*Preface* ..... (v)

## CHAPTER 1

### **Background of Remote Sensing**

1.1 Modern Surveying ..... 1  
    1.1.1 Selected Technical Terms used in Surveying ..... 3  
    1.1.2 Types of Survey Based on Instruments ..... 3  
1.2 Photogrammetry..... 14  
1.3 Satellite Remote Sensing ..... 16  
1.4 Unmanned Aerial Vehicle (UAV)/Drones..... 33  
1.5 Laser Remote Sensing..... 40  
    1.5.1 Laser Theory and Operation..... 41  
    1.5.2 Laser- the Key to LiDAR Technology..... 42  
    1.5.3 Why LiDAR surveying? ..... 46  
    1.5.4 Difference between LiDAR, SONAR and RADAR ... 47  
    1.5.5 Area of Interest of LiDAR Remote Sensing ..... 50  
1.6 Smartphones..... 50

## CHAPTER 2

### **Principle of LiDAR Remote Sensing**

2.1 Background..... 52  
2.2 Technical Terms Used ..... 53  
2.3 A Brief History of LiDAR ..... 58  
2.4 LiDAR System Components..... 60  
    2.4.1 Lasers ..... 61  
    2.4.2 Optics and Scanners ..... 62  
    2.4.3 Photo-detectors..... 62  
    2.4.4 Navigation and Positioning Systems..... 62  
    2.4.5 Computing Technology..... 65  
    2.4.6 Power Supply ..... 65  
    2.4.7 Mounting Platform ..... 65

2.5	Working of a LiDAR .....	66
2.5.1	Time of Flight (ToF) Approach .....	67
2.5.2	Phase Measurement Approach .....	68
2.6	Concept of Multiple LiDAR Returns .....	72
2.7	Scan Patterns of LiDAR.....	73
2.7.1	Oscillating Mirror.....	73
2.7.2	Rotating Polygon Mirror .....	73
2.7.3	Rotating Mirror .....	73
2.7.4	Dispersive Prisms or Gratings .....	73
2.8	Laser Sources .....	74
2.9	Classification of Lasers.....	75
2.9.1	Based on Safety.....	75
2.9.2	Based on their Mode of Operation .....	78
2.9.3	Based on Capturing the Return Signals.....	79
2.9.4	Based on Gain and Medium .....	80
2.9.5	Based on Data Dimensionality.....	83
2.9.6	Based on Platform .....	85
2.9.7	Based on Mapping.....	90
2.9.8	Based on Scanning Methods .....	92
2.9.9	Based on Measurement Principles .....	94
2.10	Advantages and Disadvantages of using LiDAR Technology .....	96

## **CHAPTER 3**

### **LiDAR Sensors and Data Characteristics**

3.1	LiDAR Specifications and Key Parameters.....	99
3.1.1	Ranging Specifications.....	100
3.1.2	Physical Specifications.....	106
3.1.3	Laser Specifications .....	107
3.1.4	Optical Specifications .....	108
3.2	Key Factors Affecting the Resolution of LiDAR Data .....	109
3.3	Key Factors Affecting the Accuracy of LiDAR Data .....	110
3.4	Various LiDAR Systems.....	112
3.4.1	Terrestrial Laser Scanner (TLS).....	113
3.4.2	Airborne Laser Scanner (ALS) .....	125

3.4.3	Spaceborne LiDAR Scanners (SLS) .....	140
3.4.4	Smartphones based LiDAR Scanners (SPLS).....	147
3.4.5	Wearable Laser Scanners (WLS)/ Personal Laser Scanners (PLS) .....	150
3.5	Flight Planning.....	156
3.6	LiDAR Data Acquisition .....	157
3.7	Sources of Errors in LiDAR Data .....	161
3.8	LiDAR Data Fusion .....	162
3.8.1	Approaches of LiDAR Data Fusion .....	162
3.8.2	Fusion of Different Sensors Data .....	164
3.9	Common Types of LiDAR Data Formats .....	168
3.10	Free and Open Source LiDAR Data .....	171
3.11	Latest Developments in LiDAR.....	175
3.11.1	From Single to Multiple Pulses LiDAR.....	175
3.11.2	From Multi-photon to Single-photon LiDAR .....	175
3.11.3	Raman LiDAR .....	176

## **CHAPTER 4**

### **LiDAR Data Processing and Software**

4.1	Need of Software .....	177
4.2	Sensor Data Fusion Algorithms .....	178
4.3	Software for LiDAR Data Processing.....	180
4.4	Data Processing Tasks .....	188
4.4.1	Geo-referencing.....	188
4.4.2	The SLAM .....	188
4.4.3	Filtering Point Cloud Data .....	193
4.4.4	The Kalman Filter .....	198
4.4.5	Mapping Color Information .....	198
4.4.6	Automated/Semi-automated Extraction of Features .	199
4.4.7	Generating 3D Models from Point Cloud .....	199
4.4.8	Measurement of Quality Control/Accuracy .....	201
4.5	Challenges of LiDAR Systems .....	203
4.5.1	Measurement Techniques.....	205
4.5.2	Detection Rate.....	205

4.5.3	Impact of Bad Weather Conditions .....	206
4.5.4	Voluminous Data .....	206
4.5.5	Surface Reflectivity .....	206
4.5.6	Platform Vibrations .....	206
4.5.7	Gaps in Data.....	207
4.5.8	Quality of Data.....	207
4.5.9	Cross-talk .....	208
4.5.10	Long-range Sensing in Autonomous Driving .....	208
4.5.11	Data Fusion .....	208
4.5.12	Software Requirements .....	209

**CHAPTER 5**

**Applications of LiDAR Remote Sensing**

5.1	Overview.....	210
5.2	Vegetation Mapping and Forestry.....	210
5.3	Precision Agriculture and Crop Management.....	215
5.4	Accuracy Assessment of Terrestrial Laser Scanning (TLS) for Large-scale Mapping .....	217
5.5	DEM and Digital Twins.....	220
5.6	Archaeology/UNESCO World and Cultural Heritage Mapping .....	220
5.7	Building Height Estimation .....	221
5.8	Urban Mapping and Development.....	225
5.9	Utility Inspection .....	227
5.10	Transportation Infrastructure Mapping .....	227
5.11	Autonomous Vehicles and Robots.....	229
5.12	Mining.....	230
5.13	Air Quality Monitoring .....	231
5.14	Geology.....	232
5.15	Bathymetry.....	233
5.16	Others.....	234
5.17	Future of LiDAR Technology.....	235
	<b>References .....</b>	<b>241</b>
	<b>Index.....</b>	<b>261</b>
