<b>Foreword</b> .....	<b>(vii)</b>
<b>Prologue</b> .....	<b>(ix)</b>
<b>Preface</b> .....	<b>(xi)</b>
<b>Acknowledgements</b> .....	<b>(xv)</b>

## Chapter 1: Nano Science and Technologies

1.1 Concepts of Nanoscience and Nanotechnologies.....	1
1.1.1 Introduction .....	1
1.1.2 What is Nanoscience? .....	2
1.1.3 What are Nano Technologies?.....	2
1.1.4 Definition of Nanotechnology .....	4
1.1.5 How Laws of Physics differ at the Nano Scale-Quantum Size Effects.....	4
1.1.6 Quantum Size Effects on Physical Properties .....	7
1.1.7 What is Nano Chemistry?.....	11
1.2 Classification of Nano Materials.....	12
1.2.1 Natural/Non Engineered Nano Materials .....	12
1.2.2 Engineered Nano Structured Materials .....	17
1.3 History of Nano Technology .....	19
1.4 Unique Physico-Chemical, Mechanical, Electrical, Optical and Magnetic Properties of Nano Materials .....	21
1.4.1 Reasons for Nano Materials Exhibiting different Properties from Bulk .....	21
1.4.2 Specific Properties of Nano Materials which have Great Role in Routine Applications .....	21
1.4.3 Unique Physical Properties of Nano Materials .....	23
1.4.4 Summary of Importance of Properties of Nano Materials and their Applications .....	38
1.5 Current Industrial Applications of Nano-Technologies .....	40
1.5.1 Improving Product Performance .....	40
1.6 Engineering Principles and Initiatives of Nano Technology.....	41
1.6.1 Process Engineering, Design and Manufacturing.....	41
1.6.2 Fabrication Techniques for Engineered Nano Materials.....	42
1.6.3 Precision Engineering.....	44
1.6.4 Characterization.....	45
1.7 Future Nano Technologies .....	45
1.7.1 High Precision Engineering Process .....	45
1.7.2 Integrated Chip Technologies (ICT) .....	46
1.7.3 Optics .....	46

1.7.4 Transport .....	46
1.7.5 Medical.....	46
1.7.6 The Chemical Industry .....	46
1.8 Human Health and Environmental Risks of Nano Materials .....	47
1.8.1 Human Health Impacts of Nanomaterials .....	47
1.8.2 Health Risk Assessment of Nano Materials .....	48
1.8.3 Environmental Effects of Nanotechnology .....	49
<b>References.....</b>	<b>49</b>
<b>Recommended Reference Materials Books.....</b>	<b>51</b>
<b>Web Sites .....</b>	<b>52</b>

## Chapter 2: Carbon Nanotubes and their Technologies Applications

2.1 Introduction.....	53
2.2 History of Discovery of Fullerenes and Carbon Nano–Tubes and their Salient Features .....	54
2.2.1 Fullerenes .....	54
2.2.2 Carbon Nano Tubes.....	55
2.2.3 Carbon Nano Buds .....	59
2.2.4 Carbon Nano Fibers.....	60
2.3 Special Properties of Carbon Nanotubes.....	61
2.3.1 Chemical Reactivity .....	62
2.3.2 Electrical Conductivity.....	62
2.3.3 Thermal Conductivity.....	63
2.3.4 Optical and Electronics properties.....	63
2.4 Mechanical Strength.....	65
2.5 Carbon Nano Tubes Growth Mechanism.....	66
2.5.1 Multiple Growth Mechanisms in Operation (62-66).....	66
2.5.2 Role of Hydrogen Flow Rate on the Growth of CNT .....	67
2.5.3 The Role of Reaction Temperature .....	68
2.6 Production Methods for Carbon Nanotubes and Carbon Nanofibers.....	69
2.6.1 Introduction .....	69
2.6.2 Arc Discharge.....	69
2.6.3 Laser Ablation .....	74
2.6.4 Chemical Vapor Deposition (CVD).....	75
2.7 Characterization Tools and Techniques used for Nanotubes .....	79
2.8 Purification Techniques of CNT .....	80
2.8.1 Oxidation.....	80
2.8.2 Acid Treatment.....	80
2.8.3 Ultra Sonication.....	80
2.8.4 Magnetic Purification .....	80
2.8.5 Micro Filtration .....	81

