Preface (v)

Acknowledgement..... (vii)

Chapter 1

UV Visible Spectroscopy

1.1	Introduction	1
1.2	Theory	1
1.3	Principle (Lambert Beer Law)	4
1.3.1	Deviation of Beer-Lambert Law	6
1.3.2	Real Limitation and Deviation of Beer-Lambert Law	7
1.3.3	Chemical Deviations and Limitations to Beer-Lambert Law	8
1.3.4	Instrumental Deviations and Limitations to Beer-Lambert Law	8
1.4	Instrumentation	9
1.5	Types of UV Spectrophotometer	16
1.6	Advantage of Double Beam Spectrophotometer	18
1.7	Effects in UV Transitions	18
1.8	Chromophore	19
1.8.1	Effect of Conjugation	19
1.9	Pharmaceutical Applications.....	21
1.10	Woodward-Fieser Rules for Calculating Absorption Maxima	23

Chapter 2

Infra-Red Spectroscopy

2.1	Introduction	27
2.2	The Origin of IR Spectra	29
2.2.1	Fingerprint Region.....	29
2.3	Theory	29
2.4	Calculation of Vibrational Frequencies.....	33
2.4.1	Polyatomic Vibrational Spectra	34

(x) | *Contents*

2.4.2	Factors Influencing Vibrational Frequencies.....	34
2.5	Instrumentation	38
2.5.1	Single Monochromator Infrared Spectrophotometers	38
2.6	Applications of IR Spectroscopy	43

CHAPTER 3

Spectro Fluorimetry

3.1	Introduction	45
3.2	Types of Luminescence	46
3.3	Principle of Fluorescence Spectroscopy	46
3.4	Instrumentation	47
3.5	Factors Affecting Fluorescence.....	50
3.6	Effect of Concentration on Fluorescence Intensity.....	51
3.7	Advantages of Fluorescence Spectroscopy.....	51
3.8	Disadvantages of Fluorimetry	52
3.9	Applications of Fluorimetry.....	52
3.9.1	Applications in Inorganic Chemistry	52
3.9.2	Application in Organic Chemistry	53
3.9.3	Special Fluorometric Applications.....	53

CHAPTER 4

Flame Emission Spectroscopy

4.1	Introduction	55
4.2	Principle of Flame Photometer	55
4.3	Instrumentation	56
4.3.1	Fuel Gas, Pressure Regulator and Flow Meters.....	57
4.3.2	Atomisers	58
4.3.3	Nebuliser.....	59
4.3.4	Atomiser Burners	60
4.3.5	Mirrors.....	64
4.3.6	Slits	64
4.3.7	Monochromators	65
4.3.8	Filter	65

4.3.9	Detectors.....	65
4.3.10	Read Out Device or Recorder	65
4.4	Flame Photometer Procedure	65
4.5	Scheibe - Lomakin Equation.....	67
4.6	Applications of Flame Photometer	67
4.7	Advantages of Flame Photometer	68
4.8	Disadvantages of Flame Photometer.....	68

CHAPTER 4A

Atomic Absorption Spectroscopy

4.9	Introduction	70
4.10	Principle	70
4.11	Instrumentation	71
4.12	Working of AAS	75
4.13	Application of Atomic Absorption Spectroscopy	76

Chapter 5

Nuclear Magnetic Resonance

5.1	Introduction	77
5.2	Definition of NMR	78
5.3	Principle of NMR.....	78
5.3.1	The Spinning Molecules.....	78
5.3.2	Magnetic and Non-Magnetic Nuclei	78
5.4	Theory of NMR.....	79
5.4.1	Energy Transition.....	81
5.5	Nuclear Magnetic Resonance Spectrometers	83
5.5.1	Experimental Technique	84
5.5.2	Instrument.....	84
5.6	Chemical Shift.....	85
5.6.1	Units	86
5.6.2	Measurement of Chemical Shift	86
5.6.3	Causes of Chemical Shift.....	86
5.6.4	Shielding and Deshielding Effects	87

(xii) | Contents

5.6.5	Factors Affecting Chemical Shift	89
5.6.6	Spin-Spin Coupling	92
5.7	Interpretation of NMR Spectrum	97
5.7.1	Spectrum of Isomers - Dimethyl Ether and Ethanol	97
5.8	Applications of NMR Spectroscopy	99
5.9	Nuclear Magnetic Double Resonance (NVIDR)	99
5.10	Electron Paramagnetic Resonance (EPR)	100
5.10.1	FT-NMR	100
5.10.2	C ₁₃ NMR.....	101

Chapter 6

Mass Spectroscopy

6.1	Introduction	102
6.2	Principle	103
6.3	Instrumentation	103
6.4	Types of The Ion Produced	111
6.4.1	Molecular Ion (Parent Ion).....	111
6.4.2	Rearrangement Ions	112
6.4.3	Metastable Ions	112
6.4.4	Multiple Charged Ions	113
6.4.5	Isotope Ions.....	113
6.5	Mass Spectrum	114
6.5.1	Fragmentation Patterns	114
6.5.2	Mclafferty Rearrangements	117
6.6	Application of Mass Spectroscopy	118

Chapter 7

Chromatography

7.1	Introduction	120
7.2	Various Types of Chromatography	120
7.3	Techniques Based on Solute-Stationary Phase Interaction	121
7.3.1	Adsorption Chromatography.....	121

7.3.2	Partition Chromatography	121
7.3.3	Ion Exchange Chromatography	121
7.4	On the Basis of Chromatographic Bed Shape	121
7.4.1	Column Chromatography	121
7.4.2	Paper Chromatography	122
7.4.3	Thin Layer Chromatography	122

