<i>Preface to the Third Edition</i>	(vii)
<i>Preface to the Second Edition</i>	(ix)
<i>Preface to the First Edition</i>	(xi)
<i>Acknowledgements</i>	(xiii)
<i>List of Acronyms and Abbreviations</i>	(xv)
1. Fundamentals	
1.1 Principles of Meteorological Remote Sensing	2
1.1.1 Electromagnetic Spectrum	2
1.1.2 Absorption, Emission, Reflection and Scattering	5
1.1.3 Black Body and Radiation Laws	6
1.1.4 Solar and Terrestrial Radiation	7
1.1.5 Sun-Earth-Atmosphere Radiation Budget	9
1.2 Satellite Orbits	9
1.2.1 Gravitational and Astronomical Laws	9
1.2.2 Orbital Elements	11
1.2.3 Types of Orbits	14
1.2.4 Satellite Attitude	17
1.3 Meteorological Satellite Payloads	19
1.3.1 TV Cameras	20
1.3.2 Scanning Radiometers	21
1.3.3 Sounders	22
1.3.4 CCD Imagers	23
1.3.5 Multispectral and Hyperspectral Imaging	23
1.3.6 Passive Microwave Sensors	26
1.3.7 Active Sensors	27
1.4 Satellite Imagery	28
1.4.1 Resolution	31
1.4.2 Navigation and Gridding	32
1.5 Indian Meteorological Satellites	33
1.6 References	36

2. Weather Systems Observed in Satellite Imagery	
2.1 Characteristics of Satellite Imagery	39
2.2 Local Severe Storms	43
2.2.1 Thunderstorms, Hailstorms and Cloudbursts	44
2.2.2 Dust-storms or <i>Andhis</i>	49
2.2.3 Nor'westers or <i>Kal-Baisakhis</i>	50
2.2.4 Tornadoes	52
2.2.5 Mountain Waves	53
2.3 Inter-Tropical Convergence Zone	55
2.4 Monsoons	58
2.4.1 Onset and Advance of Southwest Monsoon	59
2.4.2 Low Level Jet	63
2.4.3 Tropical Easterly Jet	64
2.4.4 Monsoon Depressions and MTCs	65
2.4.5 Active and Weak Phases	69
2.4.6 Breaks in the Monsoon	72
2.4.7 Withdrawal of Southwest Monsoon	73
2.4.8 Northeast Monsoon	75
2.4.9 Easterly Waves	77
2.5 Tropical Cyclones	78
2.5.1 Nomenclature of Low Pressure Systems	79
2.5.2 Tropical Cyclone Basins	80
2.5.3 Structure of Tropical Cyclones	82
2.5.4 Dvorak Technique	85
2.5.5 Objective Dvorak Technique	92
2.5.6 Image Enhancement	93
2.5.7 Movement of Tropical Cyclones	97
2.5.8 Cyclone Monica in the Southern Hemisphere	98
2.5.9 Cyclone Pairs	100
2.6 Winter Systems over India	102
2.6.1 Western Disturbances	102
2.6.2 Fog and Snow	105

2.7 Extra-Tropical Weather	107
2.7.1 Air Masses	107
2.7.2 Cold, Warm, Stationary and Occluded Fronts	108
2.7.3 Mid-latitude Cyclones	109
2.7.4 Sub-tropical Jet Stream	111
2.8 Interaction between Tropical and Mid-latitude Systems	112
2.9 References	114
3. Estimation of Atmospheric, Oceanic and Land Parameters	
3.1 Cloud Motion Winds	121
3.1.1 Extraction of CMWs	122
3.1.2 Use of Rapid-Scan Imagery	125
3.1.3 Applications of CMWs	126
3.2 Outgoing Longwave Radiation	128
3.2.1 ERBE and GERB Measurements	128
3.2.2 OLR Estimation	129
3.2.3 Applications of OLR	131
3.3 Large-Scale Precipitation	133
3.3.1 GOES Precipitation Index	134
3.3.2 Rainfall Estimation from Microwave Sensors	135
3.4 Vertical Profiles of Temperature and Water Vapour	136
3.4.1 NOAA TOVS	141
3.4.2 NOAA AMSU	142
3.4.3 GOES Sounders	142
3.4.4 DMSP SSM/T	143
3.4.5 INSAT-3D Sounder	144
3.5 Sea Surface Temperature	146
3.5.1 Properties of Ocean Water	146
3.5.2 The Layered Thermal Structure of the Ocean	147
3.5.3 Remote Sensing of Ocean Parameters	148
3.5.4 Satellite-derived Sea Surface Temperature	148
3.5.5 Microwave SST Retrievals	152
3.6 Potential Fishing Zones	153
3.7 Ocean Colour	154

