Preface	(vii)
Acknowledgement.....	(ix)
Abbreviations	(xxiii)

PART - I

PHARMACOLOGY OF DRUGS ACTING ON RESPIRATORY SYSTEM

Chapter - 1

Drugs Used to Treat Asthma

Introduction	3
Asthma Triggers	3
Diagnostic Testing	3
Adrenoceptor Agonists	5
Salmeterol	5
Albuterol	6
Anticholinergics	6
Methylxanthines	6
Anti Inflammatory Agents.....	7
Corticosteroids	8
Mast Cell-Stabilizing Agents.....	10
Antileukotrienes.....	11
References	13

Chapter - 2

Drugs Used to Treat Allergic Rhinitis

Definition	14
Diagnosis.....	14
Paediatrics	14
Testing	14
Treatment	16
Pharmacological Therapy	17
Intranasal Corticosteroids	17
Oral Antihistamines	17
Decongestants	19
Leukotriene Inhibitors	19
Anticholinergics	19
Nasal Antihistamines	21
Ocular Medications	21
Nasal Saline	21

Immunotherapy	21
Omalizumab (Xolair)	22
Surgical Therapy	23
References	23

Chapter - 3

Drugs Used to Treat Cough, COPD and Cystic Fibrosis

Cough.....	24
Introduction	24
Treatment of Cough	26
Antitussives (Central Cough Suppressants).....	26
Expectorants.....	27
Antihistamines.....	29
Bronchodilators	31
Relief of Nasal Congestion and Other Cold Symptoms	32
Sympathomimetic Drugs	32
Pharyngeal Demulcents	33
Traditional Cough and Cold Remedies.....	34
Recommendations for Management of a Simple Cough or Cold or Sore Throat....	34
COPD (Chronic Obstructive Pulmonary Disease).....	35
Pathophysiology.....	35
Chronic Bronchitis.....	37
Emphysema.....	38
Etiology of COPD.....	38
Diagnosis of COPD	38
Treatment of Chronic Obstructive Pulmonary Disease	39
Pharmacological Therapy of COPD Exacerbations	42
Cystic Fibrosis	42
Epidemiology and Etiology	43

Pathophysiology	43
Clinical Presentation and Diagnosis.....	45
Laboratory Tests.....	46
Treatment.....	46
Nutrition	47
Future Direction of Therapy	52
References.....	52

Chapter - 4

Respiratory Stimulants

Pharmacotherapy of Stock	53
Example of Respiratory Stimulant Drugs	53
Doxapram	53
Caffeine.....	54
Mechanism of Action	54
Pharmacokinetics.....	54
References.....	55

PART - II

DRUGS AFFECTING GASTROINTESTINAL TRACT

Chapter - 5

Drugs Used to Treat Peptic, Ulcer Disease

Classification by Region/Location	59
Physiology of Acid Secretion.....	60
Pathogenesis	61
Signs and Symptoms	62
Complications.....	62
Differential Diagnosis.....	62
Treatment	62
Neutralization of Gastric Acid/	
Antacids.....	63
Reduction of Gastric Acid.....	64
H ₂ -Receptor Antagonists	64
Proton Pump Inhibitors (PPIs).....	66
Prostaglandin Analogues.....	68
Mucosal Protective Agents	70
Sucralfate.....	70
Colloidal Bismuth Compounds	71
Surgery	72
References	72

Chapter - 6

Drugs Used in Constipation

Introduction.....	74
Causes.....	74
Primary	74
Diet	74
Medication.....	74
Metabolic and Muscular.....	74
Structural and Functional Abnormalities	74
Drugs Associated with Constipation.....	74
Treatment.....	75
Non Pharmacological Measures.....	75
Drugs Available to Treat Constipation.....	76
Bulk-Forming Laxatives	77
Osmotic Laxatives	77
Stimulant Laxatives.....	77
Other Drugs.....	79
Novel Agents	79
Serotonin 5-HT ₄ -Receptor Agonists	79
References	80

Chapter - 7

Emetics and Antiemetic Drugs

Emesis (Vomiting)	81
Control of Vomiting.....	81
Causes	82
Emetics	83
Emetic Drugs	83
Apomorphine.....	83
Ipecacuanha	83
Antiemetics.....	84
Introduction	84
Classification - Antiemetic Drugs	84
H ₁ Antihistamines and	
Muscarinic Antagonists	84
Selective 5-HT ₃ Antagonists	85
D ₂ Antagonists.....	85
Substituted Benzamides	85
Phenothiazines.....	87
Butyrophenones	87

