<i>Preface</i>	v
<i>Acknowledgements</i>	vii
<b>Chapter 1 Quality: Conceptual Framework</b>	<b>1</b>
1.1 Introduction	1
1.2 What is Quality?	2
1.2.1 Finally, What is “Quality?”	5
1.2.2 Definition of Quality According to TQM (As Defined in ISO 9000)	6
1.3 Basic Terminology Related to Quality	7
1.4 Accuracy and Precision	8
1.5 Dimensions of Quality	9
1.5.1 Eight Dimensions of Quality	10
1.6 Methods of Generating Ideas for Quality Improvement	11
1.7 Inspection	12
1.7.1 Types of Inspection	12
1.7.2 Role of Inspection	14
1.8 Systems of Quality Control	15
1.8.1 Statistical Quality Control	16
1.8.2 Managerial Quality Control	16
1.8.3 Total Quality Control	16
1.9 Objectives of Quality Control	16
1.10 Quality in Service Organizations	17
1.10.1 Characteristics of Services	17
1.10.2 Differences Between Goods and Services	17
<i>Summary</i>	19
<i>Key Concepts</i>	20
<b>Chapter 2 Quality Gurus and Their Contributions</b>	<b>23</b>
2.1 Introduction	23
2.2 History and Development	24
2.3 Walter Andrew Shewhart: The Father of Statistical Quality Control	26
2.3.1 Influence	28

2.4	Joseph Moses Juran: The Quality Trilogy to Plan, Control, and Improve	29
2.4.1	Quality Planning	29
2.4.2	Quality Control	30
2.4.3	Quality Improvement	30
2.5	Kaoru Ishikawa: One Step Further	31
2.6	Walter Edwards Deming: Management Obligations and Pride of Workmanship	33
2.6.1	Deming's 14 Points of Quality Management (Management Obligations)	34
2.6.2	Deming's 21 Obstacles to Quality Management	36
2.6.3	Deming's Five Deadly Quality Management Diseases	38
2.6.4	Quality Cycle: Plan-Do-Check-Act (PDCA)	39
2.7	Armand Vallin Feigenbaum: Hidden Plant Behind TQC	41
2.7.1	Total Quality System	42
2.7.2	PAF Model of Quality Costs	43
2.8	Philip B. Crosby: Zero Defects and Quality is Free	43
2.9	Shigeo Shingo: Make Mistake-Proof, Not Foolproof (Poka-Yoke)	44
2.10	Genichi Taguchi: Practical, Rapid Quality Methods	47
2.11	Taiichi Ohno: Father of TPS and JIT	48
2.12	Claus Moller: The Personal Quality	49
1.13	Malcolm Baldrige National Quality Award	50
	<i>Summary</i>	54
	<i>Key Concepts</i>	54
<b>Chapter 3 Acceptance Sampling</b>		<b>57</b>
3.1	Introduction	57
3.2	Situations Warranting Sampling Inspection	58
3.3	Desirable Characteristics of Sample	59
3.4	Merits of Sampling Inspection	59
3.5	Limitations of Sampling Inspection Method	60
3.6	Methods for Selection of a Sample for Sampling Inspection (Methods of Sampling)	60
3.6.1	Random Sampling Methods	60
3.6.2	Non-random Sampling Methods	63
3.7	Factors Affecting the Selection of Sample for Sampling Inspection	63
3.8	Sampling Plans	64
3.9	Methods of Acceptance Sampling	65
3.9.1	Single Sampling Plan	65
3.9.2	Double Sampling Plan	67
3.9.3	Multiple Sampling Plan	68
3.10	Operating Characteristic Curves	70
3.10.1	Sampling Risks	70
3.10.2	Effect of the Parameters on Acceptance Sampling Plans	72

