

Brief Contents

<i>Preface</i>	xix	Unit Six: Quality Management	303–371
<i>Acknowledgements</i>	xx	24. Quality Concepts	305
<i>About the Author</i>	xxi	25. Statistical Quality Control (SQC) and Statistical Process Control (SPC)	316
Unit One: General Management	1–62	26. Acceptance Sampling	331
1. Scientific Management	3	27. Emerging Concepts in Quality	341
<i>History, Concept, and Evolution</i>	3	Unit Seven: Project Management	373–438
2. Schools of Management Thought	16	28. Project Management— Fundamentals of Network Analysis	375
<i>Classical Theories</i>	16	29. Critical Path Method (CPM)	392
3. Schools of Management Thought	26	30. Cost Analysis—Project Crashing	405
<i>Neoclassical Theories</i>	26	31. Program Evaluation and Review Technique (PERT)	418
4. Schools of Management Thought	40	Unit Eight: Human Resource Management	439–491
<i>Modern Theories</i>	40	32. The Fundamentals of Human Resource Management	441
5. Functions of Management	48	33. Training and Development, Job Evaluation and Merit Rating	450
Unit Two: Organization Management	63–113	34. Wage and Wage Incentives	459
6. Organization	65	35. Grievance Handling, Discipline, and Welfare	475
<i>An Overview</i>	65	Unit Nine: Marketing Management	493–539
7. Organization Structure	74	36. Marketing Management	495
<i>Classical Views</i>	74	<i>Basic Concepts</i>	495
8. Modern Organization Structures	85	37. Product Lifecycle	508
9. Departmentation	94	38. Marketing Mix	517
Unit Three: Production Management	115–168	Unit Ten: Strategic Management	541–587
10. Production Systems	117	39. Strategic Management	543
11. Production Planning and Control	126	<i>An Overview</i>	543
12. Facility Planning	140	40. Corporate Planning	552
13. Plant Layout	153	41. Strategy Formulation and Implementation	562
Unit Four: Methods Management	169–231	42. Environmental Scanning	573
14. Industrial Engineering and Methods Management	171	Unit Eleven: Contemporary Issues in Management	589–627
<i>An Outline</i>	171	43. Business Process Management	591
15. Work Study	183	<i>BPO, BPR, MIS, and DSS</i>	591
<i>An Overview</i>	183	44. Performance Management	600
16. Method Study	190	<i>PM, BSC, CMM, and PCMM</i>	600
17. Time Study—Work Measurement	201	45. Value Management	610
18. Ergonomics	214	<i>VCA, MUDA, 5S Kaizen, and QFD</i>	610
Unit Five: Materials Management	233–302	Appendix I: Areas under the Standard Normal Curve	628
19. Materials Management	235	Appendix II: Probabilities of Acceptance and the Thorndike Chart	631
<i>Concepts and Classification</i>	235	Index	634
20. Inventory Models	244		
21. Purchase Management	252		
22. Stores Management	261		
23. Modern Techniques in Materials Management	279		

Contents

<i>Preface</i>	xix
<i>Acknowledgements</i>	xx
<i>About the Author</i>	xxi

Unit One: General Management 1–62

1. Scientific Management	
<i>History, Concept, and Evolution</i>	3
1.1 Introduction	3
1.2 Management: History and Development	3
1.2.1 Handicraft Era (14th Century to 18th Century)	3
1.2.2 Industrial Revolution Era (18th Century to 19th Century)	4
1.2.3 Scientific Management Era (Early 19th Century)	4
1.2.4 Operations Research Era (Late 19th Century)	5
1.2.5 Computerized Systems Era (Early 20th Century)	5
1.3 Management: Definition and Meaning	7
1.4 Management, Administration, and Organization	7
1.5 Is Management an Art or a Science?	8
1.5.1 Management as a Science	8
1.5.2 Management as an Art	9
1.5.3 Management as Both Science and Art	9
1.5.4 Management as a Profession	9
1.6 Nature and Features (Characteristics) of Management	10
1.7 Management Hierarchy: Levels of Management	11
1.8 Managerial Skills/Managerial Qualities	12
1.8.1 Technical Skills	12
1.8.2 Conceptual Skills or Administrative Skills	13
1.8.3 Soft Skills or Human Relation Skills	13
1.9 Responsibilities of a Manager	13
1.10 Manager vs. Social Responsibility	15
2. Schools of Management Thought	
<i>Classical Theories</i>	16
2.1 Introduction	16
2.2 Schools of Management Thought	16
2.3 Classical Theories	16
2.3.1 Autocracy	16
2.3.2 Bureaucracy	16

