

# CONTENTS

Foreword .....	(v)
Preface .....	(vii)
Acknowledgement .....	(xi)
Prologue .....	(xvii)

---

## CHAPTER 1

### **Applied Design Thinking for Productivity 1-104**

Various Definitions .....	3
What is a business?	
<i>The simple way to understand:</i> .....	5
Building the Value Proposition .....	7
Understanding the Terms Cost, Price & Value .....	9
<i>The Cost</i> .....	9
<i>The Price</i> .....	9
<i>The Value</i> .....	9
Resource Efficiency .....	11
Critical Analysis .....	17
<i>The Order of Addressing the Operations:</i> .....	21
Causative Factors Affecting Inefficiencies .....	21
Value Engineering .....	27
FAST: Functional Analysis System Technique .....	35
Value Analysis.....	37
<i>The Ve Job Plan</i> .....	40
<i>The Team</i> .....	41
<i>Ownership</i> .....	41
Function Cost Analysis .....	41
Integrated Product and Process Development .....	42
Quality Function Deployment .....	43
<i>Cost Deployment</i> .....	44
<i>Target and Kaizen Costing</i> .....	44

**(xiv) | Contents**

VM and Design Thinking Applications ..... 46

Selection of Projects ..... 47

Establishing a Design Thinking & Value Engineering activity:..... 49

*Three-Tier Training Program* ..... 49

Subject wise Analysis of Functions and  
Information Listing (SWAFIL) ..... 53

Problem Selection Criteria ..... 55

Creativity: Stress your Brain: Think ..... 63

VALUE means different things to different people ..... 73

Value Engineering ..... 74

Areas for Application of VA VE ..... 74

Basic Plan & Value Engineering Job Plan ..... 80

Value Engineering Job Plan ..... 81

The VE Team Formation ..... 94

Functional Hierarchy ..... 100

Evolution of Alternatives ..... 103

---

**CHAPTER 2**

**System Approach for Problem Solving 107-134**

Analysis ..... 107

Synthesis ..... 107

Implementation ..... 115

Operation ..... 115

Involvement ..... 115

The Three Steps for Problem-Solving:  
Eliminate-Combine-Modify ..... 116

Group Dynamics in Value Management ..... 118

Factors Operating at the Individual Level ..... 118

Evaluation of Alternatives and  
Selection of the Most Optimum ..... 121

## CHAPTER 3

### Organising Design Thinking & VAVE Function ..... 137-162

Organisation for Design Thinking and Design Thinking & VAVE .....	141
Recommendation .....	159

---

## CHAPTER 4

### Case Studies..... 165-374

#### Cases:

1. Creating your own Bench Mark, instead of following someone else's: Even the best can be improved: **165**
2. Pitfalls in Planning and Execution **174**
3. Import substitution: Just know what you really need **177**
4. Very high process water consumption **178**
5. Waste heat recovery from Diesel generation set **180**
6. Who is the Government anyway? **182**
7. Very high consumption of additives **186**
8. Just a plain talking can solve major problem **201**
9. Transparency and Inter personnel relations work better than systems **205**
10. Over designing and Redundancy **206**
11. Redundant and Avoidable processes **207**
12. Putting theory to practice: Using OR models **210**
13. Curiosity to learn, questioning and challenging pays **213**
14. Reduced costs through Process optimisation **218**
15. Process analysis pays **225**

**(xvi) | Contents**

- 16. Engineering theory applied to solve problem 239**
- 17. Understanding process and experimenting with gut feelings work 246**
- 18. Maximising capacity without investment 252**
- 19. Design Analysis and functional understanding help reduce costs 262**
- 20. Processing and Handling waste generates raw material 264**
- 21. Creating wealth from waste 266**
- 22. Sustainable Development and Circular Economy through waste recycling: The Rice Husk Ash 286**
- 23. Reduction of delay in transport of material between process stages in large steel plant 300**
- 24. Heavy Consumption of costly spares 304**
- 25. Optimisation of equipment availability 310**
- 26. Air circulation and process improvement 326**
- 27. Creating capacity without any investment 334**
- 28. Improving system reliability by reduced parts in system 344**
- 29. Assuring sustainability through waste recycling 347**
- 30. A total systems out look 357**
- 31. Cleaner Production 361**

**References and Bibliography**

**375-380**