3.10.3	Characteristics of OCC	81
3.10.4	Quality Indices for Acceptance Sampling Plans	81
3.10.5	Ideal OCC	84
	<i>Summary</i>	88
	<i>Key Concepts</i>	88
<b>Chapter 4 Statistical Quality Control and Statistical Process Control</b>		<b>91</b>
4.1	Introduction	91
4.2	Objectives and Uses of SQC Charts	92
4.3	Statistical Quality Control	92
4.4	Variables and Attributes	93
4.4.1	Variables	93
4.4.2	Attributes	93
4.5	Statistical Process Control	93
4.5.1	Random or Chance or Special Causes	94
4.5.2	Assignable or Common Causes	94
4.6	Process Capability	95
4.6.1	Uses of Process Capability Information	96
4.7	Seven Tools of SQC	96
4.8	Control Charts	100
4.8.1	Control Charts for Variables: Mean-Range Charts	100
4.8.2	Control Charts for Attributes: p-Chart for Defectives	108
4.8.3	Control Charts for Variables: c-Charts for Defects	112
4.9	Terminology and Their Distinctions	115
	<i>Summary</i>	123
	<i>Key Concepts</i>	123
<b>Chapter 5 Cost of Quality</b>		<b>125</b>
5.1	Introduction	125
5.2	Cost of Quality	126
5.2.1	Quality Costs...	127
5.2.2	Quality Equation: Cost of Quality	128
5.2.3	Cost of Poor Quality	129
5.2.4	Cost of Quality: Definition	130
5.3	Classification of Quality-Related Costs	131
5.4	Quality-Cost Analysis	133
5.5	Eliminate Total Quality Costs: A COQ Approach To TQM	134
5.5.1	Total Quality Cost	136
5.5.2	The Two Dimensions of COQ	137
5.6	Quality-Cost Trade-Off	137

5.7	CoQ: An Old Concept, New Thinking	140
5.7.1	Views of Quality Gurus on Cost of Quality	141
5.8	ISO 9000 and Cost of Quality	142
5.9	ISO 9000 Controlling COPQ	143
5.10	Six-Sigma and Cost of Quality	143
5.11	Uses and Applications of Cost of Quality Information	144
	<i>Summary</i>	145
	<i>Key Concepts</i>	145
 <b>Chapter 6 Six-Sigma: The Quality-Improvement Program</b>		<b>149</b>
6.1	Introduction	149
6.1.1	Objectives of Six-Sigma	150
6.2	Evolution of Six-Sigma	150
6.3	Six-Sigma Vs Process Capability	150
6.3.1	Relation Between Six-Sigma and Process Capability Index	151
6.4	What is Six-Sigma?	152
6.4.1	Defects Per Million Opportunities Analysis	154
6.4.2	Defects Per Million Opportunities Analysis: Procedure	157
6.5	Six-Sigma Vs Cost Of Quality	161
6.5.1	Variation of Cost of Poor Quality with Sigma Level	162
6.6	Six-Sigma Methodology (The Problem-Solving Process)	163
6.6.1	Define	163
6.6.2	Measure	164
6.6.3	Analyze	164
6.6.4	Innovate	164
6.6.5	Improve	165
6.6.6	Control	165
6.7	Design for Six-Sigma (DFSS) – DMADV	165
6.8	Merits of Six-Sigma	167
6.9	Limitations of Six-Sigma	167
6.10	Six-Sigma Participants and Hierarchy	168
6.10.1	Yellow Belts	168
6.10.2	Green Belts	168
6.10.3	Black Belts	168
6.10.4	Master Black Belt	169
6.10.5	Champions	169
6.11	Six-Sigma Vs TQM	169
6.12	Six-Sigma Vs Zero Defects	171
	<i>Summary</i>	173
	<i>Key Concepts</i>	174