Cannabinoids (Dronabinol, Nabilone)	87
Dronabinol	87
Nabilone	87
Glucocorticoids.....	87
Dexamethasone, Methylprednisolone	87
Benzodiazepines.....	88
Diazepam, Lorazepam	88
Neurokinin-1 (NK ₁) Antagonists	88
Aprepitant, Fosaprepitant	88
Therapeutic Uses of Antiemetics	89
References	90

Chapter - 8

Drugs Used in Diarrhoea

Introduction	91
Types of Diarrhoea	91
Secretory Diarrhoea	91
Osmotic Diarrhoea	91
Exudative Diarrhoea	91
Motility Related Diarrhoea	91
Inflammatory Diarrhoea	92
Dysentery	92
Differential Diagnosis.....	92
Infections.....	92
Malabsorption	92
Irritable Bowel Syndrome	93
Treatment	93
Oral Rehydration Therapy	94
Antimotility and Antisecretory Agents	94
Opioids	94
α ₂ Adrenergic Receptor Agonists	96
Octreotide and Somatostatin.....	96
Absorbent Agents	96
Bulk-Forming and	
Hydroscopic Agents	96
Bile Acid Sequestrants.....	97
Bismuth	98
Other Agents	98
Alternative Therapies.....	98
References	102

Chapter - 9

Digestants and GERD

Digestants.....	103
-----------------	-----

Examples of Digestants	103
Digestants in Gastric Dysfunction	104
Digestants in Pancreatic Insufficiency	104
GERD	104
Pathophysiology	104
Signs and Symptoms	105
Diagnosis	105
Treatment	106
Antacids and Antacid-Alginic Acid Products	106
H ₂ -Receptor Antagonists (H ₂ RAs)	107
Proton Pump Inhibitors (PPIs)	107
Promotility Agents	108
References	108

Chapter - 10

Appetite Stimulants and Suppressants

Appetite Stimulants	109
Drugs used as Appetite stimulants	109
Alcohol (10%)	109
Magestrol	109
Dronabinol	109
Dexamethasone	109
Vitamin B12, zinc	110
Appetite Suppressants/ Anorexiants	110
Classification: Drugs acting on GIT	110
Anorexiants	110
Centrally Acting Anorexiants	110
Adrenergic agents	110
Amphetamine	110
5-HT Agonists	110
Fenfluramine	110
Drugs acting on both Adrenergic and 5-HT Receptors	110
Sibutramine	111
Cannabinoid Receptor Antagonists	111
Rimonabant	111
Anorexiant Acting on GIT	111
Bulk Anorexiant;	111
Methylcellulose	111
Non-Absorbable Fat Substitutes	111
Olestra	111
Lipase Inhibitors	111
Orlistat	111