2.4 Scientific Management	17
2.4.1 Significance of Scientific Management	17
2.4.2 Taylor's Experiment	18
2.5 Principles of Scientific Management	19
2.6 Taylor's Methodology in Standardization through Work Study	20
2.7 Features of Scientific Management (Taylorism)	21
2.7.1 Appreciations of Scientific Management	21
2.7.2 Criticisms of Scientific Management	21
2.8 Contributions of Frank Gilbreth	21
2.9 Contributions of Henry L. Gantt	21
2.10 Operations (or Organizational) School of Management Thought	22
2.10.1 Fayol's Principles of Organization	22
2.10.2 Features of Fayol's Theory (Fayolism)	24
2.10.3 Appreciations of Fayol's Theory	24
2.10.4 Criticisms of Fayol's Theory	24
2.11 Distinction between Taylor's and Fayol's Management Theories	24
3. Schools of Management Thought	
<i>Neoclassical Theories</i>	26
3.1 Introduction	26
3.2 Themes of Human Behavior Theories (Neoclassical Theories)	26
3.2.1 Elements of Behavioral (Neoclassical) Theory	27
3.2.2 Analysis	28
3.3 Distinction between Scientific Management and Human Relations Management	28
3.4 Human Relations Schools of Management Thought	28
3.4.1 Human Welfare School of Management Thought: Contributions of George Elton Mayo	28
3.4.2 Appreciations of Human Relations Theory	30
3.4.3 Criticisms of Human Relations Theory	30
3.5 Maslow's Theory of Need Hierarchy	30
3.5.1 Analysis	32
3.5.2 Appreciations of Maslow's Theory of Need Hierarchy	33
3.5.3 Criticism or Exceptions of Maslow's Theory of Need Hierarchy	33

3.6 Douglas McGregor's Theory X and Theory Y	34	5.3 Planning Function	49
3.6.1 Theory X	34	5.3.1 Normal Activities Requiring Planning	49
3.6.2 Theory Y	34	5.3.2 Types of Plans	49
3.6.3 Analysis (Management Application of McGregor's Theories)	34	5.3.3 Phases and Functions of Production Planning	49
3.6.4 The Manager's Role on Theory X Type People	34	5.3.4 Steps in Planning	50
3.6.5 The Manager's Role on Theory Y Type People	35	5.3.5 Pre-planning—Visualization and Forecasting of Nature and Details of Work	50
3.6.6 Theory X and Theory Y Continuum	35	5.3.6 Active Planning—Planning to Dispatching through Scheduling Activities	50
3.6.7 Distinction between Theory X Type and Theory Y Type People	36	5.3.7 Post-Planning—Follow-Up to Feedback	51
3.6.8 Appreciations of McGregor's Theory	36	5.4 Organizing	51
3.6.9 Criticism of McGregor's Theory	36	5.4.1 Types of Organizations	52
3.7 Fredrick Herzberg's Two Factor or Hygiene Maintenance Theory	36	5.5 Staffing	53
3.7.1 Hygiene Factors	37	5.5.1 The Functions of Staffing	53
3.7.2 Motivational Factors or Satisfiers	37	5.6 Directing	53
3.7.3 Comparison between Herzberg's Two Factor Theory and Maslow's Needs Theory	38	5.6.1 Leadership	53
3.8 Victor H. Vroom's Expectancy/Valence Theory	38	5.6.2 Motivation	53
		5.6.3 Communication	54
		5.6.4 Control	54
4. Schools of Management Thought		5.7 Coordinating	54
<i>Modern Theories</i>	40	5.7.1 Management as an Integrating Function	55
4.1 Introduction	40	5.8 Summary of Management Functions (POSDCORB)	55
4.2 Empirical or Experience School of Management Thought	40	5.8.1 Planning	55
4.2.1 Salient Features	41	5.8.2 Organizing	55
4.2.2 Merits	41	5.8.3 Staffing	57
4.2.3 Demerits	41	5.8.4 Directing	57
4.3 Decision Making School of Management Thought	41	5.8.5 Coordinating	57
4.3.1 Merits	42	5.8.6 Reporting	57
4.3.2 Demerits	42	5.8.7 Budgeting	57
4.4 Systems School of Management Thought	42	<i>Review Exercises</i>	58
4.4.1 Merits	43		
4.4.2 Demerits	43		
4.5 Social Systems School of Management Thought	43		
4.5.1 Strengths	44		
4.5.2 Weaknesses	44		
4.6 Management by Objectives (MBO)	44		
4.6.1 Merits of MBO	44		
4.6.2 Demerits of MBO	45		
4.7 Contingency School of Management Thought	45		
4.8 Harold Koontz's Jungle of Management Theories	46		
4.9 Finally, What is "Management"?	46		
4.10 A Comparative Study of Management Theories	46		
5. Functions of Management	48		
5.1 Introduction	48		
5.2 Functions of Management	48		
		Unit Two: Organization Management	63–113
		6. Organization	
		<i>An Overview</i>	65
		6.1 Introduction	65
		6.2 Definitions	65
		6.3 Organization and Organizing	66
		6.4 System Approach Applied to an Organization	66
		6.5 Need for an Organization	66
		6.6 Essential Features of a Good Organization	67
		6.7 Principles of Organization	68
		6.8 The Process of Organization	71
		6.9 Advantages of a Good Organization	73
		7. Organization Structure	
		<i>Classical Views</i>	74
		7.1 Introduction	74
		7.2 Formal and Informal Organization	74