<b>Chapter 7</b>	<b>Seven Tools of Quality Control</b>	<b>175</b>
7.1	Introduction	175
7.2	Quality Improvement: A Necessity of Organization	176
7.3	Quality Improvement Cycle	176
7.4	Quality Control and Analytical Tools	178
7.5	Seven Tools of Quality Control	179
7.5.1	Check Sheet (Tally Chart)	180
7.5.2	Flowchart	180
7.5.3	Histograms/Bar Graphs	184
7.5.4	Pareto Analysis	186
7.5.5	Control Charts	189
7.5.6	Scatter Diagram	190
7.5.7	Cause-and-Effect Diagram	190
7.6	Applications of Scatter Diagrams	192
7.6.1	Trend Analysis	192
7.6.2	Serial Correlation Analysis	195
7.7	Cause-and-Effect Analysis	198
7.8	Construction of Ishikawa (Cause-and-Effect) Diagram	198
7.9	Types of Cause-and-Effect Diagrams	199
7.9.1	Cause Enumeration	199
7.9.2	Dispersion Analysis	201
7.9.3	Process Analysis	203
7.10	Cause-and-Effect Diagram with Addition of Cards	206
7.11	Root Cause Analysis: Why–Why Chart	207
7.11.1	The Concept	207
7.11.2	The Procedure of Root Cause Analysis	208
7.11.3	Negative Shades of Root Cause Analysis	209
7.12	Quality Circles	210
7.12.1	Effect of Quality Circles	210
7.12.2	Benefits of Quality Circles	211
7.13	Cause-and-Effect Analysis Vs Failure Mode Effect Analysis	211
	<i>Summary</i>	213
	<i>Key Concepts</i>	213
<b>Chapter 8</b>	<b>Failure Mode, Effect, and Criticality Analysis</b>	<b>215</b>
8.1	Introduction	215
8.2	FMEA/FMECA: An Outline	216
8.2.1	Concept of FMEA	216
8.3	FMEA/FMECA Jargon	217
8.4	Elements of FMECA	218

8.4.1	Basic Information Required for FMECA	218
8.5	Environmental Influences: Standards and Guidelines	219
8.5.1	Standards and Guidelines	220
8.6	FMECA Planning	220
8.6.1	Ground Rules and Assumptions	220
8.6.2	Analysis Approach	220
8.6.3	Level of Analysis	221
8.6.4	Trade-off Study Reports	221
8.6.5	Design Data and Drawings	221
8.7	Block Diagrams	221
8.7.1	Functional Block Diagrams	221
8.7.2	Reliability Block Diagram	221
8.8	Application of Statistical Process Control in FMEA/FMECA	222
8.8.1	Three-Stage Application of SPC in FMECA	223
8.9	Failure Modeling by FMECA: Methodology	224
8.9.1	Model Inputs	224
8.9.2	Severity Classification	224
8.9.3	Risk Evaluation Methods	225
8.9.4	FMECA Report	226
8.10	FMEA Methodology	227
8.10.1	Steps Involved in FMEA Method	227
8.10.2	Tasks of FMEA/FMECA Team	228
8.11	Types of FMEA	229
8.12	Process FMEA	230
8.12.1	What is Process FMEA?	230
8.12.2	Objectives of Process FMEA	231
8.12.3	Approach to Process FMECA	231
8.12.4	Quality Control Plan and Process FMEA	233
8.13	Design FMEA	234
8.13.1	List of Documents	234
8.13.2	Steps in Carrying Out Design FMEA	234
8.13.3	Severity Level	235
8.13.4	Occurrence and Detection Rating Level for Design FMEA	235
8.14	Comparison Between Design FMEA and Process FMEA	236
8.15	Applications and Merits of FMEA/FMECA	236
	<i>Summary</i>	238
	<i>Key Concepts</i>	238
<b>Chapter 9 Zero Defects and Poka-Yoke</b>		<b>241</b>
9.1	Introduction	241
9.2	History of Zero-Defect Program	242