2.8.6 Cutting.....	82
2.8.7 Functionalization.....	82
2.8.8 Chromatography.....	82
2.9 Important Industrial and Bio-Medical Applications of Carbon Nanotubes (CNTs)....	82
2.9.1 CNT- Composites and their Tensile Strength and Elasticity.....	83
2.9.2 Field Emission.....	84
2.9.3 Electrochemistry.....	85
2.9.4 Electronics.....	88
2.9.5 Recent Research on Some Special Applications of CNTs.....	89
2.9.6 Current Hurdles on the Application of CNTs.....	92

**References..... 92**

**Chapter 3: Nano/Micro Fabrication Technologies**

3.1 Nano/Micro Fabrication Techniques-Introduction.....	100
3.2 Nano/Micro Fabrication Techniques (1-3).....	101
3.2.1 Top-Down Approach.....	101
3.2.2 Bottom-up Methods for Nano Fabrication (21-29).....	127

**References..... 150**

**Chapter 4: Micro Electro Mechanical Systems (MEMS) and Nano Electro Mechanical Systems (NEMS)**

4.1 Micro Electro Mechanical Systems (MEMS) and Nano Electro Mechanical Systems (NEMS).....	154
4.1.1 Introduction.....	154
4.1.2 MEMS Main Components.....	155
4.1.3 MEMS and Nano Technologies - their Interdependence.....	155
4.1.4 Overview and History of Development.....	156
4.1.5 MEMS - Applications.....	158
4.1.6 Markets for MEMS.....	162
4.2 Micro Fabrication Techniques for MEMS.....	163
4.2.1 Micro Fabrication Techniques.....	163
4.2.2 MEMS Manufacturing Technologies.....	164
4.3 Process Control-Industrial.....	171
4.4 Concerns and Future Development.....	171
4.4.1 Concerns.....	171
4.5 Nano Electro Mechanical Systems (NEMS).....	172
4.5.1 NEMS General Applications.....	172
4.5.2 NEMS -Technological Challenges.....	173
4.5.3 NEMS- Fabrication Techniques.....	174

**References..... 176**

## **Chapter 5: Quality Control, Standards and Metrology for Nano-Technology**

5.1	Quality Control in Nano-Technology .....	179
5.1.1	Introduction .....	179
5.1.2	Classification of Nanostructures as per Dimensions .....	179
5.2	Standards for Nano Technology.....	181
5.2.1	Need for New Nano Standards and Current Challenges .....	181
5.2.2	Current Status .....	182
5.2.3	Calibration.....	185
5.2.4	Traceability.....	185
5.2.5	Tolerance.....	185
5.3	Nano Metrology .....	186
5.3.1	Introduction .....	186
5.3.2	History of SEM & AFM Development .....	187
5.3.3	Atomic Force Microscope (AFM).....	187
5.3.4	Scanning Electron Microscopy (SEM).....	188
5.3.5	Comparison of AFM and SEM Techniques .....	190
5.3.6	Scanning Tunneling Microscope (STM).....	196
5.3.7	Transmission Electron Microscopy (TEM).....	196
	<b>References.....</b>	<b>197</b>

## **Chapter 6: Applications of Polymers/Organics, Liquid Crystals, Nano-Composites and Ferro-Fluids in Nano Technology**

