Preface .....	(v)
Acknowledgements .....	(vii)

### Chapter 1: Preformulation Concepts

Different Methods of Drug – Excipient Interactions.....	1
Kinetics of Stability.....	13
Stability Testing .....	20
Theories of Dispersion .....	29
Pharmaceutical Dispersion .....	30
Emulsion.....	40
Suspension.....	46
SMEDDS.....	48
Preparation .....	50
Stability Studies.....	50
Stability of Small Volume Parenterals .....	53
Stability of Large Volume Parenterals .....	59
Physiological Consideration .....	62
Formulation Consideration.....	67
Manufacturing .....	69
Evaluation .....	73
<b>References .....</b>	<b>80</b>
<b>Exercises .....</b>	<b>86</b>

### Chapter 2: Optimization Techniques

Concept of Optimization .....	91
Parameters of Optimization.....	95
Optimization Techniques in Pharmaceutical Formulation .....	97
Statistical Design .....	102

Processing (Analysis of Data) .....104  
Response Surface Method .....105  
Contour Designs .....108  
Factorial Designs .....124  
Application in Formulation .....131  
**References .....132**  
**Exercises .....134**

**Chapter 3: Validation**

Introduction to Pharmaceutical Validation.....141  
Scope of Validation .....145  
Advantages of Validation .....147  
Validation and Calibration Master Plan .....147  
ICH Guidelines for Calibration .....158  
WHO Guidelines for Calibration .....161  
Validation of Equipments.....166  
Validation of Specific Dosage Form .....189  
Types of Validation .....201  
Government Regulation .....208  
Manufacturing Process Model.....211  
**References .....218**  
**Exercises .....221**

**Chapter 4: cGMP & Industrial Management**

Introduction .....227  
Objectives .....228  
Policies of Current Good Manufacturing Practices .....230  
Layout of Buildings.....235  
Service Equipments, and their Maintenance .....240  
Production Management.....241  
Production Organization.....247  
Materials Management .....250  
Handling and Transportation.....259  
Inventory Management and Control.....263  
Production, Planning and Control (PPC).....269  
Sales Forecasting .....273

Industrial and Personal Relationship .....	278
Budget and Cost Control .....	285
Concept of Total Quality Management .....	289
<b>References .....</b>	<b>296</b>
<b>Exercises .....</b>	<b>300</b>
<b>Chapter 5: Compression and Compaction</b>	
Physics of Tablet Compression .....	305
Compression .....	312
Consolidation .....	324
Effect of Friction .....	327
Distribution of Forces .....	329
Compaction Profiles .....	330
Solubility .....	333
<b>References .....</b>	<b>340</b>
<b>Exercises .....</b>	<b>347</b>
<b>Chapter 6: Consolidation Parameters</b>	
Diffusion Process .....	353
Dissolution Parameters .....	359
Pharmacokinetic Parameters .....	367
Heckel Plots .....	378
Similarity factors – $f_2$ and $f_1$ .....	382
Higuchi and Peppas Plot .....	386
Significance of Linearity Concept .....	389
Linear Regression .....	392
Standard Deviation .....	394
CHI – Square Test .....	399
Students’ t T-test .....	403
ANOVA test .....	406
<b>References .....</b>	<b>417</b>
<b>Exercises .....</b>	<b>422</b>