9.2.1	DIRFT–DIRET	242
9.2.2	Definition	242
9.2.3	Philip Crosby’s Philosophy	243
9.3	Philip Crosby’s Zero-Defect Concept	244
9.3.1	Defect-Free Product: In a Kai-Zen Approach	244
9.3.2	Zero Defects as a Slogan and Culture	244
9.4	Philip Crosby’s Four Absolutes of Quality	245
9.5	Philip Crosby’s 14 Point Program: Roadmap to Achieve Zero Defects and Quality Improvement	246
9.6	Implementation of Zero-Defect Program and Roles of Management and Workforce	248
9.6.1	Management Role: Motivating and Educating Employees toward Quality Consciousness	248
9.6.2	Workforce Role: Controlling Common Causes of Errors (or Defects)	249
9.6.3	Implementing Zero-Defect Program	249
9.7	Zero-Defect Culture and Environment	251
9.7.1	Willful and Positive Attitude in Inspection Area	251
9.7.2	Building Quality Culture in an Organization	251
9.7.3	Quality Culture and Profit Culture	252
9.7.4	Transformation of Culture Required for TQM	252
9.7.5	Sustainable Development	253
9.7.6	Building Foundations for Sustainable Development	253
9.7.7	Comparison Between Traditional Quality Management and Total Quality Management	254
9.8	Poka-Yoke System: Anticipating and Eliminating Errors	255
9.8.1	The Concept	255
9.8.2	Poka-Yoke: Shingo’s Philosophy	255
9.8.3	Need for Poka-Yoke	256
9.8.4	Poka-Yoke and Kai-Zen	256
9.8.5	Four Principles of Poka-Yoke	256
9.9	Poka-Yoke Devices	257
9.10	Types of Poka-Yoke	257
9.10.1	Prevention-Based Poka-Yokes	259
9.10.2	Detection-Based Poka-Yokes	260
9.11	Methodology of Poka-Yoke (Procedure of Installation)	262
9.12	Principles of Poka-Yoke	263
9.12.1	Methods of Poka-Yoke Devices	264
9.12.2	Some Examples of Poka-Yoke	264
9.12.3	Poka-Yoke: A Misunderstood Concept	265
9.12.4	Building a Strong Foundation	265
9.12.5	Limitations of Poka-Yoke	266
9.13	Zero Defects or Poka-Yoke Vs Statistical Quality Control	266
9.13.1	The User is the Best Inspector	267

9.14	Zero-Defects and Poka-Yoke: Pathfinders of TQM	268
	<i>Summary</i>	269
	<i>Key Concepts</i>	270
<b>Chapter 10 Customer Satisfaction: TQM Strategy</b>		<b>271</b>
10.1	Introduction	271
10.2	Customer in Quality Definition	272
	10.2.1 Importance of Customer	272
10.3	Who is the Customer?	272
10.4	Total Quality: View Through Customer's Eye	274
10.5	Best Practices of TQM for Customer Satisfaction	275
10.6	Customer Satisfaction	281
	10.6.1 Importance of Customer Satisfaction	282
	10.6.2 Company's View on Customer	282
10.7	Customer Satisfaction Measurement	283
	10.7.1 Parameters and Metrics of Customer Satisfaction Measurement	283
	10.7.2 Attributes of Customer Satisfaction Measurement	284
	10.7.3 Effectiveness of Customer Satisfaction Measurement	284
	10.7.4 Objectives of Customer Satisfaction Measurement	284
10.8	Customer Satisfaction Measurement Models	285
	10.8.1 Kano Model	285
	10.8.2 Teboul Model	287
10.9	Customer Perception of Quality	288
10.10	Quality of Service	291
	10.10.1 Customer Expectations in Service	292
	10.10.2 Key Dimensions of Service Quality	292
	10.10.3 Service Levels	293
10.11	Determinants of Customer Satisfaction	294
10.12	Quality Assurance	295
	10.12.1 Methods to Providing Quality Assurance	296
10.13	Quality Audit	296
	10.13.1 Types of Audit	297
10.14	Audit Procedure	299
10.15	Quality Survey	300
10.16	Product Audit	300
	10.16.1 Potential Stages of Product Audit	301
10.17	Recognition of Quality Effects	303
	<i>Summary</i>	304
	<i>Key Concepts</i>	304