6.1	Applications of Polymers/Organics in Nano Technology.....	199
6.1.1	Polymers in Top-Down Nanotechnology .....	200
6.1.2	Polymer in Bottom-Up Nano-Technology .....	202
6.1.3	Supra Molecular Polymers .....	204
6.1.4	Application of Polymers in Nano Medicine.....	205
6.1.5	Challenges for Application of Polymers in Nanotechnology .....	207
6.1.6	Fuel Cell Applications.....	208
6.1.7	Application of Liquid Crystals and Flexible Flat Panel Display.....	208
6.2	Nano – Composites .....	218
6.2.1	Nano Composite Materials.....	218
6.2.2	Clay Composites.....	219
6.2.3	Polymer Composites.....	219
6.2.4	Carbon Nanotube-Reinforced Composites.....	223
6.2.5	Nanofiber-Reinforced Composites.....	224
6.2.6	Metal Matrix Nano-Composites .....	225
6.3	Defense Applications of Nano Composites .....	226
6.3.1	High Performance Fibre/Fabrics .....	226
6.3.2	Ballistic Protection .....	227

---

6.3.3	Microwave Absorbers .....	227
6.3.4	Refractive Index Tuning.....	227
6.4	Application of Ferro-Fluids in Nano Technology .....	228
6.4.1	What are Ferro-fluids?.....	228
6.4.2	Forces involved in the Formation of FF .....	228
6.4.3	Surfacted Ferro-fluids (SFF) .....	229
6.4.4	Ionic Ferro-fluids (IFF) .....	230
6.4.5	Magnetic Behavior of Ferro-fluids .....	231
6.4.6	Ferromagnetic Materials.....	232
6.4.7	Ferro-fluids Applications .....	233
6.4.8	Current and Future Ferro-fluid Technologies.....	237
<b>References</b> .....		<b>241</b>

## **Chapter 7: Role of Surface and Colloid Chemistry in Nano-Technology**

7.1	Colloids .....	249
7.1.1	Introduction .....	249
7.1.2	Types of Colloids .....	250
7.1.3	Colloidal Surfaces and Interfaces.....	251
7.1.4	Colloidal Dispersions-Characteristic Features .....	253
7.1.5	Mechanisms for Reduction of Overall Surface Energy.....	257
7.1.6	Inter Molecular Forces and Colloidal Forces .....	257
7.2	Liquid Phase (Colloidal Phase) Synthesis for Production of Nanostructured Materials/Nanoparticles .....	273
7.2.1	Methods for Production of Nano Systems.....	274
<b>References</b> .....		<b>279</b>

## **Chapter 8: Molecular Manufacturing, Future Nano Technologies and Dexler-Smalley Debate**

8.1	Molecular Manufacturing.....	280
8.1.1	What is Molecular Manufacturing?.....	280
8.1.2	How the Precise Control the Sequence and/or Position of the Reactions at Atomic or Molecular Lever can be Achieved?.....	281
8.1.3	Molecular Manufacturing Importance in Future Nanotechnologies .....	282
8.1.4	Benefits of Molecular Manufacturing .....	283
8.1.5	Potential Negative Effects of Molecular Manufacturing.....	284
8.2	Molecular Manufacturing - Possible Approaches for Production.....	284
8.2.1	Polymer Techniques .....	284
8.2.2	Solids Built in Solution .....	285
8.2.3	Solids Built in Machine-phase .....	285
8.2.4	Integrated Molecular Manufacturing.....	286
8.2.5	Molecular Manufacture - Enabling Tools/Technologies.....	286

**(xx) Contents**

---

8.3	Production of Molecular/Nano Structures by Bottom-Up Methods.....	288
8.3.1	Chemical Synthesis .....	288
8.3.2	Self Assembly .....	289
8.3.3	Positional Assembly .....	291
8.3.4	Challenges in Self Assembly.....	293
8.4	Current Practice and Applications of Nano Bio Systems/Bio Nano Technology .....	294
8.4.1	Approaches for Constructing Bio Nano Systems .....	294
8.4.2	Latest Developments in the Applications of Nano-Biomaterials .....	295
8.5	Drexler-Smalley Debate - Realistic Projections on Molecular Nano Technology.....	299
8.5.1	Essence of Drexler – Smalley Debate on Molecular Manufacturing .....	299
8.5.2	K. Eric. Drexler’s Future Projections on Molecular Manufacturing.....	299
8.5.3	Exchange of Letters between Smalley and Drexler in Chemical and Engineering News .....	301
8.5.4	Commentary on Public Perception of Nanotechnology .....	303
8.5.5	Molecular Manufacturing Present: Overview.....	303
	<b>References.....</b>	<b>304</b>