7.3 Formal Organization	74	8.10 Inverted Pyramid	93
7.3.1 Features of a Formal Organization	74	8.10.1 Salient Features	93
7.4 Informal Organization	75	8.10.2 Merits	93
7.4.1 Features of an Informal Organization	75	8.10.3 Demerits	93
7.5 Classification of Organizations	76	8.10.4 Suitability of Application	93
7.5.1 Line or Military or Scalar Organization	76		
7.5.2 Functional or Staff Organization	78	9. Departmentation	94
7.5.3 Distinction between Line Organization and Staff Organization	80	9.1 Introduction	94
7.5.4 Line and Staff Organization	80	9.1.1 Definitions	94
7.6 Committee Organization	82	9.2 Objectives of Departmentation	94
7.6.1 Definition	82	9.3 Advantages of Departmentation	95
7.6.2 Types of Committees	82	9.4 Methods of Departmentation	95
7.6.3 Factors Affecting the Success or Failure of a Committee Organization	83	9.5 Function-Based Departmentation	95
7.6.4 Basic Rules for Conducting a Committee	83	9.5.1 Strengths	96
7.6.5 Merits	83	9.5.2 Weaknesses	96
7.6.6 Demerits	84	9.6 Product-Based Departmentation	96
7.6.7 Suitability of Application	84	9.6.1 Strengths	97
		9.6.2 Weaknesses	97
8. Modern Organization Structures	85	9.7 Process-Based Departmentation	97
8.1 Introduction	85	9.7.1 Strengths	97
8.2 Team Organization	85	9.7.2 Weaknesses	97
8.2.1 Salient Features	86	9.8 Departmentation by Geographical Region	97
8.2.2 Merits	86	9.8.1 Strengths	98
8.2.3 Demerits	86	9.8.2 Weaknesses	98
8.3 Project Organization	86	9.9 Customer-Oriented Organizations	98
8.3.1 Salient Features	86	9.9.1 Strengths	98
8.3.2 Merits	87	9.9.2 Weaknesses	98
8.3.3 Demerits	87	9.10 Integration of Organizational Tasks and Activities	99
8.3.4 Suitability of Application	87	9.10.1 Integration through Authority	99
8.4 Distinction between Project and Team Organizations	87	9.10.2 Integration through Administration	99
8.5 Matrix Organization	87	9.10.3 Integration through Communication	100
8.5.1 Salient Features	88	9.11 Span of Control and Levels of Management	100
8.5.2 Matrix Organization Structure	88	9.12 Span of Control	100
8.5.3 Merits and Demerits	88	9.12.1 Factors Affecting the Span of Control	101
8.6 Network Organization	89	9.13 Flat and Lean (or Tall) Organizations	101
8.6.1 Salient Features	89	9.13.1 Flat Organizations	101
8.6.2 Network Organization Structure	89	9.13.2 Lean Organization	101
8.6.3 Merits	90	9.14 Centralized and Decentralized Organizations	102
8.6.4 Demerits	90	9.14.1 Centralization vs. Decentralization	102
8.6.5 Suitability of Application	90	9.14.2 Reasons for Centralization	103
8.7 Cellular Organization	90	9.14.3 Decentralization	103
8.7.1 Salient Features	90	9.14.4 Degree of Decentralization	103
8.7.2 Merits	91	9.14.5 Advantages of Decentralization	104
8.7.3 Demerits	91	9.14.6 Drawbacks of Decentralization	104
8.7.4 Suitability of Application	91	9.14.7 Decentralization vs. Delegation of Authority	104
8.8 Boundaryless Organization	91	9.14.8 Centralized and Decentralized Management Systems	105
8.8.1 Boundaryless Organization Structure	91	9.14.9 Effect of Computerization	105
8.9 Virtual Organization	92	<i>Review Exercises</i>	107
8.9.1 Salient Features of a Virtual Organization	92		
8.9.2 Merits	92	Unit Three: Production Management	115–168
8.9.3 Demerits	92	10. Production Systems	117
8.9.4 Suitability of Application	92	10.1 Introduction	117
		10.2 Fabrication—Manufacturing—Production	117

