|------------------------------|-------|
| <i>Preface</i> | (vii) |
| <i>Acknowledgement</i> | (ix) |
| <i>Abbreviations</i> | (xix) |

CHAPTER 1

Introduction (*Electricity & Electrical Energy Storage*)

| | |
|---|---|
| 1.1 Energy | 1 |
| 1.2 The Power Problem | 2 |
| 1.3 Energy Storage Benefits | 4 |
| 1.4 Energy Storage System Technology | 7 |
| 1.5 Classification based on the Needs of the Grid | 7 |
| 1.5.1 ‘Electricity to Electricity’ Storage Technologies | 7 |
| 1.5.2 ‘Electricity to Non-electrical Energy’ Storage | 8 |
| 1.5.3 ‘Non-electrical Energy form to Electricity’ Storage | 9 |
| <i>References</i> | 9 |

CHAPTER 2

Overview of Energy Storage Technologies

| | |
|--------------------------|----|
| 2.1 Classification | 11 |
| 2.2 Overview | 14 |
| <i>References</i> | 18 |

CHAPTER 3

Mechanical Energy Storage

| | |
|--|----|
| 3.1 Pumped Hydroelectric Storage (PHS) | 27 |
|--|----|

| | |
|---|----|
| 3.2 Compressed-Air Energy Storage (CAES) | 33 |
| 3.2.1 Development of various CAES Technologies..... | 37 |
| 3.3 Flywheel Energy Storage (FES) | 48 |
| 3.4 Comparison of PHS, CAES and FES | 55 |
| <i>References</i> | 57 |

CHAPTER 4

Electrochemical Energy Storage

| | |
|---|-----|
| 4.1 Battery Energy Storage Systems (BESS) | 66 |
| 4.2 Lead-acid (Pb-acid) Battery..... | 70 |
| 4.3 Nickel Cadmium Batteries..... | 78 |
| 4.3.1 Nickel Iron (NiFe) and Nickel Zinc (NiZn) Batteries..... | 82 |
| 4.3.2 Nickel-metal-hydride (NiMH) | 85 |
| 4.3.3 ZnAg and ZnMn Batteries..... | 89 |
| 4.4 Lithium-ion Batteries..... | 90 |
| 4.4.1 Lithium Metal Batteries | 91 |
| 4.4.2 Emergence of Lithium-ion Cells | 93 |
| 4.4.3 Batteries for Electrical Vehicles – Development Path | 101 |
| 4.4.4 Comparison | 109 |
| 4.5 High Temperature Batteries..... | 111 |
| 4.5.1 Sodium-sulfur Battery (NaS) | 111 |
| 4.5.2 Sodium-nickel-chloride (Na-NiCl ₂) Battery..... | 115 |
| 4.6 Metal-air Batteries (MABs)..... | 119 |
| 4.6.1 Aluminum-air Batteries..... | 121 |
| 4.6.2 Zinc-air Batteries..... | 123 |
| 4.6.3 Iron-air Batteries | 124 |
| 4.6.4 Magnesium-air Batteries | 125 |

| | | |
|-------|--|-----|
| 4.7 | Flow Batteries | 125 |
| 4.7.1 | Vanadium Redox-Flow Battery (VRFB) | 128 |
| 4.7.2 | Iron-Chromium Redox-flow Battery (Fe-Cr RFB) ... | 135 |
| 4.7.3 | Hybrid Redox-flow Batteries | 138 |
| | <i>References</i> | 141 |

CHAPTER 5

Electrical/Electromagnetic Energy Storage

| | | |
|-------|---|-----|
| 5.1 | Capacitors | 165 |
| 5.2 | Super Capacitors (SCs)..... | 169 |
| 5.3 | Battery Vs Supercapacitor | 171 |
| 5.4 | Superconducting Magnets | 173 |
| 5.4.1 | Renewable Energy Sources Coupled with SMES | 180 |
| 5.5 | Comparison..... | 183 |
| | <i>References</i> | 185 |

CHAPTER 6

Chemical Energy Storage (*Hydrogen and SNG*)

| | | |
|-------|------------------------------------|-----|
| 6.1 | Hydrogen Production..... | 190 |
| 6.1.1 | Hydrogen Production Methods | 191 |
| 6.2 | Hydrogen Storage Technologies..... | 218 |
| 6.2.1 | Hydrogen Gas Storage | 219 |
| 6.2.2 | Liquid Hydrogen-Storage..... | 221 |
| 6.2.3 | Hydrogen Storage in Solids..... | 225 |
| 6.3 | Hydrogen Fuel Cells..... | 234 |
| 6.4 | Power to Gas Technology (P2G)..... | 248 |
| | <i>References</i> | 253 |

CHAPTER 7

Thermal Energy Storage

| | |
|---|-----|
| 7.1 Introduction | 273 |
| 7.2 Sensible Heat Storage (SHS) | 276 |
| 7.2.1 Normal Temperature Storage Systems (<100°C) | 280 |
| 7.2.2 High Temperature Storage Systems | 282 |
| 7.3 Latent Heat Storage (LHS) | 285 |
| 7.4 Chemical Heat Storage | 289 |
| 7.5 Conclusions | 292 |
| <i>References</i> | 293 |

CHAPTER 8

Applications of Energy Storage

| | |
|---|-----|
| 8.1 Introduction | 297 |
| 8.2 Applications for Utilities and Grid Operators | 297 |
| 8.3 Applications for Consumer (that is, ‘Behind-the-meter’) | 301 |
| 8.4 Integrating Renewable Energy to Grid | 303 |
| 8.5 Smart Grid | 307 |
| 8.6 Smart House | 312 |
| 8.7 Power Electronics in DER Systems | 313 |
| 8.8 Virtual Power Plant | 318 |
| 8.9 Battery SCADA System | 321 |
| <i>References</i> | 325 |

CHAPTER 9

Maturity and Status of Energy Storage Systems

| | |
|--------------------|-----|
| 9.1 Maturity | 329 |
| 9.2 Status | 332 |

| | |
|--|------------|
| 9.3 Systems in Operation..... | 334 |
| 9.3.1 Lu del Norte 141 MW facility in Chile to provide ancilliary grid services | 334 |
| 9.3.2 250MW/250MWh Gateway Energy Storage project in California, USA | 335 |
| 9.3.3 Council owned Battery storage at Fideoak Mill in Taunton, UK..... | 336 |
| 9.3.4 Grid-scale Battery storage Systems in Australia..... | 337 |
| 9.3.5 Tehachapi Energy Storage Project (TSP) at the Monolith Substation of Southern California Edison (SCE) in Tehachapi, CA, USA..... | 340 |
| 9.3.6 Grid-scale Battery Storage System in India | 341 |
| 9.4 Examples of BES Systems Operating World-wide: [11, 12].... | 342 |
| <i>References</i> | 356 |
| | |
| <i>Glossary</i> | 359 |
| <i>Index</i> | 385 |