3.8 Sea Surface Salinity	156
3.9 Soil Moisture	157
3.10 Vegetation Index	158
3.11 Snow Cover	160
3.12 Land Surface Temperature	161
3.13 References	162

4. Measurement of Parameters by Active Sensors

4.1 Precipitation	170
4.1.1 TRMM and GPM – Radar on a Satellite	171
4.2 Cloud Properties	175
4.2.1 POLDER – Lidar on a Satellite	176
4.2.2 CloudSat	177
4.2.3 CALIPSO	178
4.3 Sea Surface Winds – Scatterometer	180
4.3.1 Oceansat-3	181
4.4 Sea Surface Height – Altimeter	183
4.4.1 TOPEX/Poseidon	183
4.4.2 Jason and OSTM	184
4.5 References	184

5. Missions Accomplished

5.1 Megha-Tropiques	187
5.2 Tropical Rainfall Measuring Mission (TRMM)	189
5.3 Global Precipitation Mission (GPM)	190
5.4 A-Train	193
5.5 WindSat	194
5.6 International Satellite Cloud Climatology Project (ISCCP)	195
5.7 Global Precipitation Climatology Project (GPCP)	199
5.8 References	201

6. Current Global Configuration of Operational Satellites

6.1 Global Configuration of Meteorological Satellites	203
6.2 U.S. – GOES, NOAA, and Suomi NPP	204

6.3 Europe – Meteosat and MetOp	206
6.4 India – INSAT	208
6.5 Japan – Himawari	209
6.6 China – FY	210
6.7 Russia – Electro and Meteor	210
6.8 South Korea – Geo-KOMPSAT	211
6.9 WMO Space Programme	212
6.10 Satellite Data Assimilation in Numerical Weather Prediction	212
6.11 References	213
7. Satellite Monitoring of Climate Change	
7.1 Earth Radiation Budget	215
7.1.1 ERBE, CERES and GERB	216
7.2 Atmospheric Ozone	217
7.2.1 TOMS, OMI and GOME	217
7.2.2 Antarctic Ozone Hole	218
7.3 Sea Level Rise	219
7.4 Sea Surface Temperature	221
7.5 Greenhouse Gases	224
7.5.1 OCO	225
7.5.2 GHGSat	225
7.5.3 MethaneSAT	226
7.5.4 Tanager-1	226
7.6 Aerosols	227
7.7 References	228
8. New Dimensions in Satellite Remote Sensing	
8.1 Small Satellites	230
8.1.1 Precipitation Structure of Tropical Cyclones	231
8.1.2 TROPICS	231
8.1.3 GPS Radio Occultation Soundings	233
8.1.4 Wildfires	235
8.1.5 FireSat	236

8.2 Lightning	236
8.3 Planktons, Aerosols and Cloud Properties	238
8.3.1 PACE	238
8.3.2 EarthCARE	239
8.3.3 AOS	240
8.4 Atmosphere, Ocean and Land Parameters	242
8.4.1 Copernicus and Sentinels	242
8.5 Ecosystems, Earth's Crust and Cryosphere	244
8.5.1 NISAR	244
8.6 The Future Lies in AI	246
8.7 In Conclusion	247
8.8 References	247
Subject Index	249