10.3	Production Systems	118	11.9	Control Phase—Production Control	136
10.4	Intermittent System	119	11.9.1	Definitions of Production Control	136
10.4.1	Characteristics of an Intermittent System	119	11.9.2	Need and Significance	136
10.4.2	Planning and Control Mechanism for an Intermittent System	119	11.9.3	Objectives of Production Control	136
10.5	Project Production	119	11.10	Follow-Up or Control Phase	137
10.5.1	Characteristics of Project Production	119	11.10.1	Reporting Progress (Feedback)	137
10.6	Job Order Production	120	11.10.2	Corrective Action	137
10.6.1	Characteristics of Job Order Production	120	11.10.3	When Do We Need Corrective Action?	138
10.7	Batch Production	121	11.10.4	Common Reasons for Production Delays	138
10.7.1	Characteristics of Batch Production	121	11.10.5	Methods to Take Corrective Action	138
10.8	Continuous Production	122	11.11	Advantages of Better Production Planning and Control	139
10.8.1	Characteristics of Continuous (Mass and Flow) Production	122	11.12	Principles of Sound Production Control System	139
10.8.2	Distinction between Intermittent and Continuous Production Systems	123	12. Facility Planning		140
10.8.3	Manufacturing Systems, Production Planning, and Control	123	12.1	Introduction	140
10.9	Process Lifecycle or Production Lifecycle	124	12.2	Objectives of Good Facility Planning	140
11. Production Planning and Control		126	12.3	Principles of Facility Layout	141
11.1	Introduction	126	12.3.1	Muther's Principles of Layout	141
11.2	Definitions of Production Planning and Control (PPC)	126	12.4	When Does Facility Planning Decision Arise?	142
11.2.1	Production	126	12.5	Concept of a Facility	142
11.2.2	Planning	126	12.6	Classification of Facility Planning	142
11.2.3	Control	126	12.7	Phase I: Facility Location Study	143
11.2.4	Definitions of PPC	126	12.7.1	Considerations in Plant Location	143
11.3	Objectives of PPC	127	12.7.2	Comparative Study of Rural and Urban Sites	144
11.4	Functions of Production Planning and Control	127	12.8	Facilities Governing the Selection of Location	144
11.4.1	Relation between Production Planning and Control	128	12.8.1	Facilities Governing the Choice of a City/Urban Location	144
11.4.2	Pre-Planning	128	12.8.2	Facilities Governing the Choice of a Suburban Location	145
11.4.3	Active Planning	129	12.8.3	Facilities Governing the Choice of a Country/Rural Location	145
11.4.4	Post-Planning	129	12.9	Steps in the Facility Location Study	145
11.5	Routing	130	12.9.1	Territory Selection	145
11.5.1	Routing Procedure	130	12.9.2	Site/Community Selection	146
11.5.2	Route Sheets and Route Cards	130	12.10	Phase II: Location Planning	147
11.5.3	Advantages of Good Routing	131	12.10.1	Equal Weights Method	147
11.6	Scheduling	131	12.10.2	Variable Weights Method	147
11.6.1	Objectives of Scheduling and Loading	131	12.10.3	Weight-Cum-Rating Method	147
11.6.2	Factors Affecting Scheduling	131	12.10.4	Factor Point Rating Method	147
11.6.3	Scheduling Policies	132	12.10.5	Composite Measure Method	148
11.6.4	Master Scheduling	134	12.11	Quantitative Models for Facility Location Planning	149
11.6.5	Production Schedules—Blanket Orders	134	12.11.1	Median Model	149
11.7	Loading	134	12.11.2	Gravity Model	151
11.7.1	Objectives of Loading	135	13. Plant Layout		153
11.7.2	Adjustment to Machine Overloading and Under-Loading	135	13.1	Introduction	153
11.8	Dispatching	135	13.2	Factors Affecting Plant (Facility) Layout Decision	153
11.8.1	Duties/Activities of a Dispatcher	135			
11.8.2	Centralized and Decentralized Dispatching	136			