<b>Chapter 11</b>	<b>Seven New Tools of TQM and Quality Function Deployment</b>	<b>307</b>
11.1	Introduction	307
11.2	The New Seven Management and Planning Tools	308
11.2.1	Distinction Between the Basic Seven Quality Tools and the New Seven TQM Tools	308
11.3	The New Seven Tools of TQM	308
11.3.1	Affinity Diagrams or KJ Diagrams	309
11.3.2	Relationship Diagrams or Interrelationship Digraphs	310
11.3.3	Hierarchy Trees or Tree Diagrams	317
11.3.4	Matrices and Tables	319
11.3.5	Prioritization Matrices	321
11.3.6	Process Decision Program Chart	324
11.3.7	Activity Network Diagrams or Arrow Diagram	327
11.4	History and Development of QFD	331
11.5	QFD: Concept and Features	332
11.6	Cross-Functional Teams	333
11.6.1	QFD Team	333
11.6.2	QFD Team in Operation	334
11.6.3	Who Are the Customers?	334
11.6.4	What Do Customers Need?	334
11.6.5	How Will the Needs Be Satisfied?	335
11.6.6	Throw Over Wall Approach	335
11.7	Voice of Customer	336
11.7.1	QFD Acts As a Voice of Customer	336
11.7.2	Types of Voices of Customers (Customer Information)	337
11.8	House of Quality	339
11.8.1	Structure of HOQ	340
11.9	Phases of QFD Process	340
11.10	Construction Procedure of HOQ	342
11.10.1	Sequential Approach	344
11.11	Benefits of QFD	346
11.11.1	Merits of QFD	346
	<i>Summary</i>	348
	<i>Key Concepts</i>	349
<b>Chapter 12</b>	<b>Taguchi Approach to TQM</b>	<b>351</b>
12.1	Introduction	351
12.1.1	Objective of Taguchi Approach	352
12.1.2	Features of Taguchi's Approach	352
12.2	Quality Loss Function or Taguchi Loss Function	352
12.2.1	Equation for QLF	353

12.2.2	Cases of QLF	354
12.2.3	Target Specifications	355
12.3	Quality Robustness	358
12.3.1	Significance of Robust Design	358
12.3.2	Phases of Robust Designing	359
12.4	Design of Experiments	361
12.4.1	Methods of Experimental Design	362
12.5	Orthogonal Arrays	366
12.5.1	Properties of an Orthogonal Array	366
12.5.2	Assumptions of Taguchi Method	367
12.5.3	Minimum Number of Experiments to Be Conducted	369
12.5.4	Procedure for Determining Suitable Orthogonal Array	371
12.5.5	Orthogonal Arrays in Analysis	371
12.6	Inner Arrays and Outer Arrays	379
12.6.1	Performance Measures	382
12.6.2	On-Line and Off-Line Quality Control	383
12.6.3	Factors	384
12.6.4	Interactions	385
12.7	Noise	387
12.7.1	Better Noise Proof System than Noise Elimination	387
12.7.2	Signal-to-Noise Ratio	388
12.7.3	Types of Signal-to-Noise Ratios	388
12.8	Steps Involved in Implementation of Taguchi's Experimental Design	391
12.9	Assessment on Taguchi's Ideas	393
12.9.1	Strengths of Taguchi's Ideas	393
12.9.2	Weaknesses of Taguchi's Ideas	394
12.9.3	Applications of Taguchi's Idea	394
	<i>Summary</i>	396
	<i>Key Concepts</i>	396
 <b>Chapter 13 Strategic Quality Management</b>		 <b>399</b>
13.1	Introduction	399
13.2	History and Development of SQM	400
13.2.1	SQM Definition	400
13.2.2	Why SQM?	401
13.2.3	Strategic Quality Vs Total Quality	401
13.2.4	Distinction between TQM and SQM	403
13.3	Phases of SQM	403
13.4	Formulation of Strategies toward TQM	407
13.5	Strategic Wheel of Quality	409
13.5.1	Strategy by Statistical Quality Control	409

