

Pharmacognosy / Phytochemistry / Herbal Medicine

STUDENT FRIENDLY BOOKS WRITTEN AS PER PCI SYLLABUS BY DISTINGUISHED AUTHORS

Herbal Drug Technology

Kamal Yadav Gadda

Contents: 1. Herbs as Raw Materials 2. Biodynamic Agriculture 3. Indian Systems of Medicine 4. Pharmacognosy in Various Systems of Medicine 5. Nutraceuticals 6. Herbal Drug and Herb Food Interactions 7. Herbal Cosmetics 8. Herbal Excipients 9. Herbal Formulations 10. Evaluation of Drugs 11. Patenting and Regulatory Requirement of Natural Products 12. Regulatory Issues 13. Herbal Drug Industry 14. Schedule T Good Manufacturing Practice of Indian Systems of Medicine

2025 | 9789348734372 | BSPMP | 302 pp | PB | Rs. 650.00

Herbal Drug Technology

Sharada L. Deore

Rpt. 2024 | 9789391910983 | BSPMP
257 pp | PB | Rs. 350.00

Quick Review on Herbal Drug Technology

Vivekananda Mandal, Kavi Bhushan Singh Chouhan, Roshni Tandey

Rpt. 2025 | 9789391910143 | BSPMP | 184 pp | PB | Rs. 250.00

Indian Systems of Medicine

Soumya Bhattacharya and Mithun Rudrapal

Contents: 1. Fundamental Concepts of Ayurveda, Siddha, Unani and Homoeopathy Systems of Medicine 2. Naturopathy, Yoga and Aromatherapy Practices 3. Formulation Development of Various Systems of Medicine 4. Schedule T – Good Manufacturing Practice of Indian Systems of Medicine (ISM), Quality Assurance, Exports of ISM Medicine and Challenges in Monitoring the Safety of Herbal Medicines 5. TKDL, Geographical Indication Bill, Government Bills in AYUSH, ISM, CCRAS, CCRS, CCRH, CCRU

2025 | 9789348734976 | BSPMP | 224 pp | PB | Rs. 295.00

Pharmacognosy and Phytochemistry – I: Theory and Practical

Sharada L. Deore

Rpt 2025 | 9789391910396 | BSPMP
278 pp | PB | Rs. 450.00

Pharmacognosy and Phytochemistry – II: Theory and Practical

Sharada L. Deore

Rpt. 2025 | 9789391910631 | BSPMP
275 pp | PB | Rs. 425.00

Dietary Supplements and Nutraceuticals: Nutritional Requirements and Health Benefits

Mithun Rudrapal, Soumya Bhattacharya

Contents: 1. Diet, Nutrition and Public Health 2. Dietary Supplements and Nutraceuticals 3. Phytochemicals as Nutraceuticals 4. Free Radicals, Human Diseases and Antioxidants 5. Quality, Safety and Regulatory Aspects

2023 | 9788196146771 | BSPMP | 136 pp | PB | Rs. 225.00

Pharmacognosy and Phytochemistry – II

Vishakha S Kulkarni, V. Alagarsamy

Rpt. 2025 | 9789391910150 | BSPMP | 156 pp | PB | Rs. 225.00

Contents: 1. Introduction to Pharmacognosy
2. Classification of Crude Drugs 3. Quality Control of
Crude Drugs 4. Secondary Metabolites 5. Crude Drugs
6. Plant Fibres 7. Traditional System of Medicine 8. Role of Medicinal and
Aromatic Plants in National Economy and their Export Potential
9. Nutraceuticals 10. Herbal Formulations 11. Herbal Cosmetics
12. Preliminary Phytochemical Screening

Rpt.2023 | 9789395039833 | BSPMP | 134 pp | PB | Rs.225.00

Phytochemistry and Pharmacology of Important Medicinal Plants

Click NOW
For More Info!