13.3	Types of Plant Layout	154
13.3.1	Product or Line Layout	154
13.3.2	Process or Functional Layout	154
13.3.3	Distinction between Product and Process Layouts	155
13.3.4	Combined Layout	156
13.3.5	Fixed Position Layout	156
13.4	Cellular or Group Layout	156
13.4.1	Advantages of Cellular Manufacturing System (CMS)	157
13.4.2	Suitability of CMS	157
13.4.3	CMS and Batch Manufacturing	157
13.4.4	CMS and Just in Time	157
13.4.5	CMS and FMS	158
13.4.6	Limitations of CMS	158
13.5	Computerized Layout Design Procedures	158
13.5.1	Systematic Layout Design Process	159
13.6	Flow Patterns to Facilitate Assembly Lines	159
13.6.1	Advantages of a Good Flow Pattern	159
13.6.2	Factors Governing Flow Pattern	159
13.7	Types of Flow Lines	159
13.7.1	Horizontal Flow Lines	159
13.7.2	Vertical Flow Lines	160
	<i>Review Exercises</i>	162

Unit Four: Methods Management 169–231

14.	Industrial Engineering and Methods Management	
	<i>An Outline</i>	171
14.1	Introduction	171
14.2	What Are Industrial Engineering and Methods Management?	171
14.3	History and Development of Industrial Engineering	172
14.3.1	Handicraft Era	173
14.3.2	Industrial Revolution Era	173
14.3.3	Scientific Management Era	173
14.3.4	Operations Research Era	173
14.3.5	Computerized Systems Era	174
14.4	Objectives of Methods Management	175
14.5	Significance of Industrial Engineering in the Industry	175
14.6	Organization Structure of Industrial Engineering	175
14.7	Activities of Methods Management	177
14.7.1	Before the Establishment of Industry	177
14.7.2	During the Establishment of Industry	178
14.7.3	After the Establishment of Industry	178
14.8	Further Scope of Methods Management	179
14.8.1	Work Simplification Programs	179
14.8.2	Job Rotation, Job Enlargement, and Job Enrichment	180
14.8.3	Value Analysis	181
14.8.4	Suggestion Systems and Idea Management	181