Chapter - 11	Antistaphylococcal
Carminatives	(Penicillinase-Resistant) Penicillins.....
Introduction.....	138
 PART - III	
CHEMOTHERAPEUTIC DRUGS	
Chapter - 12	Aminopenicillins.....
General Principles of Chemotherapy	139
Definitions	144
Classification	145
Problems with Antimicrobials.....	145
Resistance of Microorganism can be-	146
Principles	146
Principle of Antibiotic Dosing	147
Combined use of Antimicrobials.....	147
Disadvantages of Combination	147
Chapter - 13	β-Lactamase Inhibitors (Clavulanic Acid, Sulbactam and Tazobactam)
Sulfonamides, Trimethoprim and Cotrimoxazole	147
Sulfonamides	147
Antibacterial Spectrum	148
Classification.....	148
General Properties	148
Metabolism and Excretion	149
Trimethoprim-Sulfamethoxazole	150
Gastrointestinal Infections	152
Respiratory Infections	153
References	154
Chapter - 14	Chapter - 15
Cell Wall Inhibitors	Protein Synthesis Inhibitors
Classification of Agents Affecting Cell Wall Synthesis.....	Aminoglycosides
β-Lactam Antibiotics.....	155
Penicillin's	Classification.....
General Properties	155
Classification	155
Penicillins	155
Mechanisms of Resistance	156
Natural Penicillins	157
Antistaphylococcal	Antistaphylococcal
(Aminopenicillins) Penicillins.....	(Penicillinase-Resistant) Penicillins.....
Cephalosporins	138
Classification	139
Antipseudomonal Penicillins	139
Cephalosporins	142
Classification	142
Antimicrobial Activity	144
Pharmacokinetic Features	145
Clinical Uses.....	145
Monobactams	Monobactams
β-lactamase Inhibitors (Clavulanic Acid, Sulbactam and Tazobactam)	147
β-Lactamase Inhibitors	147
β-Lactamase Inhibitors in Clinical Practice	148
Carbapenems.....	149
Other Cell Wall Synthesis Inhibitors.....	150
Vancomycin and Teicoplanin	150
Bacitracin	151
References	154
Classification.....	Microbial Resistance.....
General Properties	Kinetics.....
Metabolism and Excretion	Toxicity
Trimethoprim-Sulfamethoxazole	Drug Interactions
Gastrointestinal Infections	Heparin
Respiratory Infections	Individual Agents.....
References	Streptomycin
	Gentamicin
	Tobramycin
	Amikacin
	Netilmicin
	Kanamycin and Neomycin
	Spectinomycin
	Tetracycline's.....
	Classification
	Origin
	Chloramphenicol
	Macrolides
	Clindamycin/Lincomycin

Streptogramins	171
Quinupristin-Dalfopristin (Synercid)	171
References	172

Chapter - 16

Quinolones and Urinary Antiseptics

Quinolones	173
Introduction.....	173
Resistance to Quinolones.....	177
Therapeutic Uses of Quinolones	177
Genitourinary Infections.....	177
Prostatitis.....	178
Respiratory Diseases.....	178
Sexually Transmitted Diseases.....	179
Gastroenteritis	179
Skin and Soft Tissue Infections	180
Urinary Antiseptics.....	182
Methenamine.....	182
Nitrofurans (Nitrofurantoin)	182
Fosfomycin	184
References	184

Chapter - 17

Antimycobacterials

Tuberculosis.....	185
Transmission	185
Signs and Symptoms	185
Cause	185
Drugs {Multiple Drug Therapy}	186
Isoniazid	188
Rifampicin.....	189
Ethambutol.....	190
Pyrazinamide	190
Streptomycin.....	191
Cycloserine.....	191
DOTS	192
Prevention.....	192
Leprosy	192
Introduction.....	192
Classification Schemes for Leprosy	193
Tuberculoid/Paucibacillary	194
Lepromatous/Multibacillary	194

Physical Findings in Lepromatous Disease.....	194
Borderline (Dimorphous)	195
Indeterminate Leprosy	195
Bone Changes in Leprosy	195
Transmission of Leprosy	195
Diagnostic Tests.....	195
Histological Testing.....	196
Clofazamine.....	197
Dapsone	198
MDT Side-Effects.....	198
Complications of Medical Therapy.....	198
Surgical Treatments	198
References	199

Chapter - 18

Antifungal Drugs

Introduction.....	200
Types of Fungal Infections - Mycoses....	200
Classification of Antifungals	201
Azole Antifungals for Systemic Infections	201
Azoles – Mechanism	202
Ketoconazole	202
Fluconazole.....	204
Itraconazole	205
Voriconazole	205
Posaconazole	205
Amphotericin B	205
Flucytosine	207
Squalene Epoxidase Inhibitors.....	208
Terbinafine	208
Griseofulvin.....	209
Nystatin.....	209
Ciclopirox.....	209
Tolnaftate	210
Cell Wall Inhibitors	210
Spectrum.....	210
Undecylenic Acid	211
References	212

Chapter – 19

Antiprotozoal Drugs

Protozoal Infections	213
Malaria.....	213
Cause	213
Parasite Life Cycle	213
Classification of Anti Malarial Drugs according to Site of Action.....	214
Chloroquine	215
Amodiaquine	216
Piperaquine	217
Artemisinin (Qinghaosu) and its Derivatives	217
Quinine and Quinidine	218
Mefloquine	219
Primaquine.....	219
Atovaquone.....	220
Pyrimethamine	221
Proguanil: Chloroguanide	222
Antibiotics	222
Doxycycline	222
Halofantrine and Lumefantrine	223
Combination Therapy for Chloroquine Resistant Malaria	224
Treatment of Complicated P. falciparum	224
Anti-Amoebic Drugs	224
Life Cycle of E. histolytica	224
Therapeutic Classification of Anti-Amoebic Drugs	225
Metronidazole (Flagyl)	225
Tinidazole	227
Emetines	227
Chloroquine	228
Diloxanide Furoate (Luminal Amebicide).....	228
Iodoquinol.....	229
Antibiotics	229
Paromomycin Sulphate.....	229
Tetracyclines.....	230
Treatment of Specific Forms of Amebiasis	230