13.5.2	Strategy Through Quality Trilogy (Plan, Control, and Improve)	410
13.5.3	Cause-and-Effect Strategy	411
13.5.4	Quality Cycle: Plan–Do–Check–Act Approach	412
13.5.5	Strategy of Cost of Hidden Plant Behind Total Quality Control	413
13.5.6	Zero-Defects Approach: Quality is Free	414
13.5.7	Make Mistake-Proof, Not Foolproof (Poka-Yoke)	415
13.5.8	Robust Design: Taguchi’s Approach	415
13.6	Other Tools and Strategic Approaches to TQM	417
13.6.1	Lean Production Approach	417
13.6.2	Personal Quality Approach	418
13.6.3	Quality Awards Approach	418
13.6.4	Assessment and Audits Approach	420
13.6.5	Benchmarking and Gap Analysis Approach	420
13.6.6	QFD Approach	420
13.6.7	Force Field Analysis Approach	420
13.7	Hoshin Kanri	423
13.7.1	Concept	423
13.7.2	Definition and Meaning	424
13.7.3	Objectives of Hoshin Kanri	424
13.7.4	Features of Hoshin Kanri	425
13.8	Hoshin Tables	428
13.8.1	Types of Hoshin Tables	429
13.8.2	Analyses	430
13.9	Seven-Step Process of Hoshin Kanri	431
13.10	Hoshin Kanri and Deming’s P–D–C–A Cycle	434
13.10.1	Hoshin Kanri and Kai-Zen	434
13.10.2	Deming’s P–D–C–A in Hoshin Kanri	435
13.10.3	Hoshin Kanri, the Japanese SQM and Quality Management	437
13.11	Merits of Hoshin Kanri	438
	<i>Summary</i>	439
	<i>Key Concepts</i>	439
<b>Chapter 14</b>	<b>Total Productive Maintenance and Kaizen</b>	<b>441</b>
14.1	Introduction	441
14.2	TPM Environment	442
14.3	Relationship Among TPM, Terotechnology, and Physical Assets Management	442
14.4	Philosophy of TPM	443
14.4.1	Targets of TPM (Goals or Objectives)	444
14.4.2	Approaches to TPM	445
14.4.3	Characteristics of TPM Philosophy	446
14.4.4	Effectiveness of TPM	446
14.5	Concept of TPM	447

14.6	Preventive, Corrective Maintenance, and Maintenance Prevention for Controlling Deterioration of Equipment	448
14.6.1	Analogy Between Preventive Medicine and Preventive Maintenance	449
14.6.2	Life Span Characteristics and Breakdown Countermeasures	450
14.7	Eight Pillars of TPM	451
14.7.1	Kobetsu Kaizen	451
14.7.2	Safety and Hygiene (Autonomous System)	452
14.7.3	Office Administration	452
14.7.4	Jishu Hozen	453
14.7.5	Training, Education, and Development	453
14.7.6	Maintenance Prevention	454
14.7.7	Quality Maintenance	455
14.7.8	Planned Maintenance	456
14.8	TPM Template	457
14.9	Barriers to implement TPM	457
14.9.1	Predictive Maintenance	459
14.10	Comparison Between TPM and TQM	459
14.10.1	TQM	459
14.10.2	TPM	460
14.10.3	Comparison Between TPM and TQC	460
14.11	Zero Breakdown	462
14.11.1	Five Countermeasures for Zero Breakdown	463
14.11.2	Zero Defects and Zero Breakdown	464
14.12	Expected Contribution by TPM Applications	464
14.13	Kaizen: Continuous Improvement	466
14.13.1	Definition or Meaning of Kaizen	466
14.13.2	Objective of Kaizen	466
14.13.3	Salient Features	466
14.13.4	Need for Kaizen	466
14.14	Types of Kaizen	467
14.14.1	Standard Work Kaizen	467
14.14.2	Setup Reduction Kaizen	469
14.14.3	TPM Kaizen or Total Productive Maintenance Kaizen	469
14.14.4	Quality Focus Kaizen	470
14.14.5	Kanban Kaizen	470
14.14.6	5S Kaizen	470
14.15	Expected Contributions by Application of Kaizen	472
14.16	Continous Process Improvement	473
14.17	Total Maintenance Planning	475
	<i>Summary</i>	477
	<i>Key Concepts</i>	477