K. T. Augusti

Contents: I. 1. The Unread Parts of Medicinal plants
2. Medicinal Plants from Abru Precatorious to
Cymbopogon 3. The Chemistry, Pharmacology and uses of Adhatoda
Vasica Nees to Curcuma Longa Linn. 4. Medicinal Plants from Dalbergia
to Dracocephalum Moldavica L II. 1. Medicinal Plants from Eclipta Alba to
Gymnema Sylvestre 2. Chemistry and Pharmacology of Medicinal Plants
from Garcina Kola to Hyoscymus Niger Linn. 3. Medicinal Plants from
Icnocarpus Frutescens (Linn) R. Br. to Ixora.Coccinia 4. Medicinal Plants
from Jacaranda Mimosifolia to Lindenbergia indica (L) Vatka.
III. 1. Medicinal Plants from Madhuca Longifolia (Koen) Mac Bride to
Puncia Granatum Linn 2. Pterocarpus Mansupium Roxb. 3. Chemistry
and Pharmacology of Some Selected Medicinal Plants from Phyllanthus
Amarus L to Ocium Sanctum L. IV. 1. Medicinal Plants from Quassia to
Tinosporia Cordifolia (Willd) Miers ex Hook. 2. Medicinal Plants from
Uncaria Surinamensis to Wrightia Tinctoria 3. Medicinal Plants from
Xeromphis Spinosa Keay to ZiZYPHUS JUJUSA Roxb.
**Main Part- II - V. II. Additional Information on the Chemistry and
Pharmacology of Selected Medicinal Plants** 1. Seventeen Important
Medicinal Plants and their Antiaging Properties. 2. The Medicinal
Properties of Some Common and Rare Plant Species Found in India and
Abroad 3. Compounds with Hypoglycemic and Antioxidant Activities
Isolated from Certain Indian Medicinal Plants - Review VI. 1. A Broccoli is
a Potent Source of Anticancer Detoxifying and Antioxidant Agents
B. Important Flavonoids, their Sources and Biological Importance
2. A. Salacia Group of Plants. Chemistry & Pharmacology. B. Bioactive
Flavonoids Isolated from the Stem Bark of Ficus Bengalensis Linn.
C. Asiatic Acid: An Anticancer Pentacyclic Triterpene from Centella
Asiatica 3. A. Hepatoprotective Effects of a Herbal Tea called "JAUNTEA"
Extract Against CCl4 Induced Hepatotoxicity in Rats. B. Antiviral
Compounds Isolated from Plants. Suja Mathews VII. 1. Nutraceuticals,
Immunomodulators, and Hepatoprotective Plants. 2. A. Phytosterols.
B. Vegetable Oils with Medicinal Effects, Prevent Cardio Vascular
Diseases. C. I. Nutmeg (Myristica Fragrance), D. Tables for the Structures
of Biologically Active Compounds of Plant Origin E. Biological Effects of
Antioxidants Isolated from Lemons and Allium Species as Compared to
Vit. E on the Damages Induced by Nicotine in Rats VIII-Miscellaneous
Items 1. Names of contributors and topics are mentioned

S L Deore

Contents: Section 1: Herbal Products and Regulations

1. Overview on Herbal Product Regulations: Challenges and Solution Section 2: Herbs and Derived Products
2. Extraction, Purification, Preliminary Phytochemical Screening and Structural Elucidation of Natural Products 3. Herbal Formulations: Traditional, Conventional and NDDS 4. Herbal Cosmetics and Regulations
5. Nutraceuticals and Regulations 6. Labeling and Packaging of Herbal Products Section 3: Traditional Medicines Regulations 7. Indian Systems of Medicines, Regulations and Related Guidelines 8. WHO - General Guidelines for Methodologies on Research and Evaluation of Traditional Medicine 2000 9. Drug & Cosmetic Act, 1940-Schedule T Good Manufacturing Practice of Indian Systems of Medicine Section 4: Quality Control, Standardisation, Regulations for Herbal Products 10. WHO Good Agricultural and Collection Practices [GAP, GCP, GACP] 2003 11. NMPB Guidelines and Standard for Good Field Collection Practices for Medicinal Plants 2009 12. WHO Guidelines on Good Herbal Processing Practice for Herbal Medicine 2018 13. WHO Guidelines on Good Storage and Distribution Practices 2019 14. Herbal Monograph, Pharmacopoeias, Markers 15. WHO Guidelines for Selecting Marker Substances of Herbal Origin for Quality Control of Herbal Medicines 2017 16. WHO and ICH Guidelines for Quality Control of Herbal Materials 17. Stability Testing and Shelf Life Determination of Herbal Medicines Section 5: Pre-clinical and Toxicity Regulations for Herbal Products 18. CPCSEA and OECD Guidelines for Animal Experimentation 19. Human Dose Calculation Guidelines 20. WHO Guidelines for Assessment, Evaluation of Toxicity, Safety and Efficacy of Herbal Medicines 2000 21. AYUSH General Guidelines for Safety/Toxicity Evaluation of Ayurvedic Formulations 2018 Section 6: Pharmacovigilance and Clinical Trial Regulations for Herbal Products 22. WHO Guidelines on Safety Monitoring of Herbal Medicines in Pharmacovigilance Systems 2004 23. Fundamentals of Clinical Trails and Phases of Trials 24. AYUSH Guidelines of Good Clinical Practices 2018 25. CDSCO Guidelines of Good Clinical Practices 2013 26. Ethical Principles for Clinical Trials 27. ICH Guidelines for Good Clinical Practices 2016 Section 7: Herbal Industry, IPR and Regulatory Affairs 28. Herbal Industry: Infrastructure, Formulation, Production and Pilot Plant Scale-Up Management of Herbal Products 29. Herbal Entrepreneurship 30. Herbal Raw Material Trade 31. GMP, GLP, TQM and ISO for Herbal Medicines 32. Intellectual Property Rights and Herbal Products 33. Geographical Indications of Goods (Registration and Protection) Act, 1999 34. New Drug Application: NDA, INDA, ANDA, BLA, OTC 35. Master Formula, SMF-Site Master File, DMF-Drug Master File, Dossier and CTD, Chemistry Manufacturing & Controls (CMC) Dossier

