## Chapter 1

### Climate Change and Variability

1.1 Introduction to Climate Change	1
1.2 Significance of Climate Change for Agriculture	4
1.3 Basics on Computing and Calculation of Climate Change	6
1.4 Climate Change, Global Processes, and Effects	9
1.5 The Greenhouse Effect	11
1.5.1 Greenhouse Gases and “Enhanced Greenhouse Effect”	13
1.6 Climate Change and Global Warming	14
1.7 Climate Change and Air Pollution	14
1.8 Global Sector Wise Greenhouse Gases Contributions to Climate Change	15
1.9 Global Transport Sector Contributions to Climate Change (2019 Data)	16

**(xviii) Contents**

---

1.10	Global Agriculture Sector Contributions to Climate Change	17
1.11	Global Agricultural Chemicals Sector Contributions to Climate Change	18
1.12	Global Economic Losses due to Climate Change	19
1.13	Country wise GHG Emissions in GtCO <sub>2</sub> e (Gt CO <sub>2</sub> e stands for Gigatons of Carbon Dioxide Equivalent)	19
1.14	Global Regions most Vulnerable to Climate Change	19
1.15	Evidence for Climate Change	21
1.16	Climate Variability	22
1.17	Differences between Climate Variability and Climate Change	25
1.18	The Intergovernmental Panel on Climate Change (IPCC)	26
1.19	Addressing Climate Change and Variability Challenges	28

## **Chapter 2**

### **Greenhouse Gases (GHGs) and Climate Change**

2.1	Introduction to Greenhouse Gases (GHGs)	29
2.2	Major GHGs and their Effects on Climate Change	32
2.2.1	Carbon Dioxide	32
2.2.2	Methane	39
2.2.3	Nitrous Oxide	42
2.2.4	Water Vapor	43
2.2.5	Ozone	45
2.2.6	Fluorocarbons	47
2.3	Addressing GHG Emission Challenges	48

## **Chapter 3**

### **Climate Change and Solar Radiation**

3.1	Introduction to Solar Radiation	49
3.2	Trends, Sources, and Projections	51
3.3	General Effects of Solar Radiation on Crops	51
3.4	Absorptivity of Individual Leaves	53
3.5	PAR (Light) and Crop Growth	54
3.6	Intercepted Solar Radiation and Time of Growing Season	55
3.6.1	Factors influencing Intercepted PAR and Crop Growth	56
3.7	Basic Micrometeorological Terminology and Laws of Solar Radiation for Climate Change Studies	56
3.8	Solar Radiation Techniques for Climate Change Mitigation and Adaptation	57
3.8.1	Effects of Surface Geometry on Solar Radiation	57
3.8.2	Relation of Sun Angle to Effectiveness of Insolation	58
3.8.3	Crop Management and Layout	59
3.9	Addressing Climate Change Challenges of Solar Radiation	60

## **Chapter 4**

### **Climate Change and Wind**

4.1	Introduction to Wind	61
4.2	Trends, Sources, and Projections	62
4.3	Factors influencing Wind Speed Changes	62
4.4	General Effects of Wind on Crops	63

4.5	Relationship between Prevailing Wind Direction and Area Protected by Windbreaks	65
4.6	Generalized Wind Profile of a Short Crop	66
4.7	Actual Wind Speeds at various Heights before and behind Barrier	68
4.8	Influence of Solid Barrier on Airflow in Windbreaks	69
4.9	Basic Micrometeorological Terminology and Laws of Wind for Climate Change Studies	71
4.10	Wind Techniques for Climate Change Mitigation and Adaptation	75
4.11	Addressing Climate Change Challenges on Wind	77