Chemotherapy for Trypanosomiasis	230
--	-----

Treatment	230
Melarsoprol	230
Pentamidine Isethionate	231

Nifurtimox	232
------------------	-----

Suramin	232
---------------	-----

Benznidazole	233
--------------------	-----

Chemotherapy for Leishmaniasis.....	233
-------------------------------------	-----

Life Cycle of the Causative Organism: Leishmania Species.....	233
Treatment	233

Chemotherapy for Toxoplasmosis	234
--------------------------------------	-----

Chemotherapy for Giardiasis	234
-----------------------------------	-----

References	234
------------------	-----

Chapter - 20

Anthelmintic Drugs

Helmintic Infections	235
Types of Worms.....	235
Intestinal Worms	235
Anthelmintic Drugs.....	235
Classification.....	236
Piperazine.....	236
Albendazole	237
Benzimidazoles.....	237
Mebendazole	238
Thiabendazole.....	238
Diethylcarbamazine	239
Niclosamide	239
Ivermectin.....	240
Suramin.....	241
Pyrantel Pamoate	242
Paraherquamide	243
Praziquantel	243
Oxamniquine	244
Bithionol	244
Metrifonate	244
Emodepside	245
Nitazoxanide.....	246
References	246

Chapter - 21

Antiviral Drugs

Introduction.....	247
Research in Antiviral Chemotherapy	247

Antiviral Agents.....	247
Antiviral Drugs: General Features	250
Amantadine and Congeners	250
Ribavirin	252
Acyclovir and Congeners.....	253
Vidarabine.....	255
Idoxuridine and Trifluridine	256
Iodoxuridine	256
Trifluridine.....	256
Foscarnet	257
Zidovudine	258
Deoxynucleosides used in AIDS.....	259
Stavudine	259
Didanosine.....	259
Lamivudine	260
Abacavir	260
Zalcitabine.....	260
HIV Protease Inhibitors	261
Saquinavir	261
Ritonavir.....	261
Indinavir.....	262
Nelfinavir	262
Amprenavir	262
Lopinavir–Ritonavir	262
Entry Inhibitors	262
Interferon's	262
References	263
 Chapter - 22	
Anticancer Drugs	
Introduction	264
Cell Cycle Specific Agents and	
Cell Cycle Non Specific Agents.....	265
Mechanism of Anticancer Drugs	265
Classification of Anticancer Drugs	265
Nitrogen Mustards.....	270
Mechlorethamine	270
Cyclophosphamide	270
Ifosfamide.....	271
Chlorambucil	272
Nitrosoureas	272
Streptozocin	272
Alkyl Sulfonates	273
Busulfan.....	273
Ethylenimines.....	273
Thiotepa.....	273
Triazenes	273
Dacarbazine.....	273
Antimetabolites	274
Folate Antagonists.....	274
Methotrexate	277
Gemcitabine	278
Purine Analogues	278
Thioguanine (6-Thioguanine).....	278
Mercaptopurine (6-Mercaptopurine)....	279
Fludarabine	279
Pentostatin.....	279
Cladribine	280
Pyrimidine Analogues	280
Cytarabine	280
Fluorouracil.....	280
Antibiotics.....	281
Doxorubicin and Daunorubicin	282
Idarubicin.....	283
Bleomycin.....	283
Mitomycin	283
Dactinomycin.....	284
Plicamycin	284
Plant-Derived Products	284
Vinca Alkaloids	287
Epipodophyllotoxins.....	288
Etoposide.....	288
Teniposide	288
Taxanes.....	288
Paclitaxel.....	288
Enzymes	289
L-Asparaginase.....	289
Hormone Derivatives.....	289
Tamoxifen.....	289
Estramustine.....	290
Flutamide	290
Buserelin and Leuprolide	291
Somatostatin Analogue.....	291
Miscellaneous Agents	291
Hydroxyurea.....	291
Procarbazine	292
Mitotane	292