Classic
Reissue

Many outstanding advances in modern biology have been made as a result of the invention and application of efficient methods. This does not necessarily mean that we are living in an age of methods but every stride towards the solution of an important biological problem has been, and will have to be, prepared by the forging of the appropriate method. There are not very many 'classical' techniques that have become part of the standard equipment of biological research. Again and again chemistry and physics provide more specific, more exact, and more convenient analytical devices that are taken over by biochemists and modified to suit plant material. If published in purely analytical journals these recent methods are hidden in a welter of other methods applying to all fields of analysis from petroleum to heavy metal alloys. When they appear in the methods section of papers on specialized biochemical subjects they may be obscured by a title and discussion giving no hint of the presence of a valuable method or of its general applicability. As a result new methods very often do not immediately reach those manifold groups of research workers to whom they would be of the greatest use. These are the considerations that led to the plan of this handbook. We are convinced that there is a real need for a collection of reliable up-to-date methods for plant analysis in large areas of applied biology ranging from agricultural and horticultural experiment stations to pharmaceutical and technical institutions concerned with raw materials of plant origin. A part from the study of plant metabolism in which analytical methods are essential many branches of pure botany, originally not concerned with the chemical composition of plants, have developed in such a way as to depend on accurate knowledge of the nature and amounts of plant constituents. This applies among others to genetics, the physiology of growth, and taxonomy. The scattered publication of analytical methods and lack of experience in judging chemical methods makes it hazardous for many of the newcomers in the field of plant analysis to find or select the best available methods for their purposes. The collection offered in this handbook may help to pave the way for tackling problems in those fields of pure botany where chemical components are useful as indicators of the varied activities of the living plant cell. It is not in the scope of this work to produce a handbook of plant metabolism or a biochemical system of plant substances. Had it been, then the structure of the book and the arrangement of the contents would have been more logical than that which has been imposed by the purely analytical considerations that prevail in the present work, for example, mineral substances could not have been separated from many other sections. The ambition of the editors, however, was to produce a laboratory manual of the highest standard possible. The authors of the various chapters undertake the task of discussing the detailed techniques of analysis in such a way that the user of these volumes will be able to make the greatest use of the authors' experience and knowledge of experimental biochemistry. The purpose of the work is furthered by the fact that the authors have avoided discussing problems of the biogenesis and metabolism of the substances with which they are concerned, tempting and fruitful though these physiological considerations may have appeared to them. Volume I concerned with analytical methods of general application. Volume VI is concerned with adding to the range of groups of compounds dealt with in Volumes II-IV. Volume V has been planned to supplement and bring up to date the original Vol. I. The work as originally planned did not include a consideration of methods for the detection and assay of enzymes. The scope of the work has now been enlarged and in Volume VI will also be found a treatment of general methods of enzyme chemistry while in Vol. VII individual groups of enzymes are covered.

Contents: : **Volume - I** · General methods for separation · Making and Handling Extracts · Electrical-Transport methods · Colorimetric, Absorptimetric and Fluorimetric methods · Principles of Biological assay · Methods of involving labelled atoms · Estimation of pH values · Oxidation-Reduction potentials · Gasometric analysis in plant investigation · Cytochemical methods · Mineral components and ash analysis

Volume - II · Mono- and Oligosaccharides and Acidic Monosaccharide Derivatives · Acyclic Sugar Alcohols · Phosphorylated Sugars · Starch, Glycogen, Fructosans and Similar Polysaccharides · Cellulose and Hemicelluloses · Pectin · Chitin · The Analysis of Plant Gums and Mucilages · Glycosides as a General Group · Fats and Other Lipids Volatile Alcohols, Aldehydes, Ketones and Esters · Volatile Acids · Non Volatile Mono-, Di- and Triarboxylic Acids · Lactones

Volume - III · Pyrethring and Allied Compounds · Triterpene und Triterpen-Saponine · Carotenoids · The Determination of Rubber and Gutta in Plants · Simple Benzene Derivatives · Natural Tropolones · Natural Phenylpropane Derivatives · Lignans · Growth substances in Higher plants · Antibiotics

