Preface (v)

Summary and Acknowledgements (vii)

Chapter 1

Basics of Nanoscience

1.0	Basic Definitions	1
1.1	Definition of Nano	1
1.2	Nanoscale	2
1.3	Nanomaterials	2
1.4	Nanoscience	3
1.5	Nanotechnology	3
1.6	General Introduction	4
1.7	History of Nanotechnology	5
1.8	Origin of Nanotechnology	8

References 9

Chapter 2

Nanostructures

2.0	Manipulation of Atoms	10
2.1	Quantum Confinement (Corral)	11
2.2	Building of Nanostructures	11
2.3	Nano Instrumentation	12
2.4	Observation of Magnetic Flux Lines of Nickel Nanoparticles	13
2.5	Nanostructures in Nature Naturally Produced Nanomaterials	14 14
2.6	Gecko Feet Extraordinary ability of Gecko Feet	14
2.7	Dazzling Colors of Butterfly Wings	15

2.8	Lotus Effect	16
2.9	Peacock Feathers	17
2.10	Toucan Beak	17
2.11	Nano Navigation Systems	18
2.12	Nanostructures in the Human Body	18
2.13	Deoxyribonucleic Acid (DNA)	20
2.14	Applications of DNA	20
2.15	What more DNA can do?	21
	References	22

Chapter 3

Classification & Surface to Volume Ratio in Nanomaterials

3.1	Quantum Confinement Effect	23
3.2	Classification of Nanomaterials	24
3.3	Zero Dimensional (0D) Nanomaterials	25
3.4	Quantum Dots (QDs)	25
3.5	One Dimensional (1-D) Nanomaterials	26
3.6	Two Dimensional (2-D) Nanomaterials	27
3.7	Three Dimensional (3-D) Nanomaterials	28
3.8	Size Effects	30
3.9	Surface Area to Volume Ratio	30
3.10	Effect of Surface Area to Volume Ratio	32
	References	33

Chapter 4

Synthesis of Nanomaterials

4.0	Introduction	34
4.1	Synthesis Technique	34
4.2	Top-Down Technique	34

4.3	Solid State Reaction Method	35
4.4	Hydrothermal Synthesis	36
4.5	Solvothermal Synthesis	38
4.6	Nanolithography	39
4.7	Bottom-Up Techniques	40
4.8	Sol-Gel Method	42
4.9	Chemical Vapour Deposition (CVD)	44
4.10	Physical Vapor Deposition (PVD)	47
4.11	Thermal Evaporation	48
4.12	Pulsed Laser Deposition (PLD)	49
4.13	Sputtering Technique	50
	References	52

Chapter 5

Characterization Techniques

5.1	Introduction	53
5.2	X-Ray Diffraction (XRD)	53
5.2	Fourier Transform Infrared Spectroscopy (FTIR)	56
5.3	Scanning Electron Microscope (SEM)	58
5.4	Transmission Electron Microscope (TEM)	60
5.5	Scanning tunneling microscope (STM)	63
5.6	Atomic Force Microscopy (AFM)	66
	References	69

Chapter 6

Properties of Nanomaterials

6.1	Introduction	70
6.2	Physical Properties	71
6.3	Chemical Properties	75
6.4	Electrical and Electronic properties	77

6.5	Optical Properties of Nanomaterials	79
6.6	Magnetic Properties	81
6.7	Thermal Properties	83
6.8	Nanofluids	85
6.9	Mechanical Properties	87
	References	89

Chapter 7

Applications of Nanomaterials

7.1	Nanoelectronics	91
7.2	Nano Textiles	95
7.3	Nanotechnology in Automobile Industry	98
7.4	Nanotechnology for Water Treatment	100
7.5	Nanotechnology for Environment Protection	101
7.6	Nanotechnology for Energy Applications	102
7.7	Nanotechnology in Medicine	104
7.8	Nanotechnology in Cosmetics	107
7.9	Nanotechnology in Agriculture	108
7.10	Nanotechnology in the Food Industry	109
7.11	Nanotechnology in Building and Construction Industry	111
	References	114

Chapter 8

Nanoscale Devices

8.1	Introduction	117
8.2	Application of Nanoscale Devices for Photovoltaics	117
8.3	Application of Nanoscale Devices for Medical Dignostics	118
8.4	Nanoscale Devices for Electronic Applications	119
	References	120

Chapter 9

Concerns and Challenges of Nanotechnology

9.1	Introduction	121
9.2	Environment Pollution	121
9.3	Toxicity	121
9.4	Privacy	123
9.5	Concerns of Nanosensors	123
9.6	Concerns in Military	123
9.7	Concerns in Nanotextiles	123
9.8	Challenges of Nanotechnology	124
	<i>References</i>	124
