-Microbials Activity 109

Appendix 111