## **Chapter 5**

### **Climate Change and Temperature**

5.1	Introduction to Air Temperature	78
5.2	Trends, Sources, and Projections	80
5.2.1	Latest IPCC Reports on Temperature	81
5.2.2	The Ten (10) Hottest Years on Record	83
5.3	General Effects of Air Temperature on Crops	84
5.3.1	Generalised Crop Growth Response to Temperature	84
5.3.2	Growing Degree Unit Assumed Relationship between Plant Growth and Temperature	85
5.3.3	Generalized Relationship between Development Time and Temperature of Crops	87
5.3.4	Generalized Effect of Temperature on RGR in Tropical, Temperate, and Sub Polar Regions	88
5.3.5	Temperature and Photorespiration	90
5.3.6	Temperature and Added Fertilizers	90

	<b>Contents</b>	<b>(xxi)</b>
5.3.7	Temperature and Frost	90
5.3.8	Temperature and Snow Melt	91
5.3.9	Cardinal Temperatures	92
5.3.10	Day Time and Night Time Temperatures and Crops	92
5.3.11	Temperature and Flavor of Strawberries	93
5.3.12	Effect of Night Temperature on Tomato Plant	94
5.4	Leaf Temperature and Crop Growth	95
5.5	General Effects of Air Temperature on Pests and Diseases	97
5.6	Soil Temperature	99
5.6.1	Introduction to Soil Temperature	99
5.6.2	General Effects of Soil Temperature on Crops	100
5.6.3	Dry Matter of Corn Vs Soil Temperature	101
5.6.4	Soil Thermal Properties	102
5.7	Basic Micrometeorological Terminology and Laws of Temperature for Climate Change Studies	103
5.8	Temperature Techniques for Climate Change Mitigation and Adaptation	104
5.9	Addressing Climate Change Challenges of Temperature	105

## **Chapter 6**

### **Climate Change and Rainfall, Dew, and Fog**

6.1	Introduction to Rainfall	106
6.2	Trends, Sources, and Projections	108
6.3	General Effects of Rainfall on Crops	109
6.3.1	Effects of Water on Plant Physiological Processes	109

**(xxii) Contents**

---

6.3.2	Variation in Crop Water use during Growing Season	110
6.3.3	Water Use Efficiency and Climate Change	111
6.3.4	Relationships between Wheat Yields and Seasonal Rainfall in Israel (Arid) and France (Humid)	113
6.3.5	Relationships among Wind Erosion, Rainfall, and Vegetation	114
6.4	Evaporative Power of Air (EPA)	116
6.5	Model Simulated and Model Projections of Indian Summer Monsoon Rainfall (ISMR) in the Global Warming Scenario	116
6.6	Maximization of Rainfall usage	118
6.7	Introduction to Dew	119
6.7.1	Factors affecting Dew Formation	119
6.8	General Effects of Dew on Crops	121
6.8.1	Disadvantages of Dew	121
6.8.2	Application	122
6.9	Fog	122
6.9.1	Introduction to Fog	122
6.9.2	Conditions for Fog Formation	122
6.10	Uses of Fog in Agriculture	123
6.11	Occult Precipitation	123
6.12	Basic Micrometeorological Terminology and Laws of Precipitation/Condensation for Climate Change Studies	124
6.13	Rainfall Techniques for Climate Change Mitigation and Adaptation	125
6.13.1	Management of Cyclones, Floods, Droughts, and Different Forms of Condensation	125
6.14	Addressing Climate Change Challenges on Rainfall and other Forms of Condensation	125

## Chapter 7

# Climate Change and Sea Level Rising and Extreme Events

7.1 Introduction to Climate Change and Sea Level Rising	126
7.2 Causes of Sea Level Rising	127
7.3 Trends, Sources, and Projections	128
7.3.1 Regional Variability	129
7.3.2 Long-Term Impacts	129
7.3.3 Latest IPCC Reports on Sea Level Rising	130
7.4 Carbon Assimilation by Oceans	131
7.5 Mitigation and Adaptation Strategies	131
7.6 Extreme Weather Events	132
7.6.1 Introduction to Extreme Weather Events	132
7.7 Trends, Sources, and Projections	132
7.8 Increased Heat Waves	133
7.9 More Intense Rainfall and Floods	133
7.10 Longer and More Severe Droughts	134
7.11 Increased Storms	135
7.12 Increased Wildfire Risk	136
7.13 Latest Reports of IPCC on Extreme Events	136
7.14 Crop Damage and Kinetic Energy of Hailstones	138
7.15 Global Level Examples and Losses due to Extreme Events	139
7.16 Impacts on Developing Countries and Small States	140
7.17 Mitigation and Adaptation Strategies	140
7.17.1 Precipitation	140