Volume - IV · Peptides (Bound Amino Acids) and Free Amino Acids · Proteins · Seed Proteins · Methods of Determining the Nutritive value of Proteins · Urea and Ureides · Chlorophylls: Analysis in Plant Material · Haematin Compounds · Nucleic Acids, their Components and Related Compounds · Adenosine Diphosphate, Adenosine Triphosphate · Codehydrasen I and II (Diphospho-pyridin-nucleotid und Triphospho-pyridin-nucleotid) · Thiamine and its Derivatives · The Alkaloids · Amine und Betaine · Melanins

Volume - V · Emission and Atomic Absorption Spectrochemical Methods · Mass Spectrometric Methods · Plant Spectra: Absorption and Action · Vapour Phase Chromatography · Ion-Exchange Chromatography · Paper Chromatography on a Preparative Scale · Determination of Size, Shape and Homogeneity of Macromolecules in Solution · Optical Rotatory Dispersion · Its Application to Protein Conformation · Tissue and Single cell Cultures of Higher Plants as a Basic Experimental Method · Immunological Methods · Polarography and Tensammetry · Fallout Contamination in Plants

Volume - VI · Determination of Sulfhydryl Groups · Humulones, Lupulones and Other Constituents of Hops · Lichen Substances · Kinetin and Kinetin-Like Compounds I · General Methods of Enzymology · Interpretation of Results II · General Methods of Preparation and Purification · General Methods of Preparation · General Aspects of Enzyme Purification and Characterization · Purification of Enzymes by Ion Exchange Chromatography · Estimation of Metabolites by Enzymes · Enzymic Assays of Amino Acids and Keto Acids

Volume - VII · Enzymes of phosphate metabolism · Enzymes of inorganic nitrogen metabolism · Enzymes of vitamin metabolism · Enzymes involved in the synthesis and breakdown of Indoleacetic acid · Enzymes of aromatic biosynthesis · Enzymes of amino acid metabolism · Enzymes of peptide and protein metabolism · Enzymes of synthesis of purine and pyrimidine nucleotides · Enzymes of fat metabolism · Enzymes of carbohydrate synthesis · Enzymes of glycolysis · Enzymes of the pentose phosphate cycle · Enzyme systems in photosynthesis · Enzymes of the Krebs cycle, the Glyoxalate cycle and related enzymes · Enzymes of terminal respiration · Summary of Recommendations on Enzyme Terminology

Phytochemicals for Diabetic Complications

[Click NOW For More Info!](#)

Ciddi Veeresham & Ajmera Rama Rao

Contents: 1. Aldose Reductase Inhibitors Phyto Constituents 2. Aldose Reductase Inhibitors from Plant Extracts 3. Plants as Antiglycation Agents: Nutraceuticals for the Management of Diabetic Complications 4. Plants used in the Management of Diabetic Complications 5. Herbal Medicine in Diabetic Foot Complications

Rpt. 2024 | 9789389354720 | BSPMP | 154 pp | HB | Rs. 995.00

Modern Phytochemical Methods

[Click NOW For More Info!](#)

Nikolaus H. Fischer, Murray B. Isman and Helen A. Stafford

Contents: 1. New Developments in the Separation of Natural Products 2. Recent Advances in High-Performance Liquid Chromatography of Volatile Natural Products 3. Enantioselective Separations in Phytochemistry 4. Supercritical Fluid Chromatography for the Analysis of Natural Products 5. Immobilized Artificial Membrane Chromatography 6. Mass Spectrometry in the Chemistry of Natural Products 7. Structure Elucidation of Natural Products by Mass Spectroscopy 8. Modern NMR Method in Phytochemical Studies 9. Trichrome Microsampling of Sesquiterpene Lactones for the Use of Systematic Studies 10. Biosynthetic Methods for Plant Natural Products: New Procedures for the Study of Glandular Trichrome Constituents 11. Quantitative Structure-Activity Relationship Analysis of Natural Products: Phototoxic Thiophenes.

Invitation to Authors

TM

PharmaMed Press (An Imprint of BSP Books Pvt. Ltd.)

Invites manuscripts from prospective authors to write books in the area of New emerging topics in Pharmaceutical Sciences & Technology, Pharma Manufacturing Technology, Diagnostic & Medical Devices, Regulatory Affairs and other emerging areas.

Also, BSP Books invites Books tailored specifically to a syllabus of recognised course of study at colleges and universities level.

Authors may write to us with their background, brief description about the book with tentative table of contents synopsis and time frame for completion of the book by e-mail to nikunjesh.shah@bspbooks.net