Hexamethylmelamine	292
Cisplatin	293
Carboplatin	293
Mitoxantrone	293
Immunomodulating Agents.....	294
Levamisole	294
Interferon Alfa-2b	294
Interleukins	294
Aldesleukin.....	294
Cellular Growth Factors.....	294
Filgrastim	294
Sargramostim.....	295
New Drug Therapies for Cancer.....	295
Imatinib.....	295
Herceptin	295
Iressa	295
References.....	296

Chapter - 23

Chemotherapy of Sexually Transmitted Diseases

Chlamydia	297
Symptoms in men include.....	297
Diagnosis	297
Chemotherapy	297
Pregnancy	298
Epididymitis.....	298
Signs and symptoms	298
Diagnosis	298
Chemotherapy	298
Gonorrhea.....	298
Transmission factors	298
Signs & symptoms.....	298
Symptoms in Women.....	298
Symptoms in men.....	299
Diagnosis	299
HIV/ AIDS	299
Transmission Factors	299
Diagnosis	299
Chemotherapy	299
SYPHILIS	299
Signs and symptoms	299

Diagnosis.....	299
Chemotherapy.....	300

PART - IV

IMMUNOPHARMACOLOGY

Chapter - 24

Immunosuppressants and Immunostimulants

Introduction.....	303
Cell-mediated Immunity	303
Humoral Immunity.....	304
Immunosuppressant Drugs	304
Cyclosporine	305
Tacrolimus (Fk506)	306
Differences between CsA and TAC.....	307
Corticosteroids.....	308
Azathioprine	310
Mycophenolate Mofetil	310
Leflunomide.....	312
Methotrexate	312
Antilymphocyte Globulins (ALG) and Antithymocyte Globulins (ATG)	312
Muromonab-CD3	312
Rh _o (D) Immune Globulin	314
Basiliximab and Daclizumab	314
Infliximab.....	314
Omalizumab	314
Interferons	314
Thalidomide	315
Immunostimulants	316
Bacillus Calmette-Guérin	316
Levamisole	317
Thymic Factors.....	317
Cytokines	317
Myeloid Colony-Stimulating Factors	318
Other Cytokines	318
References	318

Chapter - 25	
Protein Drugs, Monoclonal Antibodies and Biosimilars	
Features of Biosimilar Medicine	319
Similarity to the Reference Drug.....	319
Some Biosimilars Approved	321
Polysaccharides.....	321
Proteins	321
Benefits of Biosimilars.....	321
Cost-Cutting Through Competition	321
Improved Accessibility for Patients	321
Encouragement for Innovation.....	321
Disadvantages.....	321
Extrapolating from Indications.....	321
Safety and Efficacy	321
Monoclonal Antibodies	322
Structure	322
The Production Process of Monoclonal Antibodies	322
Phage Display Technique.....	323
Problems	323
Applications of Monoclonal Antibodies	324
Therapeutic Applications of Mabs in Cancer Therapy.....	324
Therapeutic Applications of Mabs in the Treatment of Graft-Versus-Host Disease	324
Therapeutic Applications of Mabs in the Treatment of Asthma	324
Other Therapeutic Applications: Using Mabs in The Treatment of Sepsis and Viral Infections.....	324
Monoclonal Antibodies in the Diagnostic Assays Therapeutic Protein.....	325
Proteins Are Considered for the Following Facts.....	325
Scope of Protein Therapeutics:	325
Classification	325
Based on Pharmacological Effect, the Following Classification Applies	325
Classification Based on Molecular Types.....	326
Molecular Mechanism-Based Classification ..	326
Methods Used to Produce	
Recombinant Proteins	326
Human Insulin Production.....	326
Applications.....	327
References	327
 PART - V	
PRINCIPLES OF TOXICOLOGY	
Chapter - 26	
General Toxicity Testing	
Preclinical Includes Studies	332
Acute Toxicity.....	332
Studies on Acute Toxicity's Goal	332
Main Study.....	332
Acute Toxicity (OECD Guideline 420, 425)	
Parameters	332
Subacute Toxicity	332
Chronic Toxicity	333
Non Rodent Animal Species.....	334
Clinical Chemistry	334
Hematology	334
Chapter - 27	
Genotoxicity	
Example.....	335
Genotoxicity Assays	335
Somatic Cell Assays.....	335
Germ Cell Assay	335
Invitro Assays.....	335
References	336
Chapter - 28	
Carcinogenicity	
Activation of Proto Oncogenes	338
Oxidative Stress in Carcinogenesis.....	338
Current Perspectives	339
Future Directions	339
References	339
Chapter - 29	
Drug Therapy in Pregnancy	
Pharmacokinetics	340