7.17.2 Drought	141
7.17.3 Rare Floods	141
7.18 Addressing Climate Change Challenges of Sea Level Raising and Extreme Events	142

## **Chapter 8**

# **Climate Change and Photosynthesis and Cultivated Soils**

8.1 Introduction to Photosynthesis	143
8.1.1 Photosynthetic Pathways	145
8.1.2 Photosynthesis and Respiration	147
8.2 Effect of Temperature on Photosynthesis and Respiration Ratio of Tomato	148
8.3 Generalized Relationship between Photosynthesis and Light Intensity	150
8.4 Generalized Relationship between PAR/Light and Net Carbon Dioxide Uptake	151
8.5 Relationships among Soil and Atmospheric Moisture Stresses, Photosynthesis (P) and Light Intensities (I)	153
8.6 Summary of Interactions and Complexities among Weather Elements and Photosynthates	155
8.7 Generalized Impacts of Climate Change on Photosynthesis	159
8.8 Mitigation and Adaptation Strategies for Photosynthesis under Climate Change Scenarios	160
8.9 Cultivated Soils	160
8.9.1 Introduction to Micrometeorology of Cultivated Soils	160
8.9.2 Soil Moisture and Microclimate	161

---

8.9.3 Crop Canopy and Soil Microclimate	162
8.9.4 Soil Microclimate and Improved Agricultural Practices	162
8.10 Addressing Climate Change Challenges of Photosynthesis and Cultivated Soils	163

## **Chapter 9**

# **General options for Climate Change, Climate Neutral, and Net Zero Emissions**

9.1 Introduction to General options for Climate Change	164
9.2 General options for Climate Change “Mitigation”	166
9.2.1 Savings	166
9.2.2 Costs	167
9.3 General options for Climate Change “Adaptation”	167
9.4 General options for Climate Change as Individuals	167
9.5 Tackling Climate Change	170
9.6 Adaptation to Climate Variability in Indigenous Civilizations	170
9.7 Adaptation to Present Day Climate Change by Modern Civilizations	171
9.7.1 Case Study of the Perth, Australia Water Supply	171
9.7.2 Tsho Rolpa Risk Reduction Project in Nepal	171
9.7.3 Adaptation to the Rising Sea Level, The Maeslantkering in the Netherlands	172
9.8 Natural – Capital Framework for Changing Climate	172

9.9	Adaption Cycle through Space and Time to Climate Change	174
9.10	Adaption Framework for Changing Climate	175
9.11	The Concept of “Climate Neutral”	178
9.11.1	Reasons for Climate Neutral	178
9.12	The Concept of “Net Zero Emissions”	180
9.13	Climate/Carbon Neutrality Vs Net-Zero	182
9.14	Urgency of Near-term Integrated Climate Action	183
9.15	Addressing General Climate Change Issues	183

## **Chapter 10**

# **Climate Change and Global and Indian Agriculture**

10.1	Introduction to Climate Change and Global and Indian Agriculture	184
10.2	IPCC Report on Impact of Climate Change on Agriculture	186
10.3	Impacts of Climate Change on Global Agriculture	188
10.3.1	Tropical Regions	188
10.3.2	Temperate Regions	192
10.4	General Mitigation and Adaptation options for Global Agriculture	194
10.4.1	Options for Mitigation	194
10.4.2	Options for Adaptation	194
10.5	Nature-based options for Mitigation and Adaptation for Global Agriculture	195
10.6	Potential Agricultural Mitigation and Adaptations to Climate Change at various Scales	196

