

CONTENTS

Preface	(v)
CHAPTER 1: BASICS OF SMART GRID	1-14
1.1 Introduction	1
1.2 Conventional Grid.....	1
1.3 Evolution of Smart Grid	2
1.3.1 Technological Developments	2
1.3.2 Changes to be Accommodated	3
1.3.3 History	3
1.3.4 NIST Smart Grid Conceptual Model.....	4
1.4 Features and Benefit of Smart Grid	6
1.4.1 Features of Smart Grid	6
1.4.2 Benefits of Smart Grid	7
1.5 Main Features	8
1.5.1 Smart Meters.....	9
1.5.2 Distributed Generation	9
1.5.3 Renewable Energy Integration.....	9
1.5.4 Bidirectional Communication Systems.....	10
1.5.5 Self-Healing Capability	10
1.5.6 Data/Cyber Security	10
1.6 Challenges Associated with Smart Grid	10
1.6.1 Cost Challenges.....	11
1.6.2 Cyber Security	11
1.6.3 Interoperability.....	12
1.6.4 Confidentiality Challenges	13
1.6.5 Privacy and Security Policies	13

viii | Contents

1.6.6 Defence against Threat..... 13
1.6.7 Physical Security 13
1.6.8 Connectivity Challenges 13
References..... 14

CHAPTER 2: ELECTRIC GRID AND TRANSFORMATIONS 15-34

2.1 Introduction 15
2.2 Centralized and Distributed Generations..... 17
 2.2.1 Centralized Generation..... 17
 2.2.2 Drive for Distributed Generators..... 18
 2.2.3 Simple Benefits of Distributed Generators..... 18
2.3 Benefits and Costs of Renewable Energy Sources 19
 2.3.1 Benefits of Renewable Energy Sources 20
 2.3.2 Cost of Renewable Energy 23
2.4 Renewable Energy Integration 27
2.5 Smart Grid Technologies..... 28
 2.5.1 Cost Considerations..... 29
 2.5.2 Technical Challenges 30
References..... 33

CHAPTER 3: RENEWABLE ENERGY SOURCES AND INTEGRATION 35-96

3.1 Introduction 35
3.2 Solar Energy 35
 3.2.1 Solar Photo Voltaic Cells - Working and Construction 38
 3.2.2 V-I Characteristics..... 43
 3.2.3 Maximum Power Point Tracking 48
 3.2.4 Solar PV Systems..... 50
 3.2.5 Solar Thermal Power Plant..... 52
3.3 Wind Energy 53
 3.3.1 History..... 53

3.3.2 Construction of Wind Turbines	54
3.3.3 Energy Calculation in Wind Stream.....	58
3.3.4 Types of Wind Turbine Generators.....	62
3.4 Hydro Power.....	66
3.4.1 Types of Hydro Power Plants	67
3.4.2 Dams and Barriers	68
3.4.3 Hydro Power Turbines.....	72
3.4.4 Hydro Power Generators.....	74
3.4.5 Components of Hydropower Plant.....	75
3.5 Wave Energy	77
3.5.1 Oscillating Water Column	77
3.5.2 Wave Activated Bodies	78
3.5.3 Overtopping Devices.....	79
3.6 Tidal Energy	80
3.6.1 Technologies	81
3.7 Geothermal Energy	83
3.7.1 Direct dry steam plants	84
3.7.2 Flash Plants	86
3.7.3 Binary Plants.....	86
3.7.4 Combined-Cycle or Hybrid Plants	87
3.7.5 Enhanced Geothermal Systems	88
3.8 Biomass Energy	89
3.9 Variable RE Integration and Overcoming Intermittence.....	94
References	95

CHAPTER 4: ELECTRICAL ENERGY STORAGE SYSTEMS **97-131**

4.1 Introduction	97
4.2 Characteristics of Storage Systems.....	98
4.3 Energy Storage Technologies.....	100
4.3.1 Mechanical Energy Storage Systems.....	102
4.3.2 Thermal Energy Storage (TES) Systems	107