Lipid Solubility.....	340	Characteristics of an Ideal Chelator	368
Molecular Size	340	Common Chelating Agents:	
Placental Transporters.....	340	Pharmacology and Toxicology.....	368
Protein Binding	341	Calcium Disodium Ethylenediamine	
Placental and Fetal Drug Metabolism....	341	Tetraacetic Acid (CaNa ₂ EDTA)	368
Pharmacodynamics.....	341	Calcium Trisodium DTPA	370
Maternal Drug Actions	341	D-Penicillamine	371
Therapeutic Drug Actions		British Anti Lewisite (BAL).....	371
in the Fetus.....	342	Meso-2,3-Dimercaptosuccinic	
Predictable Toxic Drug		Acid (DMSA)	372
Actions in the Fetus	342	Sodium 2,3 Dimercaptopropane-1-	
Teratogenic Drug Actions.....	342	Sulphonate (DMPS).....	373
Teratogenic Mechanisms	342	New DMSA Analogues	373
Defining a Teratogen.....	344	Monoisoamyl DMSA (MiADMSA)	374
FDA Pregnancy Categories	346	Monomethyl DMSA (MmDMSA) and	
References.....	352	Monocyclohexyl DMSA (MchDMSA) ..	374
Chapter - 30		Deferoxamine (DFO).....	375
Mutagenicity		Deferiprone (L1)	375
Types of Mutations.....	353	TETA	376
Mutagenicity Testing Methods.....	354	Nitrilotriacetic Acid (NTA)	376
References.....	354	References	377
Chapter - 31			
Introduction to Toxicology			
Manifestations of Toxicity	355	Chapter - 33	
Organ Toxicity.....	355	Management of Barbiturates, Morphine,	
Pulmonary Toxicity	355	Organophosphorus Compound	
Hepatotoxicity	356	Poisoning	
Nephrotoxicity	357	Clinical Symptoms of Morphine Poisoning ..	378
Neurotoxicity.....	357	Diagnosis of Morphine Poisoning	379
Immunotoxicity.....	357	Management of Morphine Poisoning	379
Insecticides	360	Clinical Symptoms and Management of	
Herbicides and Rodenticides	360	Barbiturates Poisoning	380
References.....	361	Clinical Symptoms of	
Chapter - 32		Barbiturates Poisoning	380
Heavy Metal Intoxication and Chelators		Diagnosis.....	380
Definitions	362	Management of Barbiturates Poisoning.....	381
Heavy Metal.....	362	Clinical Symptoms and Management of	
Lead.....	362	Organophosphorus	
Arsenic	364	compound Poisoning.....	381
Cadmium	365	Clinical Symptoms of Organophosphorus	
Mercury.....	367	Compound Poisoning	381
Chelating Agents	367	Diagnosis.....	382
Introduction.....	367	Management of Organophosphorus	
		Compound Poisoning	382
		References	383

Chapter - 34	
Management of the Poisoned Patient	
Introduction.....	384
Clinical Evaluation	384
General Management.....	386
Diagnostic Adjuncts	387
Gastrointestinal Decontamination	388
Disposition.....	389
A General Approach to the Treatment of Acute Poisoning	390
References	391
Chapter - 35	
Chronopharmacology	
Introduction.....	392
Cause for Chronopharmacology.....	393
Classification of Chronopharmacology	393
Chronopharmacokinetics.....	393
Chronotherapeutics	393
Advantages of Chronotherapy.....	394
Need of Chronotherapy	394
Chronopharmacotherapy.....	394
Advantage of Chronopharmacotherapy.....	394
Disadvantage of Chronopharmacotherapy ...	394
Ideal Characteristics of Chronopharmacotherapy.....	394
References	395
Index.....	397