---

10.7	Climate Change and Indian Agriculture	197
10.8	GHGs Emission Scenarios of India	198
10.9	Mitigation Targets and Commitments by the Government of India	198
10.10	Opportunities for Net Zero Emissions by 2070 by India	199
10.11	Food needs and associated Technology efficiency Targets by Amritcal (2047)	200
10.12	Key components of India's Net Zero Commitment	200
10.13	Key Role players in India's Net Zero Carbon Commitment	200
10.14	Indian Agriculture Sector in achieving Net Zero GHG emission Target by 2070	201
10.15	Priority Technologies for Implementation towards Net Zero Commitment in India	201
10.16	Available Strategies for GHGs Mitigation in Indian Agriculture Sector	202
10.17	Policy Recommendations	202
10.18	Crisp Description of Important Agricultural Systems, Techniques, Technologies, and Approaches for Climate Change Mitigation and Adaptation at all Levels	203
10.18.1	Organic Farming	203
10.18.2	Natural Farming	204
10.18.3	Conservation Agriculture	206
10.18.4	Carbon Farming	208
10.18.5	Climate Smart Agriculture	208
10.18.6	Climate Resilient Agriculture	209
10.18.7	Controlled Environment Agriculture (CEA)	210
10.18.8	Regenerative Agriculture	210

10.18.9 Biochar	211
10.18.10 Carbon Offsetting and Carbon Credits	213
10.19 Addressing General Climate Change Challenges on Global and Indian Agriculture	215

## Chapter 11

### Climate Change and Major Cereal and Pulse Crops

11.1 Introduction to Major Cereal and Pulse Crops	216
11.2 Major Cereal Crops	217
11.2.1 Rice ( <u>Oryza sativa</u> )	217
11.2.2 Wheat ( <u>Triticum aestivum</u> )	220
11.2.3 Maize ( <u>Zea mays</u> )	222
11.3 Major Pulse Crops	225
11.3.1 Chickpea ( <u>Cicer arietinum</u> )	225
11.3.2 Pigeonpea ( <u>Cajanus cajan</u> )	226
11.3.3 Soybean ( <u>Glycine max.</u> )	228
11.4 Addressing Climate Change Challenges on Cereals and Pulse Crops	230

## Chapter 12

### Climate Change and Major Oilseeds and Commercial Crops, and Pests and Diseases

12.1 Introduction to Major Oilseeds and Commercial Crops	231
12.2 Major Oilseeds Crops	233
12.2.1 Groundnut ( <u>Arachis hypogaea</u> )	233

12.2.2 Rapeseed and Mustard ( <u>Brassica napus</u> and <u>Brassica rapa.</u> and <u>Brassica juncea</u> )	236
12.2.3 Sunflower ( <u>Helianthus annuus</u> )	238
12.3 Major Commercial Crops	240
12.3.1 Cotton ( <u>Gossypium hirsutum</u> )	240
12.3.2 Sugarcane ( <u>Saccharum officinarum</u> )	242
12.3.3 Cassava ( <u>Manihot esculenta</u> )	245
12.4 Climate Change and Pests and Diseases on Agricultural Crops	247
12.4.1 Generalized Impacts of Climate Change on Crop Pests	247
12.4.2 Generalized Impacts of Climate Change on Crop Diseases	248
12.4.3 Other Impacts of Climate Change on Crop Pests and Diseases	249
12.4.4 Examples of Climate Change Impacts on Pests and Diseases	249
12.5 Addressing the issues of Climate Change on Oilseeds and Pulse Crops	252

## **Chapter 13**

### **Climate Change and Major Horticultural Crops**

13.1 Introduction to Major Horticultural Crops	253
13.2 Major Fruit Crops of the World	255
13.2.1 Mango ( <u>Mangifera indica</u> )	255
13.2.2 Orange ( <u>Citrus sinensis</u> )	257
13.2.3 Banana ( <u>Musa paradisiaca</u> )	259