4.3.3 Electrochemical Energy Storage (EES) Systems 109

4.3.4 Battery Energy Storage Systems (BESS)..... 113

4.3.5 Chemical Storage Systems 118

4.4 Applications and Performance Comparison of Various Storage Systems ... 122

 4.4.1 Applications of Energy Storage Systems 122

 4.4.2 Performance Comparison of Various Energy Storage Systems 124

References 130

CHAPTER 5: PLUGIN ELECTRIC VEHICLES 132-160

5.1 History 132

5.2 Role of EVs in Energy Sector 136

5.3 Grid Integration of Plugin Electric Vehicles - V2G Technology 137

 5.3.1 Charging Modes of PEVs..... 138

 5.3.2 Power Interaction Modes between PEVs and Grid..... 139

 5.3.3 V2G Technologies 140

 5.3.4 Methods of V2G Implementation..... 141

5.4 PEV Charging Technologies 145

 5.4.1 Modes of Charging 145

 5.4.2 Methods of PEV Charging..... 146

 5.4.3 PEV Charging Infrastructure 148

 5.4.4 Control and Communication Infrastructure 152

5.5 Challenges Associated with Grid Integration 154

 5.5.1 Grid Stability..... 154

 5.5.2 Power Quality..... 154

 5.5.3 Communication Protocols 155

 5.5.4 Interoperability..... 155

 5.5.5 Cyber Security 155

 5.5.6 Cost 156

5.6 Solutions for the Challenges of Grid Integration..... 156

 5.6.1 Power Electronics..... 156

5.6.2 Advanced Control Systems	157
5.6.3 Flexibility through Energy Storage Systems (ESS).....	157
5.6.4 Securing Communication	158
References	159

CHAPTER 6: DEMAND SIDE MANAGEMENT 161-198

6.1 Introduction	161
6.2 Evolution of DSM.....	162
6.3 Need of Demand Side Management (DSM)	164
6.4 DSM Strategies and Policies	165
6.4.1 Energy Conversion and Energy Efficiency	166
6.4.2 Demand Response (DR).....	167
6.4.3 Distributed Energy Resources.....	175
6.5 Implementation of DSM.....	176
6.5.1 Peak Shaving	177
6.5.2 Valley Filling.....	178
6.5.3 Load Shifting	180
6.5.4 Strategic Conversion.....	181
6.5.5 Load Growth.....	182
6.5.6 Flexible Load Curve.....	183
6.6 Mathematical Formulation of DSM Optimization.....	185
6.6.1 General DSM Optimization Model	185
6.6.2 Common Objective Functions in DSM Optimization.....	185
6.6.3 Constraints of DSM Optimization.....	186
6.6.4 Algorithms used for DSM Optimization	190
6.7 Challenges of DSM.....	191
6.8 Solutions to the Challenges of DSM	193
6.8.1 AI and Machine Learning (ML) based Demand Forecasting	193
6.8.2 Battery Storage Solutions to Balance Renewable Energy Fluctuations.....	194

6.8.3 Increased Consumer Participation in DSM by Strong Strategies... 194
6.8.4 Secured Real-Time Communication Networks to Counter Cyber Attacks..... 194
References 195

CHAPTER 7: SMART GRID MONITORING SYSTEMS 199-232

7.1 Introduction 199
7.2 Supervisory Control and Data Acquisition (SCADA)System..... 199
 7.2.1 SCADA Generations..... 202
 7.2.2 Integration of SCADA into Smart Grid 206
 7.2.3 Applications of SCADA 207
7.3 Advanced Metering Infrastructure (AMI) 211
 7.3.1 Subsystems of AMI 212
 7.3.2 Security Challenges 219
7.4 Wide-Area Monitoring System (WAMS)..... 219
 7.4.1 Working of WAMS 220
 7.4.2 Classification of WAMS Architectures 221
 7.4.3 Components of WAMS 223
 7.4.4 Synchrophasor Technology 224
7.5 Architecture of Communications Network in Smart Grid..... 226
 7.5.1 Neighbor Area Networks (NANs) 229
 7.5.2 Field Area Networks (FANs) 229
 7.5.3 Workforce Mobile Networks (WMNs) 230
References 230

CHAPTER 8: SMART GRID PROTECTION 233-259

8.1 Introduction 233
8.2 Challenges in Smart Grid Protection..... 234
 8.2.1 Changes in Short Circuit Levels..... 234
 8.2.2 Reversed Power Flow..... 237
 8.2.3 False Tripping of Protective Devices (PDs)..... 238

8.2.4 Blinding of Protection.....	238
8.2.5 Nuisance Islanding	241
8.2.6 Unsynchronized Reclosing.....	241
8.2.7 Loss of Main Power	242
8.3 Adaptive Protection Schemes.....	242
8.4 WAMS based Protection or Wide-Area Protection Systems (WAPS).....	247
8.5 Multi Agent Systems - Smart Grid Protection.....	250
8.5.1 Agents and MAS	251
8.5.2 MAS Architecture for the Smart Grid	253
8.5.3 MAS Based Smart Grid Protection	256
References	256
CHAPTER 9: ROLE OF POWER ELECTRONICS IN SMART GRID 260-298	
9.1 Introduction	260
9.2 Power Flow in Smart Grid	261
9.3 AC-DC Converters in SG	267
9.4 DC-AC Converters in SG	271
9.5 DC-DC Converters in SG	272
9.6 Fundamentals of Power Electronic Converters.....	275
9.6.1 AC-DC Converters.....	275
9.6.2 DC-AC Converters.....	282
9.6.3 DC-DC Converters.....	290
References	294
Index	299
