Preface ..... **(vii)**

Acknowledgement ..... **(ix)**

I - Introduction 1

II - Open ArcMap 3

Exercise -1 Digitization of Toposheet (or) Digital database creation – Point features, Line features, and Polygon features (or) Geospatial database creation from given Toposheet 7

Exercise 1.1 Add Data (Toposheet into ArcMap Environment) 8

Exercise 1.2 Geo Referencing of Toposheet 13

Exercise 1.3 Rectification of Toposheet 20

Exercise 1.4 Add Spatial Reference to Toposheet 22

Exercise 1.5 Projection and Transformations 31

Exercise 1.6 Create Geo Spatial Databases with Feature Class 39

Exercise 1.7 Digitization of Toposheet 54

Exercise 1.8 Digitization Options and Snapping Tools 64

Exercise 2 Clip of the Toposheet 69

Exercise 3 Creation of Attributes 75

Exercise 4 Create Fields (Columns) 82

Exercise 5 Creation of Thematic Maps 87

Exercise 6 Creation of Map Elements and Outputs 91

Exercise 7 Analyzing Digitized Data: Estimating and Evaluating Geographic Feature 109

Exercise 8 Convert Polyline to Polygons 119

Exercise 9 Creation of ArcMap Document (.MXD) 122

Exercise 10 Display Labels, and Symbology of Features 126

Exercise 11 Coordinates Addition to Point Features 140

Exercise 12 Create Buffers 145

Exercise 13 Linking External Tables to Feature Classes 152

Exercise 14 Convert Text Data into Point Features 159

Exercise 15 Developing Digital Elevation Model (DEM) 169

Exercise 16 Creation of FCC Image 174

Exercise 17 Applications of GIS 186

Questions for GIS Lab 193