<b>Chapter 15</b>	<b>Quality and Reliability Evaluation</b>	<b>479</b>
15.1	Introduction	479
15.2	Reliability Improvement is Quality Improvement	480
15.3	Reliability Systems	481
15.3.1	Series System	481
15.3.2	Parallel System	483
15.3.3	Combined (Series and Parallel) System	486
15.4	Modular Design or Modularization	493
15.4.1	Advantages of Modular Design	493
15.4.2	Redundancy	494
15.4.3	Group Redundancy	494
15.5	Distinction Between Quality and Reliability	495
15.6	Definitions and Terms Used in Reliability Calculations	495
15.7	Availability	499
15.7.1	Classification of Availability	499
15.7.2	Factors Affecting Availability or/and Reliability	500
15.8	Maintainability	502
15.8.1	Definition	502
15.8.2	Factors Affecting Maintainability	502
15.9	Overall Equipment Effectiveness	503
15.9.1	Performance Efficiency	504
15.9.2	Evaluation of Maintenance Performance (Maintenance Performance Indices)	506
15.9.3	Maximizing Equipment Effectiveness	508
15.9.4	Factors Affecting Maintenance Performance Indices	508
15.10	Quality of Maintenance	509
	<i>Summary</i>	511
	<i>Key Concepts</i>	511
<b>Chapter 16</b>	<b>Benchmarking and Concurrent Engineering</b>	<b>513</b>
16.1	Introduction	513
16.2	Concept, History, and Evolution of Benchmarking	514
16.2.1	Concept	514
16.2.2	History and Evolution	515
16.2.3	Benchmarking Vs Quality Management	515
16.2.4	Why Benchmarking?	517
16.3	Types of Benchmarking	518
16.4	Costs of Benchmarking	519
16.5	Role of Top Management in Benchmarking Process	520
16.5.1	Training for Benchmarking	520

16.6	Benchmarking Approach: Methodology (or Procedure)	521
16.6.1	Example of Procedure of Implementing Benchmarking Practices	521
16.7	Phases in Benchmarking	523
16.8	Merits and Demerits of Benchmarking Process	524
16.8.1	Merits (Benefits)	524
16.8.2	Demerits (Limitations)	525
16.9	Concurrent Engineering or Quality by Design	526
16.9.1	Concept	526
16.10	Composition of QBD Teams	526
16.10.1	Features of Concurrent Engineering/QBD Team	526
16.10.2	Prerequisites for Implementation	527
16.10.3	Reasons for Implementing QBD	529
16.11	Process of QBD	530
16.11.1	Process of Concurrent Engineering/QBD	530
16.12	Tools of Concurrent Engineering or QBD	532
16.12.1	Organizational Tools	532
16.12.2	Production Tools	533
16.12.3	Product Development Tools	534
16.12.4	Statistical Tools	535
16.13	Merits and Demerits of QBD	535
16.13.1	Merits (Advantages) of QBD	535
16.13.2	Demerits (Limitations) of QBD	536
	<i>Summary</i>	537
	<i>Key Concepts</i>	537
<b>Chapter 17</b>	<b>Quality Standards, Certification, and Awards</b>	<b>541</b>
17.1	Introduction	541
17.2	ISO 9000: Quality Management System	542
17.2.1	Need for ISO 9000 Quality System	542
17.2.2	History and Evolution of ISO 9000 Series Standards	543
17.2.3	Benefits of ISO 9000 Quality System	544
17.2.4	ISO 9000: QMS Versions	545
17.2.5	ISO Membership	548
17.2.6	ISO 9000 (QMS)	549
17.2.7	Quality Management Jargon (According to ISO 9000)	550
17.2.9	ISO 9000: A Way of Life	551
17.3	Management System Standards	552
17.3.1	Continual Improvement	552
17.3.2	Audits	553
17.3.3	What is a Management System?	553
17.3.4	Assessment and Certification	553