**(xxx) Contents**

---

13.2.4	Grape ( <u>Vitis vinifera</u> )	261
13.2.5	Apple ( <u>Malus domestica</u> )	265
13.3	Major Plantation Crops of the World	267
13.3.1	Coconut ( <u>Cocos nucifera</u> )	267
13.3.2	Coffee <u>Coffea arabica</u> (Arabica coffee) and <u>Coffea canephora</u> (Robusta coffee)	270
13.3.3	Tea ( <u>Camellia sinensis</u> )	273
13.4	Major Vegetable Crops of the World	275
13.4.1	Tomato ( <u>Solanum lycopersicum</u> )	275
13.4.2	Brinjal ( <u>Solanum melongena</u> )	278
13.4.3	Leafy Vegetables	280
13.5	Impact of Climate Change on Pests and Diseases of Horticultural Crops	283
13.5.1	Overall Impacts and Mitigation and Adaptation Strategies	285
13.6	Addressing Climate Change Challenges of Horticultural Crops	286

## **Chapter 14**

### **Climate Change and Livestock and Humans**

14.1	Introduction to Climate Change and Livestock	287
14.2	Climate and Livestock	289
14.2.1	Weather Elements and their Direct effects on Livestock	289
14.3	Impacts of Climate Change on Livestock	291
14.4	Heat Production and Heat Exchange in Livestock	293

---

14.5	Effects of Heat Stress on Livestock	294
14.5.1	Effects of Heat Stress on Feed Intake and Digestion	294
14.5.2	Effects of Heat Stress on Reproduction System of Livestock	295
14.5.3	Effects of Heat Stress on Hormonal Changes in Livestock	296
14.5.4	Effects of Heat Stress on Behavioral Changes of Livestock	297
14.5.5	Effects of Heat Stress on Immune System and Disease Susceptibility of Livestock	297
14.6	Way Forward	299
14.7	Impacts of Climate Change on Fisheries	300
14.8	Impacts of Climate Change on Poultry	302
14.9	Effects of Climate Change on Humans	305
14.9.1	Effects of Weather Elements on Humans	305
14.9.2	Humans and Microclimate	306
14.9.3	Effects of Climate Change on Human Health	306
14.10	Addressing Climate Change Challenges on Livestock and Humans	308

## **Chapter 15**

# **Climate Change, Food Production and Food Security, and Role of Agrometeorology**

15.1	Introduction to Food Production and Food Security	309
15.2	Homes of Evolution of Agriculture for Food Production and Security in the “Old and New” World	311
15.3	Definitions	312

---

15.4	Sustainable Development Goals	313
15.4.1	Targets under the Sustainable Development Goals (SDG) of Climate action for Food Production and Security	313
15.5	Significance of Climate Change on Food Production and Food Security	313
15.6	Impacts of Climate Change on Food Production and Food Security in different Regions of the World	314
15.7	The FAO Report on the Cascading Effects of Climate Change on Food Security and Nutrition	316
15.8	The IPCC Report on Human Dimention of Climate Change at Nexus of Climate Change, Climate Hazards, and Socio Economic Development	318
15.9	Social and Economic Considerations in Climate Change Studies	320
15.10	Linkages among Food Production, Environmental Issues, and Climate Change	320
15.11	The State of Food Security and Nutrition in the World	322
15.11.1	Global Agriculture and Animal Production Statistics	322
15.11.2	Climate Change, Food Supply, and Demand	324
15.11.3	Key Findings beyond Hunger	326
15.11.4	Financing to End Hunger	327
15.12	Impacts of Climate Change on Extreme Events and Food Security	328
15.13	Critical issues and Strategies to Cope with Climate Change in Food Production	329
15.14	Options to Deal with Climate Change Impacts on Food Security	330
15.15	The Future of Agricultural Meteorology in the Backdrop of Climate Change	331

15.16	Key trends in Agricultural Meteorology	335
15.16.1	Challenges and Opportunities	336
15.17	Role of Agrometeorologists for Profitable Agriculture, Food Production, and Food Security under Climate Change	338
15.18	Addressing the Climate Change Challenges on Food Production and Food Security	341