**Chapter 9: Semiconductors, Nano Size Effects and Moore’s Law**

9.1	Semiconductor Materials and their Properties .....	306
9.1.1	Conductors .....	306
9.1.2	Semiconductors .....	307
9.2	Semiconductor Devices.....	315
9.3	Growing Silicon Demand for Semiconductors .....	316
9.3.1	Poly-silicon Manufacturers .....	316
9.3.2	Global Demand for Silicon.....	317
9.3.3	Poly Silicon Production.....	318
9.4	Nano Size (Quantum) Effects on Semiconductors.....	318
9.4.1	Difference in Energy Band Gap in Bulk Semiconductors and Nano Sized Semiconductors .....	318
9.5	Moore's Law.....	321
9.5.1	Nano Fabrication Techniques and Moore’s Law .....	323
9.5.2	Status of Moore's Law .....	323
9.5.3	Prospects to Replace Si Electronics .....	324
	<b>References.....</b>	<b>325</b>

**Chapter 10: Quantum Computing**

10.1	Quantum Theory .....	327
10.1.1	The Essential Elements of Quantum Theory.....	327
10.2	Quantum Devices .....	327
10.3	Quantum Computing .....	327
10.3.1	Quantum Computer.....	328

10.3.2 Quantum Decoherence .....	330
10.3.3 A Comparison of Classical and Quantum Computing .....	331
10.3.4 Superposition.....	331
10.3.5 Entanglement.....	332
10.3.6 Choosing your Qubit.....	333
10.3.7 Quantum Programming.....	334
10.3.8 The Problems - and Some Solutions .....	335
10.3.9 Quantum Dots as Qubits in Quantum Computing.....	336

<b>References.....</b>	<b>337</b>
------------------------	------------

## **Chapter 11: Quantum Dots, Nano-Photonics and their Applications**

11.1 Quantum Dots .....	338
11.1.1 Introduction .....	338
11.1.2 Structure of Quantum Dots .....	338
11.1.3 Quantum Confinement in QDs.....	339
11.1.4 Size dependent Fluorescence in QDs .....	340
11.1.5 Modeling Quantum Confinement.....	341
11.1.6 Optical and Electronic Properties of Quantum Dots .....	341
11.1.7 Quantum Dot Materials.....	342
11.1.8 Quantum Dot Synthesis Techniques .....	343
11.1.9 Core-Shell Quantum Dots .....	348
11.1.10 Types of Core-Shell Quantum Dots .....	348
11.1.11 Choosing a Shell Material for Type-I Systems .....	349
11.1.12 CdSe-ZnS Core-Shell System .....	349
11.1.13 General Applications of Quantum Dots .....	350
11.1.14 Potential Defense Applications of Quantum Dots .....	352
11.1.15 Quantum Dots for Biological and Medical Applications .....	353
11.2 Nano Photonics .....	360
11.2.1 Introduction.....	360
11.2.2 Photonic Crystals .....	361
11.2.3 Theory of Nano Photonics.....	363
11.2.4 Fabrication of Photonic Crystals.....	365
11.2.5 Applications of Nano Photonics.....	367

<b>References.....</b>	<b>368</b>
------------------------	------------

## **Chapter 12: Thin Films**

12.1 Introduction.....	372
12.2 Applications of Thin Films .....	373
12.2.1 Optical Coatings.....	373
12.2.2 Photovoltaic.....	373
12.2.3 Thin films in Semiconductors .....	375
12.2.4 Photo Electrochemical Cells (PEC) .....	376