17.3.5	ISO Does Not Perform Certification	554
17.3.6	Implementation of ISO 9000 Quality System	555
17.4	ISO 14000: Environmental Management System	559
17.4.1	History and Evolution of ISO 14000 Standards	559
17.4.2	ISO 14000 Series Architecture	559
17.4.3	Salient Features of ISO 14001 Standard	560
17.4.4	EMS Model for ISO 14001	561
17.4.5	EMS Audit (Section 6)	561
17.4.6	Benefits of Environmental Audit	562
17.4.7	ISO 14001	562
17.4.8	Other Standards in ISO 14000 Family of Standards	563
17.4.9	Benefits of Implementing IS/ISO 14001:2004	563
17.5	Other Important IS/ISO Standards/Systems	564
17.5.1	IS 15000:1998 Hazards Analysis and Critical Control Point (HACCP)	564
17.5.2	IS 18001:2007 Occupational Health and Safety Management Systems	566
17.5.3	ISO 22000:2005—Food Safety Management	566
17.5.4	ISO 26000—Social Responsibility	567
17.5.5	ISO 27000—Information Security System	567
17.5.6	ISO 31000—Risk Management	568
17.6	Standards	570
17.6.1	International Standards	570
17.6.2	National Standards Bodies	570
17.6.3	Types of Standards	570
17.6.4	How Does ISO Develop Standards?	570
17.6.5	Standardization Process	571
17.6.6	ISO Document Copyright	573
17.7	Quality Awards	573
17.7.1	Malcolm Baldrige National Quality Award	574
17.7.2	Deming Prize	578
17.7.3	EFQM Excellence Award	578
17.7.4	Rajiv Gandhi National Quality Award	579
	<i>Summary</i>	583
	<i>Key Concepts</i>	583
<b>Chapter 18 Contemporary Issues</b>		<b>585</b>
18.1	Business Process Outsourcing	585
18.1.1	History	586
18.1.2	Types of BPO	586
18.1.3	Indian Perspective	587
18.1.4	Merits or Advantages	587
18.1.5	Problems/Hurdles in BPO	588
18.1.6	Threats	588

18.2	Business Process Reengineering	589
18.2.1	Overview	589
18.2.2	History	590
18.2.3	BPR TOPICS	592
18.2.4	Role of IT in BPR	593
18.2.5	An Example of BPR Application	594
18.2.6	Criticism	594
18.3	Performance Management	596
18.3.1	Prerequisite Analysis	597
18.3.2	Performance Management Process (or Cycle)	597
18.3.3	Benefits	599
18.4	Balanced Scorecard	600
18.4.1	History	601
18.4.2	Prerequisites	602
18.4.3	Perspectives of Balanced Scorecard	602
18.4.4	Merits of Balanced Scorecard Implementation	604
18.4.5	Design of BSC	604
18.4.6	Criticisms	606
18.5	Capability Maturity Model	607
18.5.1	History	607
18.5.2	Maturity Model	607
18.5.3	Structure of CMM	608
18.5.4	Maturity Levels	609
18.5.5	People Capability Maturity Model	609
18.5.6	Structure of People CMM	611
18.5.7	Capability Maturity Model Integration	611
18.6	Value Chain Analysis	612
18.6.1	Main Aspects of Value Chain Analysis	613
18.6.2	Source of Information for Value Chain Analysis	617
18.6.3	Limitations of Value Chain Analysis	617
18.7	Quality Management Information System	618
18.7.1	Information Quality	619
18.7.2	Quality Management Information Systems	621
18.8	Muda	622
18.8.1	The Concept	622
18.8.2	The Seven Wastes	622
	<i>Summary</i>	626
	<i>Key Concepts</i>	626
	<b>Appendix</b>	<b>627</b>
	<b>Index</b>	<b>631</b>