## **Chapter 16**

# **Global Conventions, Treaties, Summits, and Schools of Thought on Climate Change**

16.1	Introduction to Global Conventions, Treaties, and Summits on Climate Change and Agriculture	342
16.2	Important Global Conventions, Treaties, and Summits on Climate Change and Agriculture	344
16.3	The United Nations Framework Convention on Climate Change (UNFCCC)	344
16.4	Green Climate Fund	346
16.5	The KYOTO Protocol	347
16.6	The Paris Agreement	348
16.7	The Conference of Parties 26 (COP 26)	349
16.8	The Conference of Parties 29 (COP29)	351
16.8.1	Adaptation	352
16.8.2	Gender and Climate Change	353
16.9	The Convention on Biological Diversity (CBD)	353
16.10	United Nations Convention to Combat Desertification (UNCCD)	354
16.11	The World Food Summit (WFS)	356

16.12	Introduction to Schools of Thought on Climate Change	357
16.12.1	Schools of Thought on Agriculture	358
16.12.2	Schools of Thought on Afforestation and Reforestation	359
16.12.3	Schools of Thought on Biodiesel	361
16.13	Terminology on Climate Change Studies	362
16.14	Addressing Climate Change Challenge on Global Issues	366

## **Chapter 17**

### **Agrometeorological Concepts for Climate Change and Agriculture**

17.1	Introduction to Importance of Concepts on Climate Change and Agriculture	367
17.2	The Concept of Micro, Meso, and Macro Meteorology for Climate Change Studies	369
17.2.1	Different Groups of Climates	369
17.3	Scale of observations for Agricultural Meteorological Purposes	370
17.4	Policy Concept on Climate Change (PCCC)	370
17.4.1	The Genesis	370
17.4.2	The Hypothesis	372
17.4.3	Excerpts from International Conventions, Agreements, and Summits	375
17.4.4	India's Proactive Approach	376
17.4.5	The Agromet Advisory Services in India	377
17.4.6	Global and Indian Weather Forecasting Services	378
17.4.7	Indian Weather Forecasting Services	380

17.4.8	Process and Procedure of Decision Making on “Climate Policy” at SAUs Level	381
17.5	Micromet Concept for Climate Change (MCCC)	386
17.5.1	The Genesis	386
17.5.2	The Hypothesis	387
17.5.3	Excerpts on Climate Change, Weather Elements, Cultivated Soils, and Photosynthesis	390
17.5.4	Vedic Science on “Pancha Bhootas/ Five Natural Forces”	392
17.5.5	Classical Micrometeorology on Exchange of Energy, Interrelationships, and Interactions between “Weather Elements” and “Soil”	397
17.5.6	Crisp Review of Knowledge on Classical Micrometeorology for Climate Change Studies	398
17.5.7	Summary of Analogies and Transfer Processes between “Vedic Knowledge” and “Classical Micrometeorology Knowledge”	406
17.5.8	Earliest Investigations and Research on Crop Weather Relationships and Microclimate of Crops in India	408
17.5.9	Process and Procedure of Decision making on “Climate Policy” at SAUs Level	409
17.6	To make a beginning from Home	412
17.7	Addressing the Issues of Climate Change in Agriculture and Allied Sciences	413

## Chapter 18

### Project on Establishment of Climate Change and Agriculture Center (CCAC)

18.1	Introduction to Projects on Climate Change	414
18.2	Project Title	415
18.2.1	The Genesis	415
18.2.2	The Hypothesis	417
18.2.3	Key Words	419
18.2.4	Project Proposer, Implementing Institution, and Collaborating Institutions	419
18.2.5	Budget	420
18.2.6	State of Knowledge	420
18.2.7	The Objectives	424
18.2.8	Methodology	424
18.2.9	Expected Outcomes and Utility of the Products Developed	432
	<i>References</i>	435