15.	Work Study	
	<i>An Overview</i>	183
15.1	Introduction	183
15.2	History	183
15.2.1	F. W. Taylor—Scientific Management	184
15.2.2	Evolution of Time Study	184
15.2.3	Resistance to Time Study	184
15.2.4	Gilbreths' Contribution	184
15.2.5	Some More Contributors	184
15.3	Scope and Objectives of Work Study	185
15.4	Work Study: An Overview	185
15.4.1	Time Study	185
15.4.2	Method Study	186
15.4.3	Definition of Work Study	186
15.4.4	Need for Work Study	186
15.4.5	Advantages of Work Study	187
15.5	Productivity and Work Study	188
15.5.1	Concept of Productivity	188
15.5.2	Production and Productivity	188
15.5.3	Role of Work Study	188
15.5.4	Productivity of Major Resources	188
15.5.5	Reasons for Low Productivity	188
15.5.6	Work Study: A Tool to Increase Productivity	189
15.5.7	Steps to Increase Productivity through Work Study	189
16.	Method Study	190
16.1	Introduction	190
16.2	Objectives of Method Study	190
16.3	Procedure of Method Study	190
16.3.1	Select	191
16.3.2	Record	191
16.3.3	Examine	191
16.3.4	Develop	191
16.3.5	Install	191
16.3.6	Maintain	192
16.4	Micromotion Study	192
16.4.1	Equipment Used in Micromotion Study	193
16.4.2	Factors to Be Considered while Method Study Is Conducted	194
16.5	Tools of Method Study: Recording Techniques	195
16.5.1	Charts	195
16.5.2	Diagrams	198
16.5.3	Photographic Aids	199
17.	Time Study—Work Measurement	201
17.1	Introduction	201
17.2	Work Measurement and Time Study	201
17.3	Time Study Procedure	202
17.3.1	Recording Necessary Information	202
17.3.2	Breaking the Job into Elements	203
17.3.3	Timing Each Element	203

17.4 Performance Rating	204	19.3 Objectives of Inventory	236
17.4.1 Westinghouse System of Rating	204	19.4 Functions of Inventory	236
17.4.2 Synthetic Rating	205	19.5 Factors Affecting Inventory	237
17.4.3 Objective Rating	205	19.6 Classification of Inventory	237
17.4.4 Skill and Effort Rating	206	19.6.1 Classification of Inventories by a Purchase Manager	237
17.4.5 Physiological Evaluation of Performance Level	207	19.6.2 Based on Quantities and Measurement	237
17.5 Allowances	207	19.6.3 Classification of Inventories by a Manufacturer	237
17.5.1 Interference Allowance	207	19.6.4 Classification of Inventories in a Large-Scale Industry	238
17.5.2 Relaxation Allowance	207	19.7 Classification by a Stores Manager	238
17.5.3 Process Allowance	208	19.7.1 A–B–C Analysis	238
17.5.4 Contingency Allowance	208	19.7.2 S–D–E Analysis	238
17.5.5 Special Allowance	208	19.7.3 F–S–N–D (or F–S–N) Analysis	239
17.6 Predetermined Motion Time Standards (PMTS)	208	19.7.4 V–E–D Analysis	239
17.6.1 Work Factor System (WFS)	208	19.7.5 C–I–N Analysis	239
17.6.2 Method Time Measurement (MTM)	209	19.7.6 V–E–I–N Analysis	239
17.6.3 Basic Motion Time Study (BMTS)	210	19.7.7 S–Os Analysis	239
17.7 Most	210	19.7.8 G–O–L–F Analysis	240
17.8 Work Sampling	210	19.7.9 H–M–L Analysis	240
17.8.1 Objectives	210	19.7.10 X–Y–Z Analysis	240
17.8.2 Procedure	210	19.8 Two-dimensional Classification	240
17.8.3 Number of Cycles to Be Timed	211	19.9 Music 3-D Model	240
17.8.4 Applications of Work Sampling	212	19.10 A–B–C Analysis for Always Better Control	240
17.8.5 Advantages of Work Sampling over Time Study	212	19.10.1 A–B–C Class Items on Consumption and Cost Scales	241
17.8.6 Disadvantages of Work Sampling	213		
18. Ergonomics	214	20. Inventory Models	244
18.1 Introduction	214	20.1 Introduction	244
18.2 Meaning of Ergonomics	214	20.2 Objectives and Functions of Materials Manager	244