**(xxii) Contents**

---

12.2.5	Optoelectronics .....	376
12.2.6	Flat Panel Displays.....	376
12.2.7	Data Storage .....	376
12.2.8	Super Capacitor .....	377
12.2.9	Gas Sensors .....	377
12.3	Thin Film Deposition Processes.....	378
12.3.1	Physical Vapour Deposition (PVD) .....	379
12.3.2	Chemical and Electrochemical Methods for Thin Film Deposition.....	392
12.3.3	Electro Chemical Deposition for Thin Films .....	394
12.4	Plasma Deposition/Plasma Enhanced Surface Modification (11-14) .....	403
12.4.1	Polymer Surface Modification Techniques.....	404
12.4.2	Advantages of Plasma Surface Modification or Polymerization .....	404
12.4.3	Mechanism .....	404
12.4.4	Classification of Plasma Enhanced Surface Modification Process .....	405
12.5	Nano Structured Thin Films by Colloidal Phase Synthesis .....	407
12.5.1	Colloidal Phase Methods for Thin Films .....	407
12.6	Characterization of Thin Film .....	410
12.6.1	<i>In-situ</i> Characterization Techniques-Quartz Crystal Microbalance .....	410
12.6.2	<i>Ex-situ</i> Thin Film Characterization Techniques.....	410
12.6.3	Sheet Resistivity .....	410
12.6.4	Optical Transmission.....	411
12.6.5	Compositional Analysis .....	411
12.6.6	Mechanical Testing .....	411
<b>References</b> .....		<b>412</b>

**Chapter 13: Nano-Bio-Info-Cogno (NBIC) Convergent Technologies**

13.1	Introduction.....	414
13.1.1	What are Convergent Technologies? .....	414
13.2	Synergic Interplay of Intersecting Technologies in CT .....	416
13.3	The Synergistic Interplay of Technologies in NBIC Convergent Technologies.....	416
13.4	Definition and Scope of Various Convergent Technologies as per International Scientific Organizations .....	417
13.4.1	Enabling Technologies.....	418
13.5	Major Thrust Areas and Overall Potential of Converging Technologies.....	419
13.6	Future Visions for Unique & Significant Applications of Convergent Technologies for improvement of Human Performance and Quality of Life .....	420
13.7	Limits of Convergent Technologies .....	423
13.8	Strategies for Effective Realization of Benefits of Convergence Technologies for the Improvement Human Performance and Quality of Life .....	424
<b>References</b> .....		<b>426</b>

## Chapter 14: Opportunities and Challenges in Newly Emerging Nano-Technologies and Strategies for their Utilization for Sustainable Development

14.1	Opportunities and Issues/ Concerns in the Application of Nano Technologies.....	427
14.1.1	Opportunities.....	427
14.1.2	Concerns/Issues.....	427
14.2	Challenges in the Application of Nano Technologies.....	428
14.2.1	Grand Challenges .....	428
14.2.2	Emerging Nanotechnologies – Specific Challenges/Barriers/Solutions in their Application in Various Fields .....	429
14.3	Nanotechnology-Sustainable Processes-Materials and Resources.....	429
14.3.1	Manufacturing using Integrated Nanodevices.....	430
14.3.2	Designing and Manufacturing Nano-Materials.....	430
14.3.3	Optimization of Nano Materials Engineering Process – Concept to Product /Application.....	430
14.3.4	Materials Selection, Preparation, and Fabrication.....	432
14.3.5	Processing, Properties, and Performance .....	432
14.3.6	Product/Application .....	432
14.4	Possible Nano based Solutions for Addressing the Challenges .....	433
14.5	Impact of Nano Technologies on Various Industries and Challenges .....	433
14.5.1	Nano Informatics.....	433
14.5.2	Telecom and Datacom.....	434
14.5.3	Impact of Nanotechnologies on Energy Technologies (12-32).....	434
14.5.4	Impact of Nano Technologies on Environment (33-39) .....	435
14.5.5	Impact of Nanotechnologies on Water Purification and Global Drinking Water Supply .....	437
14.5.6	Role of Nano Technologies on Global Sustainable Agriculture - Optimization of Production and Distribution of Agriculture Products ....	437
14.5.7	Nano Technologies in Health Care, Medicine, Bio-Diagnostics .....	438
14.5.8	Risk Assessment for Nano Materials .....	438
14.5.9	Exposure Assessment of Nanomaterials .....	438
14.5.10	Risk Management of Carbon Nanotubes.....	438
14.5.11	Nanotechnology Implications in Natural and Global Process.....	440
14.6	Global Challenges in Nano Technologies Application .....	441
14.6.1	Global Collaboration in Nanotechnology Applications for Meeting Development Challenges.....	441
14.6.2	International Competition for Developing Cutting Edge Nano Technologies .....	441
14.6.3	Global Governance to Promote Nanotechnology for Development.....	442
14.6.4	Challenges for Developing Countries in Promotion of Nanotechnologies for Development.....	442