Chapter 8

Paper Chromatography

8.1	Introduction	123
8.2	Principle of Paper Chromatography	123
8.3	Uses and Applications of Paper Chromatography	124
8.4	Types or Modes of Paper Chromatography	124
8.5	Procedure in Paper Chromatography	127
8.5.1	Selection of Papers and Stationary Phase Used	127
8.5.2	Application of Sample	128
8.5.3	Mobile Phase	128
8.5.4	Detecting or Visualizing Agent	129
8.6	Quantitative Analysis	130
8.7	Qualitative Analysis	131
8.7.1	R _f Value	131
8.8	Applications of Paper Chromatography	131

Chapter 9

Thin Layer Chromatography

9.1	Introduction	134
9.1.1	Principle of Thin Layer Chromatography	134
9.2	Procedure of Thin Layer Chromatography	135
9.2.1	Requirements in Thin Layer Chromatography	135
9.3	Procedure	137
9.3.1	Plate Preparation	137
9.3.2	Capillary Spotters	137

9.3.3	Spotting the Plate	137
9.3.4	Location of Spots	138
9.3.5	Development Solvents.....	138
9.3.6	Mobile Phase	139
9.3.7	Developing a Plate	139
9.3.8	Visualization	141
9.3.9	Analysis	141
9.3.10	Preparative TLC.....	142
9.4	Applications of Thin Layer Chromatography.....	142

Chapter 10

Ion Exchange Chromatography

10.1	Introduction	145
10.2	ION Exchange Chromatography Principle.....	146
10.3	Types of ION Exchange Resins	148
10.4	Factors Affecting ION Exchange Separations	150
10.5	Applications of ION Exchange Chromatography	151

Chapter 11

Column Chromatography

11.1	Introduction	152
11.2	Principle	153
11.3	Procedure in Column Chromatography	153
11.4	Factors Affecting Column Efficiency	159
11.5	Application of Column Chromatography.....	160
11.6	Advantage of Column Chromatography.....	161

Chapter 12

Gas Chromatography

12.1	Introduction	162
12.2	Principle	162
12.3	Theoretical Plates (Plate Theory).....	163

12.4 Instrumentation	165
12.5 Applications of GLC	173

Chapter 13

High Performance Liquid Chromatography

13.1 Introduction	175
13.2 Chromatography – A Separation Science	176

Chapter 14

Affinity Chromatography

14.1 Introduction	192
14.2 Affinity Chromatography.....	192
14.3 Principle	193
14.4 Chromatographic Media	194
14.5 Immobilized Ligand	195
14.6 Attachment of Ligand to Matrix.....	196

Chapter 15

Electrophoresis

15.1 Introduction	200
15.2 Classification of Electrophoresis	201
15.3 Principle of Paper Electrophoresis.....	203
15.4 Gel Electrophoresis	211
15.5 Pulse Field Gel Electrophoresis (PFGE)	222
15.6 Cellulose Acetate Electrophoresis.....	226
15.7 Moving-Boundary Electrophoresis	230
15.8 Zone Electrophoresis	232

Chapter 16

Radio Immuno Assay (RIA)

16.1 Introduction	234
16.2 Components of Radioimmunoassay	235

(xvi) | Contents

16.3	Structure of Antibodies.....	236
16.4	Principle of Radioimmunoassay	237
16.5	Immune Reaction	237
16.6	Mathematical Expression of Principle of RIA	238
16.7	Reagents Used in Radio Immune Assay.....	239
16.8	Steps Followed in RIA.....	239
16.9	Advantages of Radio Immune Assay (RIA).....	240
16.10	Disadvantage of Radio Immune Assay.....	241
16.11	Uses of Radio Immune Assay (RIA).....	241
16.12	Limitation of the Radio Immune Assay (RIA)	241

Chapter 17

Elisa

17.1	Introduction	242
17.2	Procedure.....	243
17.3	Types of Elisa.....	243
17.4	Elisa Detection Options - Direct & Indirect.....	249
17.5	Bioluminescence Assay.....	250

Chapter 18

X-Ray Crystallography

18.1	History	254
18.2	X-Ray Diffraction.....	254
18.3	Production of X-Rays	255
18.4	Methods of X-Ray Diffraction	259
18.5	Bragg's Law.....	259
18.6	Source of X-Ray.....	260
18.7	Radioisotopes	262
18.8	Rotating Crystal Technique.....	263
18.9	Pharmaceutical Applications of X-Ray Diffraction.....	269

Chapter 19

Potentiometry

19.1	Principle of Potentiometry	274
19.2	Potentiometry Titration	275
19.3	General Method for Potentiometry.....	280

Chapter 20

Thermal Techniques

20.1	Introduction	288
20.2	Principle	288
20.3	DSC Thermogram	294
20.4	Factors Affecting DSC Curve.....	295
20.5	Applications of DSC.....	295
20.6	Thermogravimetric Analysis (TGA)	295
20.7	Types of Thermogravimetry.....	296
20.8	Principle of Thermo Gravimetry	296
20.9	TGA Curve.....	297
20.10	Instrumentation of TGA.....	298
20.11	Factors Affecting TGA	303
20.12	Advantages of TGA	303
20.13	Limitations of TGA.....	304
20.14	Applications of TGA	304
20.15	Introduction	305
20.16	Apparatus	306
20.17	Instrumentation	308
20.18	Working	309
20.19	Derivative Differential Thermal Analysis.....	310
20.20	Applications	311

Chapter 21

High Performance Thin Layer Chromatography (HPTLC)

21.1	Introduction	314
------	--------------------	-----

(xviii) | Contents

21.2 Principle	315
21.3 Advancement of HPTLC Over TLC	315
21.4 Working of HPTLC	316
21.5 Advantages.....	321
Question Bank	323