23.8 Advanced Business Models Similar to the JIT Approach 288

 23.8.1 Vendor-Managed Inventory (VMI) 288

 23.8.2 Customer-Managed Inventory (CMI) 288

 23.8.3 Vendor Rating and Development 289

23.9 Supply Chain Management 289

 23.9.1 Concept of Supply Chain Management 289

 23.9.2 Supply Chain Processes 289

 23.9.3 Tasks of Supply Chain Management 289

 23.9.4 Characteristics of Supply Chain Management 289

 23.9.5 Important Elements of Supply Chain Management 290

 23.9.6 Role of Supply Chain Management 290

 23.9.7 Limitations of Supply Chain Management 290

Review Exercises 291

Unit Six: Quality Management 303–371

24. Quality Concepts 305

 24.1 Introduction 305

 24.2 The Definition and Concept of Quality 305

 24.2.1 Definition of Quality According to ISO 9000 305

 24.2.2 Meaning and Explanation 305

 24.2.3 Basic Terms and Definitions of Quality 306

 24.2.4 Accuracy and Precision 306

 24.3 Dimensions of Quality 307

 24.3.1 The Eight Dimensions of Quality 307

 24.4 Methods of Generating Ideas for Quality Improvement 308

 24.5 Inspection 308

 24.6 Types of Inspection 308

 24.6.1 Based on the Quantity of Inspection 308

 24.6.2 Based on the Stage of Inspection 309

 24.7 The Role of Inspection 309

 24.7.1 Problem Identification 309

 24.7.2 Problem Prevention 310

 24.7.3 Problem Elimination 310

 24.8 Systems of Quality Control 310

 24.8.1 Statistical Quality Control (SQC) 310

 24.8.2 Managerial Quality Control (MQC) 310

 24.8.3 Total Quality Control (TQC) 310

 24.9 Objectives of Quality Control 310

 24.10 Cost of Quality 311

 24.10.1 Quality–Cost Tradeoff 311

 24.11 Quality in Service Organizations 312

 24.11.1 Characteristics of Services 312

 24.11.2 Differences between Goods and Services 312

24.12 The Quality Gurus and Their Views on Quality 313

 24.12.1 Dr. W. Edwards Deming’s Philosophy 313

 24.12.2 Dr. Joseph M. Juran 314

 24.12.3 Philip Crosby 315

25. Statistical Quality Control (SQC) and Statistical Process Control (SPC) 316

 25.1 Introduction 316

 25.2 Objectives/Uses of Statistical Quality Control Charts 316

 25.3 Statistical Quality Control 316

 25.4 Variables and Attributes 316

 25.5 Statistical Process Control 317

 25.5.1 Random Causes (or Chance or Special Causes) 317

 25.5.2 Assignable or Common Causes 317

 25.6 Process Capability 318

 25.6.1 Uses of Process Capability Information 318

 25.7 Seven Tools of SQC 319

 25.8 Control Charts 320

 25.8.1 Control Charts for Variables—Mean–Range (R) Charts 321

 25.8.2 Merits of Mean–Range Charts 321

 25.8.3 Tips for Interpretations of Graphical Representations of Mean–Range Control Charts 321

 25.9 Interpretations of Results of Mean–Range Charts 323

 25.10 Control Charts for Attributes: p-Chart for Defectives 325

 25.10.1 Merits of a p-Chart 326

 25.11 Control Charts for Variables—c-Chart for Defects 327

 25.11.1 Merits of a c-Chart 327

 25.12 Terminologies and Their Distinctions 329

 25.12.1 Variables and Attributes (Mean–Range Charts and p-Chart and c-Chart) 329

 25.12.2 Control Limits and Tolerance Limits 329

 25.12.3 Control Limits and Warning Limits 329

 25.12.4 Control Limits and Confidence Limits 329

 25.12.5 Defect and Defective 330

 25.12.6 Basis for Confidence Limits and Control Limits 330

26. Acceptance Sampling 331

 26.1 Introduction 331

 26.2 Situations Warranting Sampling Inspection 331

 26.2.1 Desirable Characteristics of a “Sample” 332

 26.2.2 Merits of Sampling Inspection Method 332

 26.2.3 Demerits of Sampling Inspection Method 332

26.3	Methods for Selection of a Sample for Sampling Inspection (Methods of Sampling)	332	27.6	Poka-Yoke System: Anticipating and Eliminating Errors	350
26.3.1	Random Sampling Methods	332	27.6.1	Four Principles of Poka-Yoke	350
26.3.2	Non-Random Sampling Methods	333	27.6.2	Role of Inspection	351
26.3.3	Factors Affecting Selection of Sample for Sampling Inspection	333	27.6.3	Building a Quality Culture in the Organization	351
26.4	Sampling Plans	334	27.6.4	Quality Culture and Profit Culture	351
26.4.1	Methods of Acceptance Sampling	334	27.6.5	Transformation of Culture Required for TQM	351
26.5	Operating Characteristic Curves	336	27.6.6	Sustainable Development	352