## **(xxiv) Contents**

---

14.7	Important Strategies to be Adopted for Realizing the Benefits of Newly Emerging Nano Technologies and Addressing the Challenges in their Implementation for Sustainable Growth .....	443
14.7.1	Funding by Government and Private Industries and Global Collaboration in Nanotechnology Applications for Meeting Development Challenges .....	443
14.7.2	Private/Industry Participation in Nano Technology Growth.....	444
14.8	Educational Challenges and Research Funding in Promotion of Nano Technologies.....	446
14.8.1	Development of an Inter-agency Group to Foster Research, ..... Curricula, and Evaluation.....	447
14.8.2	Creation of Scientific and Technological Infrastructure for Advanced Nano Technology Research .....	447
14.8.3	Interdisciplinary Training on Nano Technologies.....	447
14.9	Safety and Regulatory Issues Need to be Addressed on the Application of Nano Technologies .....	448
14.9.1	Public Engagement on the Use of Nanotechnology .....	448
14.9.2	Communication Efforts on Health, Safety, and Environmental Guidelines.....	448
14.10	Policy Issues on Nanotechnology .....	449
14.11	India's Research Initiatives in Nanotechnologies and Specific Challenges .....	449
14.12	Careers Opportunity in Nanotechnology.....	451
14.12.1	Major Categories of Nanotechnologies for Career Opportunities.....	451
14.12.2	Scope of Applications of Nano Technologies .....	451
14.12.3	What are Major Career Areas/Fields in India?.....	451
14.12.4	Great Potential for Future Career Opportunities in Material Processing Informatics and Quantum Computation .....	452
14.12.5	Current Career Opportunities in Nano Technologies.....	452
	<b>References.....</b>	<b>453</b>

## **Chapter 15: Laboratory Exercises**

15.1	Introduction .....	458
15.2	Experiment -1 Testing of Natural Materials for Nano-Structures.....	458
15.2.1	Natural Nano Materials to be Tested.....	458
15.3	Experiment 2: Testing Self Assembly in Liquid Crystals and Effect of Temperature .....	464

15.4	Experiment 3: Sensor Applications of Localized Surface Plasmon Resonances (LSPR) in Colloid Nano Particles .....	469
	References .....	486
	Resources for Further Reading.....	487
15.5	Experiment 4: Testing Super Hydrophobic Materials.....	487
15.6	Experiment 5: Application of Ferro-Fluids .....	494
	Resources for Further Reading.....	503
15.7	Experiment 6: Synthesis and Characterization of CdSe Quantum Dots .....	503
	15.7.1 Theory .....	504
	15.7.2 Particle in Box Model for Explaining Quantum Mechanical behavior and Resultant Fluorescence Spectra of QDS.....	504
	15.7.3 Synthesis of Quantum Dots.....	505
	15.7.4 Preparation of CdSe Quantum Dots .....	507
	15.7.5 Spectral Characterization of QDs and Determination of Sizes .....	508
	15.7.6 Data Analysis: Determination of the Size of the QDs.....	508
	Resources for Further Reading.....	511
	<b>Questions.....</b>	<b>513</b>
	<b>Index.....</b>	<b>531</b>
