

CONTENTS

<i>Preface</i>	(v)
----------------------	-----

Unit 1

Solubility of Drugs

1A Solubility

1A.1 Introduction	1
1A.1.1 Definition of Terms.....	1
1A.1.2 Methods of Expressing Solubility.....	1
1A.2 Solute-Solvent Interactions	2
1A.2.1 Polar Solvents	2
1A.2.2 Non-Polar Solvents	3
1A.2.3 Semi Polar Solvents	3
1A.3 Ideal and Real Solutions	3
1A.4 Solubility of Gases in Liquids	6
1A.4.1 Factors Affecting Solubility of Gases in Liquids.....	6
1A.5 Solubility of Liquids in Liquids	7
1A.5.1 Factors Affecting Solubility of Liquids in Liquids.....	8
1A.6 Solubility of Solids in Liquids.....	11
1A.6.1 Solubility of Solids in Liquids Determination	11
1A.6.2 Factors Affecting Solubility of Solids in Liquids	13
1A.7 Solubility of Strong Electrolytes	16
1A.8 Solubility of Slightly Soluble Electrolytes	17
1A.9 Solubility of Weak Electrolytes.....	18

1B Distribution Phenomena

1B.1 Introduction	20
1B.2 Partition Coefficient	20
1B.2.1 Effect of Partition of Ionic Dissociation and Molecular Association	21
1B.2.2 Extraction.....	24
1B.3 Solubility and Partition Coefficients	25
1B.3.1 Preservative Action of Weak Acids in Oil-Water Systems.....	25
1B.4 Drug Action and Partition Coefficients	27

1C Fick's Laws of Diffusion

1C.1	Introduction	28
1C.1.1	Drug Absorption and Elimination.....	28
1C.1.2	Drug Release	29
1C.1.3	Osmosis.....	29
1C.1.4	Ultra Filtration and Dialysis.....	29
1C.2	Steady-State Diffusion.....	29
1C.2.1	Thermodynamic Basis	29
1C.3	Fick's Laws of Diffusion.....	30
1C.3.1	Fick's First Law	30
1C.3.2	Fick's Second Law.....	31

Unit 2

States of Matter & Properties of Matter, Physicochemical Properties of Drug Molecules

2.1	Introduction	35
2.2	Dielectric Constant	36
2.3	Dielectric Constant of Solvent.....	38
2.4	Dipole Moment.....	39
2.5	Induced Polarizability-Induced Dipole Moment	43
2.6	Optical Rotation.....	45
2.7	Optical Rotation of Chemical Compound	49
2.8	Optical Rotary Dispersion	51
2.9	Questions	55

Unit 3

Surface and Interfacial Phenomenon

3.1	Adsorption at Solid Interfaces	57
3.1.1	Adsorption.....	57
3.1.2	Solid-Gas Interface	57
3.1.3	Applications of Isotherms	63
3.1.4	The Solid-Liquid Interface.....	63

3.1.5	Electric Properties of Interfaces	64
3.1.6	The Electric Double Layer.....	64
3.1.7	Nernst and Zeta Potentials	65
3.1.8	Wetting Agent.....	66
3.1.9	Contact Angle	66
3.1.10	Applications of Surfactants.....	68
3.1.11	Rat-gat Perfusion Technique.....	69

Unit 4

Complexation and Protein Binding

4.1	Definition.....	71
4.1.1	Classification of Complexes	71
4.2	Metal Ion Complexes	72
4.2.1	Inorganic Complexes	72
4.2.2	Chelates.....	73
4.2.3	Olefin and Aromatic Type	74
4.3	Organic Molecular Complexes.....	74
4.3.1	Donor-Acceptor Type	74
4.3.2	Charge Transfer Complexes.....	75
4.3.3	Drug and Caffeine Complexes.....	75
4.3.4	Polymer Complexes	76
4.3.5	Picric Acid Complexes	76
4.3.6	Quinhydrone Complexes.....	77
4.4	Inclusion Complexes	77
4.4.1	Channel Lattice Type.....	78
4.4.2	Layer Types	78
4.4.3	Clathrates	79
4.4.4	Monomolecular Inclusion Complexes	79
4.5	Method of Analysis	80
4.6	Applications of Complexation.....	82
4.6.1	Partition Coefficients	83

Unit 5

pH, Buffers and Isotonic Solutions

Solutions of Non-electrolytes

5.1	Introduction	85
5.2	Method of Expressing the Concentration of Solutions.....	87
5.3	Ideal and Real Solutions.....	91
5.4	Colligative Properties	95
5.4.1	Lowering of Vapour Pressure	96
5.4.2	Elevation of Boiling Point.....	100
5.4.3	Depression of Freezing Point.....	105
5.4.4	Osmotic Pressure	110
5.5	Questions	114

Solutions of Electrolytes

5.6	Introduction	115
5.7	Properties of Solutions of Electrolytes	115
5.8	Electrolytic Conductance.....	118
5.9	Equivalent Conductance	119
5.10	Faraday's Laws of Electrolysis.....	122
5.11	Arrhenius's Theory of Electrolytic Dissociation.....	124
5.12	Theory of Strong Electrolytes	127
5.13	Questions	133

Ionic Equilibria

5.14	Introduction	134
5.15	Ionization of Water.....	142
5.16	Sorenson's pH	146
5.17	The influence of pK_a Values on Transport of Drugs across Biological Membranes	152
5.18	Calculation of pH	154
5.19	Questions	165

Buffers and Buffered Isotonic Solutions

5.20	Introduction	166
5.20.1	Buffers.....	166
5.20.2	Buffer Equation.....	167
5.20.3	Buffer Equation and Activity Coefficients	168
5.20.4	Factors Influencing the pH of Buffer Solutions.....	169
5.20.5	Calculation of Buffer Capacity	170
5.21	Neutralisation Curves and Buffer Capacity	172
5.21.1	Buffers in Pharmaceutical and Biological System.....	174
5.21.2	Calculating Tonicity using L_{ISO} Value	175
5.22	Methods of Adjusting Tonicity and pH.....	176
5.22.1	Class I Methods.....	176
5.22.1.1	Cryoscopic Method.....	176
5.22.2	Sodium Chloride Equivalent Method	177
5.22.3	Class II methods.....	178
5.22.3.1	White-Vincent Method	178
5.23	Isotonic Solution.....	182
5.23.1	Solutions Containing only a Weak Acid.....	182
5.23.2	Solutions Containing only a Weak Base.....	183
5.23.3	Solutions Containing a Single Conjugate Acid-base Pair	183
5.23.4	Two Conjugate Acid-base Pairs.....	184
5.24	Solutions Containing only a Diprotic Acid	185
5.25	Solutions Containing only an Ampholyte	186
5.26	Solutions Containing only a Diacidic Base	186
5.27	Two Independent Acid-base Pairs.....	187
5.28	Solutions Containing 2 Weak Acids.....	187
5.29	Solutions Containing a Salt of a Weak Acid and a Weak Base.....	187
5.30	Solutions Containing a Weak Acid and a Weak Base.....	189
5.31	Questions	200
